Fengshui in China - Ole Bruun 2003-03-31

For well over a century, Chinese fengshui, or "geomancy," has interested Western laymen and scholars. Today, hundreds of popular manuals claim to use its principles in their advice on how people can increase their wealth, happiness, longevity, and so on. This study is quite different, approaching fengshui from an academic angle. The focus is on its significance in China, but the recent history of its reinterpretation in the West is also depicted. The author argues that fengshui serves as an alternative tradition of cosmological knowledge, which is used to explain a range of everyday occurrences in rural areas, such as disease, mental disorders, accidents, and common mischief. The study includes a historical account of fengshui over the last 150 years augmented by the results of anthropological fieldwork on contemporary practices in two Chinese rural areas.

The sudden disintegration of Yugoslavia from 1992 to 1995 led to a series of violent armed ethnic conflicts that resulted in the deaths of more than a quarter-million civilians and almost 1.5 million refugees. Although NATO forces were able to end these conflicts and bring stability to most of the region, a brief flare-up occurred in 1998-99 in the autonomous province of Kosovo, which was part of Serbia. After a sustained bombing campaign against the Serbian aggressors, the United States Army entered the troubled province and eventually enforced a tenuous peace between the Kosovars and Serbs. This brief study chronicles the origins of U.S.

involvement and the peace enforcement operation that followed through 2005. Military leaders, peace negotiators, military science, AP high school global studies students, and international relations students may find this resource helpful for research papers. Historians, especially military historians and political scientists may also be interested in this work.

WHO Guidelines on Hand Hygiene in Health Care - World Health Organization 2009

The WHO Guidelines on Hand Hygiene in Health Care provide health-care workers (HCWs), hospital administrators and health authorities with a thorough review of evidence on hand hygiene in health care and specific recommendations to improve practices and reduce transmission of pathogenic microorganisms to patients and HCWs. The present Guidelines are intended to be implemented in any situation in which health care is delivered either to a patient or to a specific group in a population. Therefore, this concept applies to all settings where health care is permanently or occasionally performed, such as home care by birth attendants. Definitions of health-care settings are proposed in Appendix 1. These Guidelines and the associated WHO Multimodal Hand Hygiene Improvement Strategy and an Implementation Toolkit (<http://www.who.int/gpsc/en/>) are designed to offer health-care facilities in Member States a conceptual framework and practical tools for the application of recommendations in practice at the bedside. While ensuring

consistency with the Guidelines recommendations, individual adaptation according to local regulations, settings, needs, and resources is desirable. This extensive review includes in one document sufficient technical information to support training materials and help plan implementation strategies. The document comprises six parts.

The Third Wave - Samuel P. Huntington 2012-09-06

Between 1974 and 1990 more than thirty countries in southern Europe, Latin America, East Asia, and Eastern Europe shifted from authoritarian to democratic systems of government. This global democratic revolution is probably the most important political trend in the late twentieth century. In *The Third Wave*, Samuel P. Huntington analyzes the causes and nature of these democratic transitions, evaluates the prospects for stability of the new democracies, and explores the possibility of more countries becoming democratic. The recent transitions, he argues, are the third major wave of democratization in the modern world. Each of the two previous waves was followed by a reverse wave in which some countries shifted back to authoritarian government. Using concrete examples, empirical evidence, and insightful analysis, Huntington provides neither a theory nor a history of the third wave, but an explanation of why and how it occurred. Factors responsible for the democratic trend include the legitimacy dilemmas of authoritarian regimes; economic and social development; the changed role of the Catholic Church; the impact of the United States, the European Community, and the Soviet Union; and the "snowballing" phenomenon: change in one country stimulating change in others. Five key elite groups within and outside the nondemocratic regime played roles in shaping the various ways democratization occurred. Compromise was key to all democratizations, and elections and nonviolent tactics also were central. New democracies must deal with the "torturer problem" and the "praetorian problem" and attempt to develop democratic values and processes. Disillusionment with democracy, Huntington argues, is necessary to consolidating democracy. He concludes the book with an analysis of the political, economic, and cultural factors that will decide whether or not the third wave continues. Several "Guidelines for Democratizers" offer specific, practical suggestions for initiating and carrying out reform. Huntington's emphasis on practical application makes this book a valuable tool for anyone engaged in the democratization process. At this volatile time in history, Huntington's assessment of the processes of democratization is indispensable to understanding the future of democracy in the world.

