**Parenting Matters** - National Academies of Sciences, Engineering, and Medicine 2016-11-21  
Decades of research have demonstrated that the parent-child dyad and the environment of the familyâ€"which includes all primary

caregiversâ€"are at the foundation of children's well-being and healthy development. From birth, children are learning and rely on parents and the other caregivers in their lives to protect and care for them. The impact of parents may never be

greater than during the earliest years of life, when a child's brain is rapidly developing and when nearly all of her or his experiences are created and shaped by parents and the family environment. Parents help children build and refine their knowledge and skills, charting a trajectory for their health and well-being during childhood and beyond. The experience of parenting also impacts parents themselves. For instance, parenting can enrich and give focus to parents' lives; generate stress or calm; and create any number of emotions, including feelings of happiness, sadness, fulfillment, and anger. Parenting of young children today takes place in the context of significant ongoing developments. These include: a rapidly growing body of science on early childhood, increases in funding for programs and services for families, changing demographics of the U.S. population, and greater diversity of family structure. Additionally, parenting is increasingly being shaped by technology and increased access to

information about parenting. Parenting Matters identifies parenting knowledge, attitudes, and practices associated with positive developmental outcomes in children ages 0-8; universal/preventive and targeted strategies used in a variety of settings that have been effective with parents of young children and that support the identified knowledge, attitudes, and practices; and barriers to and facilitators for parents' use of practices that lead to healthy child outcomes as well as their participation in effective programs and services. This report makes recommendations directed at an array of stakeholders, for promoting the wide-scale adoption of effective programs and services for parents and on areas that warrant further research to inform policy and practice. It is meant to serve as a roadmap for the future of parenting policy, research, and practice in the United States.

**How People Learn II** - National Academies of Sciences, Engineering, and Medicine 2018-09-27

There are many reasons to be curious about the way people learn, and the past several decades have seen an explosion of research that has

important implications for individual learning, schooling, workforce training, and policy. In 2000, *How People Learn: Brain, Mind, Experience, and School: Expanded Edition* was published and its influence has been wide and deep. The report summarized insights on the nature of learning in school-aged children; described principles for the design of effective learning environments; and provided examples of how that could be implemented in the classroom. Since then, researchers have continued to investigate the nature of learning and have generated new findings related to the neurological processes involved in learning, individual and cultural variability related to learning, and educational technologies. In addition to expanding scientific understanding of the mechanisms of learning and how the brain adapts throughout the lifespan, there have been important discoveries about influences on learning, particularly sociocultural factors and the structure of learning environments. *How People Learn II: Learners,*

Contexts, and Cultures provides a much-needed update incorporating insights gained from this research over the past decade. The book expands on the foundation laid out in the 2000 report and takes an in-depth look at the constellation of influences that affect individual learning. How People Learn II will become an indispensable resource to understand learning throughout the lifespan for educators of students and adults.

**Contours of South Asian Social Anthropology** - Swatahsiddha Sarkar

2022-04-29

This book presents a conceptual and methodological framework to understand South Asia by engaging with the practices of sociology and social anthropology in India and Nepal. It provides a new imagination of South Asia by connecting historical, political, religious, and cultural divides of the region. Drawing from the experiences of Indian and Nepali social anthropology, the book discusses the presence of Nepal studies in Indian social anthropology and vice versa. It highlights Nepal or South Asia as a subject for social anthropological research and stresses on pluriversal knowledge production through regional scholarship, dialogic social anthropology, South Asian episteme, post-Western social anthropology and the

decolonisation of disciplines. In exploring the themes and problems of doing social anthropology in Nepal by Indian scholars, the book assesses the scope of developing the South Asian social anthropological worldview. It explains why social anthropological and sociological inquiry in India has failed to surpass its focus beyond the territorial limits of the nation-state. The book examines the issues of methodological nationalism and social anthropological research tradition in South Asia. By using the Saidian framework of traveling theory and Bhabra's idea of connected sociologies, it shows how social anthropology can develop disciplinary crossroads within South Asia. This book will be of interest to students, teachers and researchers of South Asian studies, anthropology, sociology, social anthropology, South Asian sociology, cultural anthropology, social psychology, area studies, cultural studies, Nepal studies, and Global South studies.

