Emerging Global Cities - Alejandro Portes 2022-12-27

Certain cities—most famously New York, London, and Tokyo—have been identified as “global cities,” whose function in the world economy transcends national borders. Without the same fanfare, formerly peripheral and secondary cities have been growing in importance, emerging as global cities in their own right. The striking similarity of the skylines of Dubai, Miami, and Singapore is no coincidence: despite following different historical paths, all three have achieved newfound prominence through parallel trends. In this groundbreaking book, Alejandro Portes and Ariel C. Armony demonstrate how the rapid and unexpected rise of these three cities recasts global urban studies. They identify the constellation of factors that allow certain urban places to become “emerging global cities”—centers of commerce, finance, art, and culture for entire regions. The book traces the transformations of Dubai, Miami, and Singapore, identifying key features common to these emerging global cities. It contrasts them with “global hopefuls,” cities that, at one point or another, aspired to become global, and analyzes how Hong Kong is threatened with the loss of this status. Portes and Armony highlight the importance of climate change to the prospects of emerging global cities, showing how the same economic system that propelled their rise now imperils their future. *Emerging Global Cities* provides a powerful new framework for understanding the role of peripheral cities in the world economy and how they compete for and sometimes achieve global standing.

The Overtourism Debate - Jeroen Oskam 2020-09-14

This book gives an overview of the positions in the rapidly evolving debate over the sociocultural footprint of tourism on its destinations. Overtourism, its impact and subsequent mitigating measures taken, have started to dominate political discussions in European cities such as Amsterdam, Barcelona, Seville and Berlin.

Socio-Economic Effects and Recovery Efforts for the Rental Industry: Post-COVID-19 Strategies - Korstanje, Maximiliano 2021-05-28

The COVID-19 pandemic caused a disruption for many industries at its emergence, including the rental industry. The rental industry consists of more than just car rentals. It also includes Airbnb, house rentals, cruises, and other means of transport. This industry, which relies on tourism, was negatively affected by the travel restrictions that were put in place due to the pandemic. As such, it had to quickly adapt and grow to abide by the rules of the “new normal” in order to survive both during the pandemic, as well as implement new models and strategies that would help it to regain its success post-COVID-19. *Socio-Economic Effects and Recovery Efforts for the Rental Industry: Post-COVID-19 Strategies* is a critical reference book that discusses the effects of the COVID-19 pandemic on the rental industry and the ways in which the rental

industry adapted under the new global restrictions affecting tourism. This book covers recovery efforts for the rental industry, analyzes global cases of the effects and adaptations the rental industry has undergone, and discusses the sociological aspects of the pandemic. While highlighting topics such as e-commerce, financial leasing, second home tourism, and sharing economies, this book is essential for executives, business owners, managers, rental agencies, ridesharing companies, academicians, researchers, and students interested in the current state of the rental industry and how it plans to overcome the challenges caused by the pandemic.

The Volatility and Future of Democracies in Asia - Hsin-Huang Michael Hsiao 2021-11-30

This book explores the volatile and uncertain future of democracies in Asia through typological analysis of the diverse patterns of Asian countries. Detailed analysis and extensive case studies featured throughout this edited volume unveil democracies in the process of being consolidated, such as Taiwan and South Korea; precarious democracies, such as Indonesia, Malaysia, and the Philippines; states that are experiencing setbacks and a retreat from democracy, such as Thailand and Myanmar; and finally, states that are still resisting democracy, including China. Key findings articulate that Asian democracies do not follow existing models or patterns – such as that of Western democracy – but are instead lively, emergent works in progress. Environments in which democracy is practiced in Asia reflect local people’s pluralistic imagination of democracy, hence a comparative thematic approach is adopted. Contributors originate from Japan, Korea, Malaysia, Philippines, Taiwan, and Thailand, each presenting regional insights into the unique challenges and movements of their respective nations, from staging protests in Bangkok to military coup in Myanmar. Opening new dialogue in the study of democracy, *The Volatility and Future of Democracies in Asia* will appeal to students and scholars of political science, comparative politics, international development, democracy studies, and Asian studies more broadly. .