Inside My Mother - Ali Cobby Eckermann 2015-07-01

'...an outstanding achievement that will, with its skill and elegance, deeply enrich Australian poetry and whoever reads it.' Judges' citation, 2013 NSW Premier's Literary Award for Poetry. Ali Cobby Eckermann, a Yankunytjatjara/Kokatha poet, is at the forefront of Australian Indigenous poetry. *Inside My Mother* is both a political and personal collection, angry and tender, propelled by the need to remember, yet brimming with energy and vitality – qualities that distinguished her previous, prize-winning verse novel, *Ruby Moonlight*. Tributes to country, to her elders, and to the animals and spirits that inhabit the landscape, coupled with the rhythms of mourning and celebration that pulse through the poems, make this a moving and personal collection. Grief is deeply felt and vividly portrayed in poems such as 'Inside My Mother' and 'Lament'. There is defiance and protest in 'Clapsticks' and 'I Tell You True'. In the final section there is a marked generational shift as the elders begin to pass away and the poet as grandmother comes to accept her rightful place as matriarch.

Global Perspectives on Higher Education - Philip G. Altbach 2016-04

The single best book on higher education as a global phenomenon. Over the past half-century, globalization has had a profound impact on postsecondary education. The twin forces of mass higher education and the global knowledge economy have driven an unprecedented transformation. These fundamental changes have pulled in opposite directions: one pushes for wider access and accompanying challenges of quality, the other toward exclusive, "world class" research-oriented universities. In *Global Perspectives on Higher Education*, renowned higher education scholar Philip G. Altbach offers a wide-ranging perspective on the implications of these key forces and explores how they influence academe everywhere. Altbach begins with a discussion of the global trends that increasingly affect higher education, including the implications of mass enrollments, the logic of mass higher education systems around the world, and specific challenges facing Brazil, Russia, India, and China. He considers the numerous implications of globalization, including the worldwide use of the English language, university cross-border initiatives, the role of research universities in developing countries, the impact of the West on Asian universities, and the expansion of private higher education. Provocative and wide-ranging, *Global Perspectives on Higher Education* considers how the international exchange of ideas, students, and scholars has fundamentally altered higher education.

Shafana and Aunt Sarrinah - Alana Valentine 2010

What do you do when you profoundly disagree with someone you love? Wearing a hijab is a touchstone of religious identity, but it is also imbued with a complex array of historical and contemporary meanings. In Alana Valentine's new play, the cultural meaning of the hijab has become a wedge between generations. At the heart of *Shafana and Aunt Sarrinah* is the relationship between an aunt and her niece. Both devout Muslims, the younger woman wants to put on a headscarf, the older woman tries to dissuade her. For Aunt Sarrinah, the hijab represents a world from which she has escaped; for her niece, Shafana, it is a personal statement of renewed faith. Alana Valentine has written a startling meditation on the clash between individual freedom and community reaction and, as academic Christina Ho acclaims, "a quietly insightful intervention that

portrays what media headlines never can; the multiple meanings of the headscarf for Muslim women". (1 act, 2 female).

A Crucible Moment - National Task Force on Civic Learning and Democratic Engagement 2012

This report from the National Task Force on Civic Learning and Democratic Engagement calls on the nation to reclaim higher education's civic mission. Commissioned by the Department of Education and released at a White House convening in January 2012, the report pushes back against a prevailing national dialogue that limits the mission of higher education to workforce preparation and training while marginalizing disciplines basic to democracy. It calls on educators and public leaders to

advance a 21st century vision of college learning for all students, a vision with civic learning and democratic engagement an expected part of every student's college education. The report documents the nation's anemic civic health and includes recommendations for action that address campus culture, general education, and civic inquiry as part of major and career fields as well as hands on civic problem solving across differences. This report was prepared at the invitation of the U.S. Department of Education under the leadership of the Global Perspective Institute, Inc. (GPI) and AAC&U. It was developed with input from a series of national roundtables involving leaders from all parts of the higher education and civic renewal communities.