**Beyond Recidivism** - Andrea Leverentz  
2020-05-05

Understanding reentry experiences after incarceration Prison in the United States often has a revolving door, with droves of formerly incarcerated people ultimately finding themselves behind bars again. In *Beyond Recidivism*, Andrea Leverentz, Elsa Y. Chen, and Johnna Christian bring together a leading group of interdisciplinary scholars to examine this phenomenon using several approaches to research on recently released prisoners returning to their lives. They focus on the social context of reentry and look at the stories returning prisoners tell, including such key issues as when they choose to reveal (or not) their criminal histories. Drawing on contemporary studies, contributors examine the best ideas that have emerged over the last decade to understanding

the challenges prisoners face upon reentering society. Together, they present a complete picture of prisoner reentry, including real-world recommendations for policies to ensure the well-being of returning prisoners, regardless of their past mistakes.

*Corporate Branding* - T C Melewar 2015-04-10

A strong corporate image has power in a competitive marketplace. Its influence on reputational value and customer decision-making is only now beginning to be understood. Interest in corporate branding is exploding as marketing academics and professionals begin to realize how it can boost business performance in measurable ways. For example, it promotes customer patronage without expensive advertising and raises profitability by enabling companies to leverage their brand image when buying from

particular sources. Yet there are few empirical studies available to clarify its basic tenets and fewer still that help us understand corporate branding in different parts of the world. Existing books focus mainly on conceptual ideas and real-life examples. *Corporate Branding: Areas, arenas and approaches* is a unique take on corporate branding that provides a global overview through rigorous research of different geographical areas across industries. An international range of leading scholars contribute their coverage across three clear themes: Area: geographical areas across the globe including the UK, USA, Europe and Asia; Arena: a variety of commercial and not-for-profit sectors, both B2B and B2C; Approach: methodological approaches to brand research design, including qualitative, quantitative, case studies, interpretivistic and social narrative. These three themes enable the reader to consider corporate branding from more perspectives and in more ways than any other corporate branding book. The result is an

understanding of this strategically important, growing subject that cannot be found anywhere else. This book is an essential read for any branding student or interested professional.

**Occupational Therapies Without Borders E-Book** - Dikaios Sakellariou 2016-09-23

The new edition of this landmark international work builds on the previous two volumes, offering a window onto occupational therapy practice, theory and ideas in different cultures and geographies. It emphasizes the importance of critically deconstructing and engaging with the broader context of occupation, particularly around how occupational injustices are shaped through political, economic and historical factors. Centering on the wider social and political aspects of occupation and occupation-based practices, this textbook aims to inspire occupational therapy students and practitioners to include transformational elements into their practice. It also illustrates how occupational therapists from all over the world can affect

positive changes by engaging with political and historical contexts. Divided into six sections, the new edition begins by analyzing the key concepts outlined throughout, along with an overview on the importance and practicalities of monitoring and evaluation in community projects. Section Two explores occupation and justice emphasizing that issues of occupational injustice are present everywhere, in different forms: from clinical settings to community-based rehabilitation. Section Three covers the enactment of different Occupational Therapies with a focus on the multiplicity of occupational therapy from the intimately personal to the broadly political. Section Four engages with the broader context of occupational therapy from the political to the financial. The chapters in this section highlight the recent financial crisis and the impact it has had on people's everyday life. Section Five collects a range of different approaches to working to enable a notion of occupational justice. Featuring chapters from across the globe,

Section Six concludes by highlighting the importance and diversity of educational practices. Comprehensively covers occupational therapy theory, methodology and practice examples related to working with underserved and neglected populations Gives a truly global overview with contributions from over 100 international leading experts in the field and across a range of geographical, political and linguistic contexts Demonstrates how occupational injustices are shaped through political, economic and historical factors Advocates participatory approaches which work for those who experience inequalities Includes a complete set of new chapters Explores neoliberalism and financial contexts, and their impact on occupation Examines the concept of disability Discusses theoretical and practical approaches to occupational justice