Tour Guiding Research - Betty Weiler 2014-10-14

This book provides an authoritative, state-of-the-art review of tour guiding scholarship and research and aims to foster best practice and to stimulate further study and research on tour guiding across a range of disciplines. It explores how tour guiding theory and practice has evolved over time and what factors have contributed to this. The volume consolidates, synthesises and adds to the knowledge base and foreshadows how current and future trends and issues might impact on tour guiding research and practice in the 21st century. The studies reviewed in this book cover a wide range of contexts in which guided tours are conducted, ranging from city streets to heritage and wildlife tourism attractions, from high-end tourist lodging establishments to national park campgrounds, and from highly developed destinations to very remote ones in both developed and developing countries. The book is well-illustrated and its accessible style with chapter summaries makes it ideal for students as well as researchers.

Dying of Whiteness - Jonathan M. Metz 2019-03-05

A physician reveals how right-wing backlash policies have mortal consequences -- even for the white voters they promise to help Named one of the most anticipated books of 2019 by Esquire and the Boston Globe In the era of Donald Trump, many lower- and middle-class white Americans are drawn to politicians who

pledge to make their lives great again. But as *Dying of Whiteness* shows, the policies that result actually place white Americans at ever-greater risk of sickness and death. Physician Jonathan M. Metzler's quest to understand the health implications of "backlash governance" leads him across America's heartland. Interviewing a range of everyday Americans, he examines how racial resentment has fueled pro-gun laws in Missouri, resistance to the Affordable Care Act in Tennessee, and cuts to schools and social services in Kansas. And he shows these policies' costs: increasing deaths by gun suicide, falling life expectancies, and rising dropout rates. White Americans, Metzler argues, must reject the racial hierarchies that promise to aid them but in fact lead our nation to demise.

Relaunching Titanic - William J V Neill 2013-07-18

Relaunching Titanic critically considers the invocation of Titanic heritage in Belfast in contributing to a new 'post-conflict' understanding of the city. The authors address how the memory of Titanic is being and should be represented in the place of its origin, from where it was launched into the collective consciousness and unconscious of western civilization. *Relaunching Titanic* examines the issues in the context of international debates on the tension between place marketing of cities and other alternative portrayals of memory and meaning in places. Key questions include the extent to which the goals of economic development are congruous with the 'contemplative city' and especially the need for mature and creative reflection in the 'post-conflict' city, whether development interests have taken precedence over the need for a deeper appreciation of a more nuanced Titanic legacy in the city of Belfast, and what Belfast shares with other places in considering the sacred and profane in memory construction. While *Relaunching Titanic* focuses on the conflicted history of Belfast and the Titanic, it will have lessons for planners and scholars of city branding, tourism, and urban re-imaging.

Overbooked - Elizabeth Becker 2016-02-23

"Travel is no longer a past-time but a colossal industry, arguably one of the biggest in the world and second only to oil in importance for many poor countries. One out of 12 people in the world are employed by the tourism industry which contributes \$6.5 trillion to the world's economy. To investigate the size and effect of this new industry, Elizabeth Becker traveled the globe. She speaks to the Minister of Tourism of Zambia who thinks licensing foreigners to kill wild animals is a good way to make money and then to a Zambian travel guide who takes her to see the rare endangered sable antelope. She travels to Venice where community groups are fighting to stop the tourism industry from pushing them out of their homes, to France where officials have made tourism their number one industry to save their cultural heritage; and on cruises speaking to waiters who earn \$60 a month--then on to Miami to interview their CEO. Becker's sharp depiction reveals travel as a product; nations as stewards. Seeing the tourism industry from the inside out, the world offers a dizzying range of travel options but very few quiet getaways"--

Space, Power and the Commons - Samuel Kirwan 2015-10-23

Across the globe, political movements opposing privatisation, enclosures, and other spatial controls are coalescing towards the idea of the 'commons'. As a result, struggles over the commons and common life are now coming to the forefront of both political activism and scholarly enquiry. This book advances academic debates concerning the spatialities of the commons and draws out the diverse materialities, temporalities, and experiences of practices of commoning. Part one, "Materialising the Commons" focuses on the performance of new geographical imaginations in spatial and material practices of commoning. Part two, "Spaces of Commoning", explores the importance of the turn from 'commons' to 'commoning', bringing together chapters focusing on the "doing" of commons, and how spaces, materials, bodies and abstract flows are intertwined in these complex and excessive processes. Part three, "An Expanded Commons", explores the broader registers and spaces in which the concept of the commons is at stake and highlights

how and where the commons can open new areas of action and research. Part four, "The Capture of the Commons", questions the particular interdependence of 'the commons' and 'enclosure' assumed within commons literature framed by the concept of neoliberalism. Providing a comprehensive introduction to the diverse ways in which ideas of the commons are being conceptualised and enacted both throughout the social sciences and in practical action, this book foregrounds the commons as an arena for political thought and sets an agenda for future research.

