[The Ministry of Truth](#) - Dorian Lynskey
2019-06-04

"Rich and compelling. . .Lynskey's account of the reach of 1984 is revelatory." --George Packer, *The Atlantic* An authoritative, wide-ranging, and incredibly timely history of 1984--its literary sources, its composition by Orwell, its deep and lasting effect on the Cold War, and its vast influence throughout world culture at every level, from high to pop. 1984 isn't just a novel; it's a key to understanding the modern world. George Orwell's final work is a treasure chest of ideas and memes--Big Brother, the Thought Police, Doublethink, Newspeak, 2+2=5--that gain potency with every year. Particularly in 2016, when the election of Donald Trump made it a bestseller ("Ministry of Alternative Facts," anyone?). Its influence has morphed endlessly into novels (*The Handmaid's Tale*), films (*Brazil*), television shows (*V for Vendetta*), rock albums (*Diamond Dogs*), commercials (Apple), even reality TV (*Big Brother*). *The Ministry of Truth* is the first book that fully examines the epochal and cultural event that is 1984 in all its aspects: its roots in the utopian and dystopian literature that preceded it; the personal experiences in wartime Great Britain that Orwell drew on as he struggled to finish his masterpiece in his dying days; and the political and

cultural phenomena that the novel ignited at once upon publication and that far from subsiding, have only grown over the decades. It explains how fiction history informs fiction and how fiction explains history.

Plato's Dialogues of Definition - Justin C. Clark
2022-08-22

In each of Plato's "dialogues of definition" (*Euthyphro*, *Laches*, *Meno*, *Charmides*, *Lysis*, *Republic I*, *Hippias Major*), Socrates motivates philosophical discussion by posing a question of the form "What is F-ness?" Yet these dialogues are notorious for coming up empty. Socrates' interlocutors repeatedly fail to deliver satisfactory answers. Thus, the dialogues of definition are often considered negative—empty of any positive philosophical content. Justin C. Clark resists the negative reading, arguing that the dialogues of definition contain positive "Socratic" answers. In order to see the positive theory, however, one must recognize what Clark calls the "dual function" of the "What is F-ness?" question. Socrates is not looking for a single type of answer. Rather, Socrates is looking for two distinct types of answers. The "What is F-ness?" question serves as a springboard for two types of investigation—conceptual and causal. The key to understanding any of the dialogues of definition, therefore, is to decipher

between them. Clark offers a way to do just that, at once resolving interpretive issues in Socratic philosophy, providing systematic interpretations of the negative endings, and generating important new readings of the Charmides and Lysis, whilst casting further doubt on the authenticity of the Hippias Major.

The Political Formulation of Policy Solutions -

Zittoun, Philippe 2021-07-23

In this book, an international group of public policy scholars revisit the stage of formulating policy solutions by investigating the basic political dimensions inherent to this critical phase of the policy process. The book focuses attention on how policy makers craft their policy proposals, match them with public problems, debate their feasibility to build coalitions and dispute their acceptability as serious contenders for government consideration. Based on international case studies, this book is an invitation to examine the uncertain and often indeterminate aspects of policy-making using qualitative analysis embedded in a political perspective.

No Such Thing as Society - Andy McSmith 2010-09-16

The 1980s was the revolutionary decade of the twentieth century. To look back in 1990 at the Britain of ten years earlier was to look into another country. The changes were not superficial, like the revolution in fashion and music that enlivened the 1960s; nor were they quite as unsettling and joyless as the troubles of the 1970s. And yet they were irreversible. By the end of the decade, society as a whole was wealthier, money was easier to borrow, there was less social upheaval, less uncertainty about the future. Perhaps the greatest transformation of the decade was that by 1990, the British lived in a new ideological universe where the defining conflict of the twentieth century,

between capitalism and socialism, was over. Thatcherism took the politics out of politics and created vast differences between rich and poor, but no expectation that the existence of such gross inequalities was a problem that society or government could solve - because as Mrs Thatcher said, 'There is no such thing as society ... people must look to themselves first.' From the Falklands war and the miners' strike to Bobby Sands and the Guildford Four, from Diana and the New Romantics to Live Aid and the 'big bang', from the Rubik's cube to the ZX Spectrum, McSmith's brilliant narrative account uncovers the truth behind the decade that changed Britain forever.

Prosecuting Maritime Piracy - Michael P. Scharf
2015-05-28

This book addresses maritime piracy by focusing on the unique and fascinating issues arising in the course of domestic piracy prosecutions, from the pursuit and apprehension of pirates to their trial and imprisonment. It examines novel matters not addressed in other published works, such as the challenges in preserving and presenting evidence in piracy trials, the rights of pirate defendants, and contending with alleged pirates who are juveniles. A more thorough understanding of modern piracy trials and the precedent they have established is critical to scholars, practitioners, and the broader community interested in counter-piracy efforts, as these prosecutions are likely to be the primary judicial mechanism to contend with pirate activity going forward.