**National Standards & Grade-Level Outcomes for K-12 Physical Education** - SHAPE America - Society of Health and Physical Educators 2014-03-13

Focused on physical literacy and measurable outcomes, empowering physical educators to help students meet the Common Core standards, and coming from a recently renamed but longstanding organization intent on shaping a standard of excellence in physical education,

National Standards & Grade-Level Outcomes for K-12 Physical Education is all that and much more. Created by SHAPE America — Society of Health and Physical Educators (formerly AAHPERD) — this text unveils the new National Standards for K-12 Physical Education. The standards and text have been retooled to support students' holistic development. This is the third iteration of the National Standards for K-12 Physical Education, and this latest version features two prominent changes: •The term physical literacy underpins the standards. It encompasses the three domains of physical education (psychomotor, cognitive, and affective) and considers not only physical competence and knowledge but also attitudes, motivation, and the social and psychological skills needed for participation. • Grade-level outcomes support the national physical education standards. These measurable outcomes are organized by level (elementary, middle, and high school) and by standard. They provide a bridge between the

new standards and K-12 physical education curriculum development and make it easy for teachers to assess and track student progress across grades, resulting in physically literate students. In developing the grade-level outcomes, the authors focus on motor skill competency, student engagement and intrinsic motivation, instructional climate, gender differences, lifetime activity approach, and physical activity. All outcomes are written to align with the standards and with the intent of fostering lifelong physical activity. National Standards & Grade-Level Outcomes for K-12 Physical Education presents the standards and outcomes in ways that will help preservice teachers and current practitioners plan curricula, units, lessons, and tasks. The text also • empowers physical educators to help students meet the Common Core standards; • allows teachers to see the new standards and the scope and sequence for outcomes for all grade levels at a glance in a colorful, easy-to-read format; and •

provides administrators, parents, and policy makers with a framework for understanding what students should know and be able to do as a result of their physical education instruction. The result is a text that teachers can confidently use in creating and enhancing high-quality programs that prepare students to be physically literate and active their whole lives.

Communities in Action - National Academies of Sciences, Engineering, and Medicine 2017-04-27 In the United States, some populations suffer from far greater disparities in health than others. Those disparities are caused not only by fundamental differences in health status across segments of the population, but also because of inequities in factors that impact health status, so-called determinants of health. Only part of an individual's health status depends on his or her

behavior and choice; community-wide problems like poverty, unemployment, poor education, inadequate housing, poor public transportation, interpersonal violence, and decaying neighborhoods also contribute to health inequities, as well as the historic and ongoing interplay of structures, policies, and norms that shape lives. When these factors are not optimal in a community, it does not mean they are intractable: such inequities can be mitigated by social policies that can shape health in powerful ways. *Communities in Action: Pathways to Health Equity* seeks to delineate the causes of and the solutions to health inequities in the United States. This report focuses on what communities can do to promote health equity, what actions are needed by the many and varied stakeholders that are part of communities or support them, as well as the root causes and structural barriers that need to be overcome.

**Older People: Improving Health and Social Care** - Bea L. Dijkman 2018-11-11

This contributed volume is based on the "European Core Competences Framework for health and social care professionals working with older people" (ECCF), developed and verified in a unique international cooperation between 26 universities and universities of applied sciences in 25 European countries, part of the European Later Life Active Network (ELLAN). In addition to the framework, the book outlines the necessary qualifications and describes the roles of professionals working with older people in health and social services. It explores healthy ageing for older people from different perspectives and describes the seven roles of health and social care professionals (Expert, Communicator, Collaborator, Organizer, Health and Welfare Advocate, Scholar, and Professional), before

going on to define 18 related competences and elaborating them in performance indicators. Beyond the ECCF, the book explains the widely used CanMED role model and puts forward theories to support a client centered and integrated approach on health and social care in order to change attitudes toward older clients and offer better care and support. It also provides health and social care professionals, for example nurses, allied health professionals and social workers with new contextual information and cultural awareness. It gives a voice to students by addressing selected perspectives for professional development. The book includes questions for reflective learning helping to make the book a vital practical instrument for use in the educational context throughout Europe. Europe's ageing populations represent a major challenge for both public health and social care systems. 18% of the population is 65 years old and over, and this proportion will increase in the coming years. As a result, more and more health