The Political Economy of City Branding - Ari-Veikko Anttiroiko 2014-02-24

Globalization affects urban communities in many ways. One of its manifestations is increased intercity competition, which compels cities to increase their attractiveness in terms of capital, entrepreneurship, information, expertise and consumption. This competition takes place in an asymmetric field, with cities trying to find the best possible ways of using their natural and created assets, the latter including a naturally evolving reputation or consciously developed competitive identity or brand. *The Political Economy of City Branding* discusses this phenomenon from the perspective of numerous post-industrial cities in North America, Europe, East Asia and Australasia. Special attention is given to local economic development policy and industrial profiling, and global city rankings are used to provide empirical evidence for cities' characteristics and positions in the global urban hierarchy. On top of this, social and urban challenges such as creative class struggle are also discussed. The core message of the book is that cities should apply the tools of city branding in their industrial promotion and specialization, but at the same time take into account the special nature of their urban communities and be open and inclusive in their brand policies in order to ensure optimal results. This book will be of interest to scholars and practitioners working in the areas of local economic development, urban planning, public management, and branding.

Ethnic and Minority Cultures as Tourist Attractions - Anya Diekmann 2015-01-15

This book focuses on ethnic and minority communities in urban contexts and the ways in which their cultures are represented in tourism development. It offers a multi-disciplinary approach which draws on examples and case studies of ethnic and minority communities and cultural tourism development from all around the world, including slums in India, favelas in Brazil, Chinatowns in Australia, Jewish quarters in Central and Eastern Europe, ethnic villages in China, the African district of Brussels, the gay quarter in Cape Town and a desert town in Israel. It offers a positive perspective on ethnic and minority cultures and communities at a time when social and political support is lacking in many countries. This book will be a useful resource for those studying and researching cultural and urban tourism, urban planning and development, community studies and urban and cultural geography.

A Public Sociology of Waste - Hird, Myra J. 2022-06-22

Is it possible for individuals to tackle waste by recycling, reusing and reducing alone? This provocative book critically analyses the widespread assumption that individuals and households have created our global waste crisis. Sociologist and waste expert Myra J. Hird reveals neoliberal capitalism's fallacy of infinite growth as the real culprit, and demonstrates how industry and local governments work in tandem to deflect our attention away from the real causes of our global waste problem. Hird offers crucial insights into the relations between waste and wider societal issues including ongoing (settler) colonialism, poverty, racism and sexism, and showcases how sociology may provide solutions through a 'public imagination' of waste. [ECGBL 2021 15th European Conference on Game-Based Learning](#) - Panagiotis Fotaris 2021-09-23

China as a Polar Great Power - Anne-Marie Brady 2017-08-18

ASEAN Economic Community - Mia Mikic 2016-02-26

The launch of the ASEAN Economic Community raises key issues: the deepening of regional trade and the associated problem of exchange rate management. This volume questions the capacity of a shallow institution to deal with complex impacts on employment and inequality. Contributors analyze ASEAN's potential and weakness in readable terms.

