There I was - Collier Schorr 2008

There I Was marks a shift in medium and a conceptual departure for Collier Schorr. She is best known for her photographic studies of a real and imagined town in southern Germany, works which tease the accepted artifice of photography to forge an appropriated remembrance of German histories. Schorr found drawing a more acute medium

to describe events that took place in the neighbourhoods of her childhood, specifically the muscle car counter culture of the 1960s in Long Island and Queens, NY. This history is related through the short but spectacular life of charismatic 19 year-old drag car racer Charlie Astoria Chas Snyder and his 67 Ko-Motion Corvette. At the age of four Schorr accompanied her father, an automotive photographer and journalist, to a local race track where she watched Astoria Chas work on his car. A subsequent article followed, with the now eerie headline While Astoria Chas is doing his thing in Vietnam his friends are racing his L-88. By the time the article was published, Charlie Snyder had died in action in Vietnam. There I Was is Snyder's story and Schorr's dilemma. He was there, she was not. The project examines the role of the photographer's presence, territory and view, and the difficulty of representing any past without the theatricality of re-staging

it. Based entirely on photography, the book engages with the medium and simultaneously challenges the role of the photograph as document of the past. Using a collision of source materials for the drawings, beginning with her fathers images and Snyders own snapshots taken in Vietnam, Schorr then draws from professional reportage pictures, so as to describe, literally sketch out, one monumental trip from Queens to Vietnam and back. These drawings are contrasted by reproductions of vintage car magazine articles and Schorr's own photograph portraits. There I Was is a complex and multi-faceted look at escape, culture, dreams and mortality, conjuring up an expressionistic portrait of the dichotomies of the late 1960s in a fractured wartime America.

His lips pulled back in that grin she knew all too well. With one

finger pressed to his lips, he whispered, "It'll be our little secret. No one can know just how much I love you, Brandy. No one." Years after his death, her father's words still haunt Brandy's every waking moment. She cannot escape him. A dark basement, a hooded figure with a leering grin... No one believes her, but Brandy knows it's him. Her father. And he's back to remind her exactly who she belongs to. *May contain triggers. Mine contains scenes of a graphic nature.

How Britain Worked - Guy Martin 2012-10-04

It is a largely forgotten fact that Britain was the first industrialized country in the world, but Guy Martin - the cult motorcycle racer and mechanic - is about to remind us how the industrial revolution helped make Britain great. Guy shows how the discoveries made in the late 18th-19th centuries are to thank for the ease of our every day lives: in order to cook a bacon and egg sandwich in Industrial-era conditions, Guy has to restore a steam locomotive and railway to have the components delivered to the local shop; he has to bring a saw mill back into working order to be able to make a bicycle; he has to revamp a Victorian fishing trawler so he can cook himself some fish and chips, and when he decides to mow the lawn, he restores a Victorian botanical garden. After all that, he's in need of a holiday - so he sets to work

restoring a Victorian holiday resort. Illustrated throughout with specially commissioned photography as well as historical images, Guy will take us through each project; his passion, enthusiasm and sheer inventiveness bringing a completely new perspective to the Industrial Revolution. He invites us to live it with him, to enjoy the nostalgia, marvel in the mechanics and learn from its legacy.

Developing Sport for Women and Girls - Emma Sherry
2020-04-16

Women and girls are often excluded from organised sport or face challenges in accessing sport or developing within sport. This is the first book to focus on sport development for women and girls. It provides a theoretical and practical framework for readers in the emerging field of sport development. *Developing Sport for Women and Girls* examines both the development of sport, and development through sport with expert contributions from Australasia, North America and Europe. It offers critical analysis of contemporary sport development, from high performance pathways to engaging diverse communities to the use of sport to empower women and girls. Each chapter explores various contexts of sport development and sport for development theory with a specific focus on women and girls. It covers key topics such as health, education, sexual orientation and participation across the lifecourse, and features international case studies in every chapter. This is essential reading for students,

academics, researchers and practitioners working in the area of sport development or sport management.