and social care professionals will work with older people in different settings – at home, in the community, in hospitals or in long-term care settings. Older people, and especially the frail, face a host of interrelated issues, e.g. cognitive restrictions, functional restrictions, psychosocial problems, multimorbidity, polypharmacy and social isolation. These problems call for an integrated approach to health and social care, which this book supplies. It is intended for health and social care professionals, students and educators, for a better understanding of Europe's ageing society and of the impact on care and services. Furthermore, the ECCF offers educational institutes a unique resource for curriculum development, education, training and assessment.

Islam, Marketing and Consumption - Aliakbar

Jafari 2016-01-13

In recent years, a critically oriented sub-stream of research on Muslim consumers and businesses has begun to emerge. This scholarship, located both within and outside the marketing field, adopts a socio-culturally situated approach to Islam and investigates the complex and multifaceted intersections between Islam and markets. This book seeks to reflect various unheard and emerging critical voices from within the Muslim world, and provide a series of critical insights on how, if and why Islam matters to marketing theory and practice. It questions the existing assumptions and polarising discussions which underpin the portrayal of Islam as the 'other' of Modernity, while acknowledging that Muslims themselves are partially responsible for creating stereotyped representations of Islam and 'the Muslim'. This wide-ranging and insightful collection will advance emerging critical perspectives, and provide new insights that will influence the generation and application of

knowledge in the context of Muslim societies. It will open up fresh conversations for scholars in marketing as well as the broader humanities and social sciences.

Historical Thinking for History Teachers - Tim Allender 2020-07-16

Effective Australian history education has never been more important for the development of critically aware and thoughtful young people. History fosters important skills in reasoning,

historical consciousness and empathy; and an appreciation of history is crucial to the development of students' understanding of the very nature of our society. This edited collection comprises contributions from leading historians, educators and practising teachers, and surveys Australian history teaching today, from the development of the national curriculum to fostering historical thinking and promoting effective engagement in the history classroom. The book begins with an analysis of the principles underlying the drafting of the national curriculum and features insights from the writers of the curriculum themselves. It focuses on the curriculum from primary- and secondary-school teaching perspectives. Part 2 examines the teaching of historical expertise including historical thinking and value formation, as well as productive assessment and the important role social history can play in the classroom. Part 3 concentrates on specific approaches to history teaching including teacher talk; the use of

historical fiction and film; digital technology and the internet; as well as museums as a teaching medium. Part 4 analyses key aspects of Australian history teaching including Indigenous perspectives, teaching citizenship and assisting the pre-service teacher in their transition to becoming a professional. Rich with insights into historical skills, historical concepts and critical thinking, as well as practical guidance on translating principles into engaging classroom approaches, this is an essential reference for both pre-service and in-service history teachers and educators.

**Cliometrics of the Family** - Claude Diebolt  
2019-01-31

This contributed volume applies cliometric methods to the study of family and households in order to derive global patterns and determine their impact on economic development. Family and households are a fundamental feature of societies and economies. They are found throughout history and are the place where key decisions on fertility, labour force participation, education, consumption are made. This is especially relevant for the position of women. The book gathers key insights from a variety of fields – economics, history, demography, anthropology, biology – to shed light on the relation between family organisation and the long-term process of economic development.

Microaggressions in Everyday Life - Derald Wing Sue  
2020-03-31

The essential, authoritative guide to microaggressions, revised and updated The revised and updated second edition of