Tourism in the Antarctic - Thomas Bauer 2013-04-03

Ecotourism and adventure tours offer unique tourism opportunities in the Antarctic! Are you prepared to make the most of them? *Tourism in the Antarctic* analyzes tourism activities in the most remote tourist destination in the world! It establishes visitor profiles; discusses the impacts of tourism on the region; and explores barriers, opportunities, and future directions in Antarctic tourism. The emergence of ecotourism has turned Antarctica into an increasingly popular tourist destination for intrepid travelers. During the 1999/2000 season, approximately 15,000 passengers visited Antarctica by ship. *Tourism in the Antarctic* discusses the new and exciting opportunities for tourism business operators in the region, as well as the ramifications of increased numbers of visitors to this unique environment. In these pages, you will find discussions of issues related to Antarctic tourism including: regulation of the tourism industry under the Antarctic Treaty System, and self-regulation provided by business operators trends and predictions for numbers of visitors to the region tourist attractions that are natural, man-made, spiritual, or scientific in nature wildlife of Antarctica: seals and whales, flying sea birds, penguins, etc. international law as it relates to the region ship-based tourism opportunities from yachts and small expedition-type vessels to very large cruise ships and icebreakers air- and land-based tourism opportunities in the region from private expeditions to overflights an overview of current tourism operations in other remote areas: the Arctic region, the Galapagos Islands, Alaska, New Zealand's Sub-Antarctic Islands, and more The author's observations and experiences during cruises to the Antarctic Peninsula, the sub-Antarctic islands and the Ross Sea, as well as during overflights of Antarctica, are the basis of this unique volume. Generously embellished with charts and tables that make it easy to track activities, opinions, trends, and environmental statistics, this book is an essential reference for anyone teaching, studying, or planning to operate a tourism business in this part of the world.

Ghosts of the Somme - Jonathan Evershed 2018-05-30

Once assumed to be a driver or even cause of conflict, commemoration during Ireland's Decade of Centenaries came to occupy a central place in peacebuilding efforts. The inclusive and cross-communal reorientation of commemoration, particularly of the First World War, has been widely heralded as signifying new forms of reconciliation and a greater "maturity" in relationships between Ireland and the UK and between Unionists and Nationalists in Northern Ireland. In this study, Jonathan Evershed interrogates the particular and implicitly political claims about the nature of history, memory, and commemoration that define and sustain these assertions, and explores some of the hidden and countervailing transcripts that underwrite and disrupt them. Drawing on two years of ethnographic fieldwork conducted in Belfast, Evershed explores Ulster Loyalist commemoration of the Battle of the Somme, its conflicted politics, and its

confrontation with official commemorative discourse and practice during the Decade of Centenaries. He investigates how and why the myriad social, political, cultural, and economic changes that have defined postconflict Northern Ireland have been experienced by Loyalists as a culture war, and how commemoration is the means by which they confront and challenge the perceived erosion of their identity. He reveals the ways in which this brings Loyalists into conflict not only with the politics of Irish Nationalism, but with the "peacebuilding" state and, crucially, with each other. He demonstrates how commemoration works to reproduce the intracommunal conflicts that it claims to have overcome and interrogates its nuanced (and perhaps counterintuitive) function in conflict transformation.

Sustainable Tourism on a Finite Planet - Megan Epler Wood 2017-02-28

This book helps all those involved in international tourism develop the new skills, tools and investments required to protect irreplaceable global resources from the impacts of escalating tourism demand over the next 50 years. It documents how technology and the growing global middle class are driving a travel revolution which requires a new paradigm in managing tourism destinations. Travel and tourism supply chains and business models for hotels, tour operators, cruise lines, airlines and airports are analysed and environmental management techniques are proposed for each sector. A pragmatic set of solutions are offered to support the transition to lower impact tourism development worldwide. It recommends that decision makers assess the current and future value of natural, social, and cultural capital to guide investment in destinations and protect vital resources. Case studies illustrate why budgets to protect local destinations are consistently underestimated and offer guidance on new metrics. Innovative approaches are proposed to support the transition to green infrastructure, protect incomparable landscapes, and engage local people in the monitoring of vital indicators to protect local resources. It provides students, professionals, and policy makers with far-reaching recommendations for new educational programs, professional expertise, financing, and legal frameworks to lower tourism's rapidly escalating carbon impacts and protect the health and well-being of local populations, ecosystems, cultures, and monuments worldwide.

The Negro Motorist Green Book - Victor H. Green

The idea of "The Green Book" is to give the Motorist and Tourist a Guide not only of the Hotels and Tourist Homes in all of the large cities, but other classifications that will be found useful wherever he may be. Also facts and information that the Negro Motorist can use and depend upon. There are thousands of places that the public doesn't know about and aren't listed. Perhaps you know of some? If so send in their names and addresses and the kind of business, so that we might pass it along to the rest of your fellow Motorists. You will find it handy on your travels, whether at home or in some other state, and is up to date. Each year we are compiling new lists as some of these places move, or go out of business and new business places are started giving added employment to members of our race.