Motocourse 2020-2021 -

Michael Scott 2021-02-16

MOTOCOURSE 2020-2021

celebrates its 45th year of publication - and despite the World pandemic throwing the sport into chaos, what a year it was for motorcycle racing! In a thrilling MotoGP season, Marc Marquez and Honda were expected to be the dominant force once more, but an accident in the opening round saw him side-lined for much of the season and left him with but a slim chance of retaining his MotoGP crown. Other riders stepped up in his absence and shared out victories. Ducati's Andrea Dovizioso, and Yamaha's trio of Maverick Vinales, Fabio Quartararo and Franco Morbidelli all took to the top step of the podium. The emergence of KTM as a race winning machine saw both Brad Binder and Miguel Oliveira join the list of first

time winners, in a close fought battle for supremacy throughout the whole of the MotoGP field. Once again, Valentino Rossi defied the years to remain at the sharp end of the grid, whilst the Suzuki pair of Alex Rins and Joan Mir both looked equally capable of adding to the list of winners in an enthralling contest for the title. Editor Michael Scott provides a no-holds-barred assessment of all the aspects of a compelling season's action.

MOTOCOURSE alone has full coverage of the support classes, Moto2 and Moto3, where Italian riders Luca Marini, Estea Bastinanini, Marco Bezzecchi were contenders to clinch the Moto2 crown, whilst Albert Arenas, Ai Ogura and John McPhee hotly disputed the Moto3 title. In World Superbikes, Kawasaki's dominance was challenged by Ducati's Scott Redding, with Jonathan Rea looking to retain his championship title for the sixth successive year, ahead of the chasing pack including Alvaro Bautista, Chaz Davies

and Yamaha's Michael van der Mark. No book covers the motorcycle racing world in as much detail as MOTOCOURSE, which, in addition to the two major world series covers The World Supersport Championship, The British Superbike Championship and the AMA USA Superbike series. Incredible value for money, with 304 large-format pages, bursting with over 450 stunning colour photographs from the world's finest photographers, MOTOCOURSE covers it all. No wonder MOTOCOURSE is regarded worldwide as 'The Bible of Motorcycle Racing'.

Charting Transnational Fields -
Christian Schmidt-Wellenburg
2020-03-19

The volume provides a field-analytical methodology for researching knowledge-based sociopolitical processes of transnationalization. Drawing on seminal work by Pierre Bourdieu, we apply concepts of practice, habitus, and field to phenomena such as cross-national social trajectories, international procedures of

evaluation, standardization, and certification, or supranational political structures. These transnational phenomena form part of general political struggles that legitimate social relationships in and beyond the nation-state. Part 1 on methodological foundations discusses the consequences of Bourdieu's epistemology and methodology for theorizing and investigating transnational phenomena. The contributions show the importance of field-theoretical concepts for post-national insights. Part 2 on investigating political fields presents exemplary case studies in diverse research areas such as colonial imperialism, international academic rankings, European policy fields, and local school policy. While focusing on their research objects, the contributions also give an insight into the mechanisms involved in processes of transnationalization. The volume is an invitation for sociologists, political scientists, and scholars in adjacent

research areas to engage with reflexive and relational research practice and to further develop field-theoretical thought.

Achtung-Panzer! - Heinz
Guderian 1995

This is one of the most significant military books of the twentieth century. By an outstanding soldier of independent mind, it pushed forward the evolution of land warfare and was directly responsible for German armoured supremacy in the early years of the Second World War. Published in 1937, the result of 15 years of careful study since his days on the German General Staff in the First World War, Guderian's book argued, quite clearly, how vital the proper use of tanks

and supporting armoured vehicles would be in the conduct of a future war. When that war came, just two years later, he proved it, leading his Panzers with distinction in the Polish, French and Russian campaigns. Panzer warfare had come of age, exactly as he had forecast. This first English translation of Heinz Guderian's classic book - used as a textbook by Panzer officers in the war - has an introduction and extensive background notes by the modern English historian Paul Harris.