Contemporary Issues in Islamic Social Finance -

Hussain Mohi-ud-Din Qadri 2021-08-11

The development of Islamic banking and finance (IBF) previously centred around three regions of the world: the Middle East, Southeast Asia, and South Asia. However, in recent years, this has expanded, as interest in IBF has gained momentum in Australia, the USA, and Europe, especially in the UK. Several Western market players have established their own Islamic window or

subsidiaries to cater to the need of growing Muslim populations in these regions. This book examines the recent developments in IBF, particularly in the context of Islamic social finance instruments, such as Islamic microfinance, halal education, takaful, mutual funds, and waqf. It covers the religiosity, spirituality, and tawhid index, which promotes social well-being and empowerment. The book is interdisciplinary, and theories, practice, and key issues are presented simultaneously, introducing new ideas and techniques to the IBF community. Moreover, the book examines topics such as innovation in Islamic social finance instruments, advanced techniques of risk mitigation in Islamic capital markets, marketing and the halal industry, and shari'ah-compliant instruments, which are critical to Islamic finance. The book is an essential reference text for academics and research students at the master's and doctorate levels in IBF.

Responsibilisation at the Margins of Welfare

Services - Kirsi Juhila 2016-11-10

The impetus for this book is the shift in welfare policy in Western Europe from state responsibilities to individual and community responsibilities. The book examines the ways in which policies associated with advanced liberalism and New Public Management can be identified as influencing professional practices to promote personalisation, participation, empowerment, recovery and resilience. In examining the concept of 'responsibilisation' from the point of view of both the 'responsibilised client and welfare worker', the book breaks from the traditional literature to demonstrate how responsibilities are negotiated during multi-professional care planning meetings, home visits, staff meetings, focus groups and interviews with different stakeholders. The settings examined in the book can be described as on the 'margins of welfare' - mental health, substance abuse, homelessness services and probation work, where the rights and responsibilities of clients and workers are uncertain and constantly under review. Each chapter approaches the management

of responsibilities from a particular angle by combining responsabilisation theory and discourse analysis to examine everyday encounters. Taken together, the chapters paint a comprehensive picture of the responsabilisation practices at the margins of welfare services and provide an extensive discussion of the implications for policy and practice. Drawing upon both the governmentality literature and everyday encounters, the book provides a broad approach to a key topic. It will therefore be a valuable resource for social policy, public administration, social work and human service researchers and students, and social and health care professionals.

Nineteen Eighty-Four - George Orwell 2021-01-01

The low-ranking party member Winston Smith begins secretly to question the whole system and initiates a forbidden love affair with another party member.

Bankrupt Representation and Party System Collapse

- Jana Morgan 2011-11-23

In recent decades, Bolivia, Colombia, Italy, and Venezuela have all faced the turmoil and democratic crisis of party system collapse. In *Bankrupt Representation and Party System Collapse*, Jana Morgan analyzes the causes of such collapse. She does so through a detailed examination of Venezuela's traumatic party system decay as well as comparative analysis of seven other countries. Collapse occurs when the party system as a whole is unable to provide adequate linkage between society and the state, failing to furnish programmatic representation, integration of major societal interests, or clientelist exchanges. Linkage decays when party systems face challenges that jeopardize their core strategies at the same time that they are constrained in their ability to adapt and to confront these threats. If this decay is unchecked and linkage of all sorts fails, then the bankrupt party system collapses.

The traditional walls between banking, insurance and securities markets are breaking down as a result of deregulation and liberalization of financial services. Advances in Intelligent Tutoring Systems - Roger Nkambou 2010-09-21

May the Forcing Functions be with You: The Stimulating World of AIED and ITS Research It is my pleasure to write the foreword for *Advances in Intelligent Tutoring Systems*. This collection, with contributions from leading researchers in the field of artificial intelligence in education (AIED), constitutes an overview of the many challenging research problems that must be solved in order to build a truly intelligent tutoring system (ITS). The book not only describes some of the approaches and techniques that have been explored to meet these challenges, but also some of the systems that have actually been built and deployed in this effort. As discussed in the Introduction (Chapter 1), the terms

"AIED" and "ITS" are often used interchangeably, and there is a large overlap in the researchers devoted to exploring this common field. In this foreword, I will use the term "AIED" to refer to the search area, and the term "ITS" to refer to the particular kind of system that AIED researchers build. It has often been said that AIED is "AI-complete" in that to produce a tutoring system as sophisticated and effective as a human tutor requires solving the entire gamut of artificial intelligence research (AI) problems.

Design Thinking Research - Christoph Meinel

2021-03-26
Extensive research conducted by the Hasso Plattner Design Thinking Research Program at Stanford University in Palo Alto, California, USA, and the Hasso Plattner Institute in Potsdam, Germany, has yielded valuable insights on why and how design thinking works. The participating researchers have identified metrics, developed models, and conducted studies, which are featured in this book, and in the previous volumes of this series. This volume provides readers with tools to bridge the gap between research and practice in design thinking with varied real world examples. Several different

approaches to design thinking are presented in this volume. Acquired frameworks are leveraged to understand design thinking team dynamics. The contributing authors lead the reader through new approaches and application fields and show that design thinking can tap the potential of digital technologies in a human-centered way. In a final section, new ideas in neurodesign at Stanford University and at Hasso Plattner Institute in Potsdam are elaborated upon thereby challenging the reader to consider newly developed methodologies and provide discussion of how these insights can be applied to various sectors. Special emphasis is placed on understanding the mechanisms underlying design thinking at the individual and team levels. Design thinking can be learned. It has a methodology that can be observed across multiple settings and accordingly, the reader can adopt new frameworks to modify and update existing practice. The research outcomes compiled in this book are intended to inform and provide inspiration for all those seeking to drive innovation – be they experienced design thinkers or newcomers.