The Albergo Diffuso Model - Maurizio Droli 2019-12-02

The hospitality model called "Albergo Diffuso" (AD), or "scattered hotel," has been engineered by Mr Giancarlo Dall'Ara and described by The New York Times as a way of bringing life back to historic towns and rural hamlets by utilizing unused rooms for tourism. This "simple but genial" model devised in Italy in the mid-90's received an award from the UNDP for its sustainability, but despite the spread of AD's, no peer-reviewed books have previously been published in English focusing on this innovation. In this book, the author therefore begins by exploring the AD as a community-based hospitality model, examining both its pros and cons. He then considers conviviality, sense of security, and other factors that Hans Magnus Enzensberger referred to as luxuries of our time for urban dwellers. These represent the key pre-requisites a location must possess to be deemed suitable for this innovation. Next, investors and co-interested private, public and not-for-profit associations are provided with a structured framework to help them achieve a defensible competitive advantage by harnessing the economic potential of valuable, rare, inimitable and non-substitutable (VRIN) resources. The final section assesses the AD as a business model, evaluating various aspects at the heart of any business plan.

The Amusement Park - Jason Wood 2017-01-20

Cyclone, Revolution, Corkscrew; Luna Park, Pleasure Beach, Dreamland – names and places instantly familiar to rollercoaster and amusement park enthusiasts. But what first gave rise to the concept and

nomenclature of the amusement park; how did amusement parks develop in Britain and elsewhere, and what fate awaits historic amusement parks and their rides today? This thought-provoking and timely book brings together leading writers from a variety of disciplines to explore the social history and cultural heritage of the amusement park. Rooted in the British experience but informed by extensive international coverage, it provides a thematic, comparative exploration of the origins, development, decline and significance of the amusement park. The rich set of case studies presented comment on the interrelationships between history, culture and heritage, challenging traditional academic boundaries while offering important contributions to policy-making and regeneration initiatives. The book provides new insights into a neglected aspect of popular culture and will be a valuable resource to students and scholars of history, heritage, tourism, leisure, technology and design.

[Selling British Columbia](#) - Michael Dawson 2007-10-01

Selling British Columbia is an entertaining examination of the development of the tourist industry in British Columbia between 1890 and 1970. Michael Dawson argues that in order to understand the roots of the fully-fledged consumer culture that emerged in Canada after the Second World War, it is necessary to understand the connections between the 1930s, 1940s, and the postwar era. Cultural producers such as tourism promoters and the state infrastructure played important roles in fostering consumer demand, particularly during the Depression, the Second World War, and throughout the postwar era. Dawson draws upon promotional pamphlets, newspapers, advertisements, and films, as well as archival sources regarding government, civic, and international tourism organizations. Central to his book is an examination of the representation of popular imagery and of how aboriginal and British cultures were commodified and marketed to potential tourists. He also looks at the gendered aspect of these promotional campaigns, particularly during the 1940s, and challenges earlier interpretations regarding the relationship between tourism and nature in Canada. Historians have tended to focus on either the first wave of consumerism from the 1880s to the 1920s, or else on the era of economic expansion that followed World War Two. As Dawson shows, the 1930-45 period in particular was an important and dynamic one in the creation of Canadian and British Columbian consumer culture. Michael Dawson's highly readable and engaging account of the development of the British Columbia tourist industry will be welcomed by British Columbian and Canadian historians, as well as other scholars of tourism and consumerism.

[Understanding and Developing Student Engagement](#) - Colin Bryson 2014-03-05

Enhancing the student experience, and in particular student engagement, has become a primary focus of Higher Education. It is in particularly sharp focus as Higher Education moves forward into the uncertain world of high student fees and a developed Higher Education market. Student engagement is a hot topic, in

considering how to offer 'value' and a better student experience. Moreover it is receiving much attention all over the world and underpins so many other priorities such as retention, widening participation and improving student learning generally. Understanding and Developing Student Engagement draws from a range of contributors in a wide variety of roles in Higher Education and all contributors are actively involved in the Researching, Advancing and Inspiring Student Engagement (RAISE) Network. While utilising detailed case examples from UK universities, the authors also provide a critical review and distillation of the differing paradigms of Student Engagement in America, Australasia, South Africa and Europe, drawing upon key research studies and concepts from a variety of contexts. This book uncovers the multi-dimensional nature of student engagement, utilising case examples from both student and staff perspectives, and provides conceptual clarity and strong evidence about this rather elusive notion. It provides a firm foundation from which to discuss practices and policies that might best serve to foster engagement.