Proficient Motorcycling -
David L. Hough 2010-11-09

This best-selling book is also “#1 book in motorcycle safety” (Nielsen BookScan) and essential reading for all motorcyclists regardless of their years of experience. Author David L. Hough, a revered motorcycle author, columnist, and riding-safety consultant, lays out a clear course for all riders who want to sharpen their handling skills and improve their rides. This second edition, expanded and now in full color, offers new

riders and road warriors the exact kind of advice they need to be prepared for anything when on the road, how to avoid accidents, and how to handle the unexpected. Hough, who began motorcycling in the 1960s, tackles every imaginable topic—from the mechanics of the bike, selection of the right-sized bike, and basic riding skills to night riding, group outings, and advanced survival tactics. In the chapter called “Motorcycle Dynamics,” Hough spells out the equipment needed and basic skills required to control a bike, and specifically keeping the rider’s safety and ability to avoid potentially injurious or fatal crashes. The author is outspoken and direct when it comes to safety, and he emphasizes the importance of the rider’s braking abilities and spells out how to improve them. The chapter offers six tried-and-true techniques for quick-stop tactics, critical for every rider to understand and master. He also addresses other vital skills that riders

need to evaluate and improve, such as turning, maintaining balance and stability, and steering. He defines, compares, and analyzes the ins and outs of steering and control: direct steering, countersteering, push steering, out-tracking, coning, u-turns, and directional control. The chapter called “Cornering Habits” is a virtual master class in acceleration, deceleration, use of weight, throttle, leaning, and handling challenging terrain. Hough’s skill as a photographer and illustrator adds a graphic element to his books that leads to immediate understanding of the concepts he explains. The detail offered in each section of the book can only come from decades on the road, and the author is the consummate instructor, assigning homework to the readers in the form of exercises to practice and improve specific techniques that he outlines and illustrates in the text. Any rider who would venture out on the road without David Hough’s voice in his head takes an unnecessary risk with his own life.

Proficient Motorcycling takes riders from long, snaking country roads right into the traffic of the big city, and Hough offers the best advice for riders dealing with the most challenging conditions, whether it's road construction, snap-jawed intersections, skateboarders, or suddenly slippery road surfaces. A critical section of the book offers riders advice on how to deal with automobiles, including aggressive car drivers, oblivious SUV drivers, or "blind" truck drivers. The book offers the kind of first-hand experience that can literally save riders' lives, as illustrated in the chapters "Booby Traps" and "Special Situations," which offer evasive tactics and advice to avoid and handle everything from slick surfaces, curbs, and construction plates to ferocious dogs, hazardous wildlife, and difficult weather conditions. The final chapter of the book, "Sharing the Ride," is geared toward experienced riders who travel together in groups or who travel with a second

passenger on the bike. Topics covered are formation, packing for trips, communication between riders, sidecars, trikes, and more. The book concludes with a resources section of organizations, training schools, educational tools, and websites; a glossary of 80+ terms; and a complete index.

Million Cars for Billion People - Gautam Sen 2014-10-11

Can one car transform a nation? The Ford Model T did do so a century ago when it replaced the horse, brought about a revolution in

agriculture, became a stimulus to urbanization that eventually changed the landscape of America. Though the Maruti 800, the Tata Indica, the Hyundai Santro and the Maruti Alto, became engines of growth for India, these cars neither drove away the cow nor changed the way Indians travelled. Tata's Nano was expected to change all that and become the ultimate people's car, capturing the imagination of the middle class across nations and cultures. In spite of its petite dimensions, the Nano was meant to stand tall. Yet it did not. What caused it to fail and fall from grace despite being lauded as the 'right product at the right time' and 'the most significant new car since the Ford Model T was introduced 100 years ago'? But is it really all over or is there still hope for India's 'little wonder'? What will the people's cars of tomorrow be like? A Million Cars for a Billion People delves into the questions, concerns and doubts, as well as the many misconceptions and myths, that

have gathered momentum over the years about India's automotive history and the industry's mission to create a true 'people's car'. The very first cars that came to India; the early beginnings of the industry; the nascent history of the automobile across nations like Germany, France, US, the UK, Italy, Japan and South Korea, is narrated with authority and charm, from the viewpoint of the quest for the ultimate people's car.