Off the Plan - Caryl Bosman 2016-02-01

The Gold Coast is a well-known and loved destination for local and international tourists, a city of surf and sun, pleasure and leisure. However, it is also one of the fastest growing cities in Australia, occupying the largest urban footprint outside the state capitals. How did the Gold Coast come to be what it is today? Off the Plan is the first in-depth, multidisciplinary academic study on the urbanisation and development of the Gold Coast. It addresses the historical circumstances, both accidental and intentional, that led to the Gold Coast's infamous transition from a collection of settlements unburdened by planning regulations or a city centre to become Australia's sixth largest city. With chapters on tourism, environment, media, architecture, governance and politics, planning, transportation, real estate development and demographics, Off the Plan demonstrates the importance that historical analysis has in understanding present-day planning problems and the value of the Gold Coast as a model for the rapidly evolving western city.

Essentials of Sociology - George Ritzer 2015-12-10

Join the conversation with one of sociology's best-known thinkers. *Essentials of Sociology*, Second Edition adapted from George Ritzer's *Introduction to Sociology*, Third Edition, provides the same rock-solid foundation in a shorter and more streamlined format. Like the original Ritzer text, *Essentials of Sociology* illuminates traditional sociological concepts and theories, and focuses on some of the most compelling contemporary social phenomena: globalization, consumer culture, the Internet, and the "McDonaldization" of society. As technology flattens the globe, students are challenged to apply a sociological perspective to their world, and to see how "public" sociologists are engaging with the critical issues of today.

Education, Travel and the 'Civilisation' of the Victorian Working Classes - Michele M. Strong 2014-01-23

Examining four major institutions, Michele Strong considers the experiences of working men and women, particularly artisans, but also young apprentices and clerks, who travelled abroad as participants in an educational reform movement spearheaded by middle-class liberals.

Normalizing Occupation - Marco Allegra 2017-01-09

Essays that analyze the integration and segregation processes that are an integral part of the broader historical trends shaping Israel/Palestine. Controversy surrounds Jewish settlements in the occupied West Bank, and the radical national and religious agendas at play there have come to define the area in the minds of many. This study, however, provides an alternative framework for understanding the process of "normalization" in the life of Jewish residents. Considering a wider range of historical and structural factors in which the colonization of the West Bank developed, it allows placing its origins and everyday reality into a wider perspective. The works collected consider the transformation of the landscape, the patterns of relationships shared by the region's residents, Palestinian and Jewish alike, and the lasting effects of Israel's settlement policy. Stressed in particular are such factors as urban planning, rising inequality and the retreat of the welfare state, and the changing political economy of industry and employment.

Kratsman, David Newman, Amir Paz-Fuchs, Wendy Pullan, Yael Ronen, Erez Tzfadia, Hadas Weiss and Haim Yacobi "The settlements are studied in their full diversity and heterogeneity, shattering a common prejudice to look mainly at the religious-nationalist, ideologically driven among them. The authors show in detail how the colonization project involves communities and agents coming from all sectors of Israeli society." —Ariella Azoulay, author of *Potential History*

[US-China Relations in the Twenty-First Century](#) - Michael Tai 2015-04-24

The relationship between the United States and China will be of critical importance to the world throughout the twenty-first century. In the West China's rise is often portrayed as a threat and China seen in negative terms. This book explores the dynamics of this crucial relationship. It looks in particular at what causes an international relationship to be perceived negatively, and considers what can be done to reverse this, arguing that trust is a key factor. It goes on to discuss US and Chinese rhetoric and behaviour in three key areas - climate change, finance, and international security. The book contends that, contrary to much US rhetoric, China's actions in these areas is often much more flexible and accommodating than the US position, and that the Chinese are much more knowledgeable about, and understanding and appreciative of, the United States than vice versa.

Recent Trends in Social and Behaviour Sciences - Ford Lumban Gaol 2014-02-27

Managing Cultural Heritage - Luca Zan 2016-03-03

Since the 1990s, heritage studies has emerged as a distinct academic field, and practices and rhetoric drawn from mainstream corporate management and strategic planning have become widespread. Based on extensive research, this book is an in-depth investigation of management practices rather than policies, based on a variety of case studies from around the world. The authors take the issue of management in heritage seriously, but also take into account the role of other disciplines within heritage organizations. In particular, they focus on sustainability in terms of financial resources, human resources, knowledge management, and the relationship with the audience and communities of scholars. The book opens with a methodological introduction that discusses what it means to do research on management, and why international comparative research is essential. The body of the text engages issues of heritage and management through five distinct analytical lenses: management and the process of change, institutional settings and business models, change and planning, the Heritage Chain, and the space between policy and practice. Each of these five sections includes a chapter introducing the analytical framework and possible implications, followed by case histories from China, Italy, Malta, Turkey, and Peru. The book ends with a chapter of concluding reflections.

[The Search for Justice](#) - Kumari Jayawardena 2016-11-21

The Sexual Violence and Impunity in South Asia research project (coordinated by Zubaan and supported by the International Development Research Centre) brings together, for the first time in the region, a vast body of knowledge on this important - yet silenced - subject. Six country volumes (one each on Bangladesh, Nepal, Pakistan, Sri Lanka, and two on India, as well as two standalone volumes) comprising over fifty research papers and two book-length studies, detail the histories of sexual violence and look at the

systemic, institutional, societal, individual and community structures that work together to perpetuate impunity for perpetrators. The essays in this volume examine history and contemporary politics to understand the root causes of sexual violence in Sri Lanka. They look at the polarization created around ethnic and linguistic identities during the three-decades of ethnic conflict, but also scrutinize the routine violence of communities towards their own women in daily life. The authors argue that in this transitional post-war phase, Sri Lankan women must not only be treated as victims, but as agents of change. The writers highlight a hitherto unaddressed aspect of sexual violence: that of the structures that enable impunity on the part of perpetrators, be they security personnel and paramilitary forces, members of armed rebel groups, gangs, local politicians and police or ordinary citizens including close family members. They demonstrate how impunity for perpetrators is both a failure of the formal justice process and a product of individual, community and social conditions and indeed the choices that victims and families make that promote silence over truth. At the end of more than a quarter century of conflict that has left some 100,000 dead, 50,000 women-headed households struggling to survive, as well as countless victims and survivors of sexual violence, the calls for justice can no longer be ignored.

[A Depth Psychology Model of Immigration and Adaptation](#) - Phyllis Marie Jensen 2020-06-22

A Depth Psychology Study of Immigration and Adaptation: The Migrant's Journey brings current academic research from a range of disciplines into a 12-stage model of human migration. Based on Joseph Campbell's hero's journey, this depth psychology model addresses pre-migration reasons for leaving, the ordeals of the journey and challenges of post-migration adaptation. One-third of migrants return to homelands while those who remain in newlands face the triple challenges of building a new life, a new identity and sense of belonging. While arrivées carry homelands within, their children, the second generation, born and raised in the newland usually have access to both cultures which enables them to make unique contributions to society. Vital to successful newland adaptation is the acceptance and support of immigrants by host countries. *A Depth Psychology Study of Immigration and Adaptation* will be an important resource for academics and students in the social sciences, clinical psychologists, health care and social welfare workers, therapists of all backgrounds, policy makers and immigrants themselves seeking an understanding of the inner experiences of migration.

[Understanding Young Chinese Backpackers](#) - Jia Xie 2021-07-26

An activity that originated in Western societies, backpacking has gained increasing popularity among Chinese millennials. In a spirit of the 'search for self', young Chinese backpackers have sought to display their pursuit of freedom, independence and responsibility within an increasingly individualised society through backpacking. This volume investigates contemporary young Chinese persons' views on backpacking culture and backpackers. A group of Chinese backpackers are studied using interview and participant observation, and focus groups are conducted to study young professionals' and university students' attitudes towards backpacking. The results indicate a profound cultural change along with a degree of division. On the one hand, the backpackers often begin their journey due to a desire to pursue freedom, and use the pursuit as a process of reflexive awareness; on the other hand, the risks of pursuing a freewheeling lifestyle within an individualised society drive the majority of them to return home. The author concludes that this phenomenon is a kind of 'staged individualism', describing how Chinese millennials strike a balance between individual interests and wider social obligations. Students and scholars of sociology tourism, and youth culture will be interested in this volume.