Microaggressions in Everyday Life presents an introduction to the concept of microaggressions, classifies the various types of microaggressions, and offers solutions for ending microaggressions at the individual, group, and community levels. The authors—noted experts on the topic—explore the psychological effects of microaggressions on both perpetrators and targets. Subtle racism, sexism, and heterosexism remain relatively invisible and potentially harmful to the wellbeing, self-esteem, and standard of living of many marginalized groups in society. The book examines the manifestations of various forms of microaggressions and explores their impact. The text covers: researching microaggressions, exploring microaggressions in education, identifying best practices teaching about microaggressions, understanding microaggressions in the counseling setting, as well as guidelines for combating microaggressions. Each chapter concludes with a section called "The Way Forward" that provides

guidelines, strategies, and interventions designed to help make our society free of microaggressions. This important book: Offers an updated edition of the seminal work on microaggressions Distinguishes between microaggressions and macroaggressions Includes new information on social media as a key site where microaggressions occur Presents updated qualitative and quantitative findings Introduces the concept of microinterventions Contains new coverage throughout the text with fresh examples and new research findings from a wide range of studies Written for students, faculty, and practitioners of psychology, education, social work, and related disciplines, the revised edition of *Microaggressions in Everyday Life* illustrates the impact microaggressions have on both targets and perpetrators and offers suggestions to eradicate microaggressions.

*The Living Environmental Education* - Wei-Ta Fang 2022-09-29

This open access book is designed and written to

bridge the gap on the critical issues identified in environmental education programs in Asian countries. The world and its environments are changing rapidly, and the public may have difficulty keeping up and understanding how these changes will affect our way of life. The authors discuss various topics and case studies from an Asian perspective, but the content, messaging, and lessons learned need not be limited to Asian cultures. Each chapter provides a summary of the intensive research that has been performed on pro-environmental behaviors, the experience of people working in industry and at home, and their philosophies that guide them in their daily lives. We highlight humanity's potential to contribute to Sustainable Development Goals (SDGs) by understanding better the environmental psychology, social inclusion, and environmental sustainability and stewardship protection elements that contribute to responsible environmental citizenship. The content of the chapters in this book includes a

discussion of the crucial issues, plans, and evaluations for sustainability theories, practices, and actions with a proposed management structure for maximizing the cultural, social, and ecological diversity of Asian experiences compared to other theories and cultures internationally. We intend that the data in this book will provide a comprehensive guide for students, professors, practitioners, and entrepreneurs of environmental education and its related disciplines using case studies that demonstrate the relationship between the social and behavioral sciences and environmental leadership and sustainability.

### **Transforming Understandings of Diversity in Higher Education** - Penny A. Pasque

2016-09-30

This exciting new text examines one of the most important and yet elusive terms in higher education and society: What do we mean when we talk in a serious way about "diversity"? A distinguished group of diversity scholars explore

the latest discourse on diversity and how it is reflected in research and practice. The chapters trace how the discourse on diversity is newly shaped after many of the 20th century concepts of race, ethnicity, gender and class have lost authority. In the academic disciplines and in public discourse, perspectives about diversity have been rapidly shifting in recent years. This is especially true in the United States where demographic changes and political attitudes have prompted new observations—some which will clash with traditional frameworks. This text brings together 9 scholars whose research has opened up new ways to understand the complexities of diversity in higher education. Because the essential topic under consideration is changing so quickly, the editors of this volume also have asked the contributors to reflect on the paths their own scholarship has taken in their careers, and to see how they would relate their current conceptualization of diversity to one or more of three identified themes (demography,

democracy and discourse). Each chapter ends with a candid graduate student interview of the author that provides an engaged picture of how the authors wrestle with one of the most complicated topics shaping them (and all of us) as individuals and as scholars. Of interest to anyone who is following the debates about diversity issues on our campuses, the book also offers a wonderful introduction to graduate students entering a discipline where critically important ideas are still very much alive for discussion. *Capturing Social and Behavioral Domains and Measures in Electronic Health Records* - Institute of Medicine 2015-01-08

Determinants of health - like physical activity levels and living conditions - have traditionally been the concern of public health and have not been linked closely to clinical practice. However, if standardized social and behavioral data can be incorporated into patient electronic health records (EHRs), those data can provide crucial information about factors that influence health and the effectiveness of treatment. Such information is useful for diagnosis, treatment choices, policy, health care system design, and innovations to improve health outcomes and reduce health care costs. *Capturing Social and Behavioral Domains and Measures in Electronic Health Records: Phase 2* identifies domains and measures that capture the social determinants of health to inform the development of recommendations for the meaningful use of EHRs. This report is the second part of a two-part

study. The Phase 1 report identified 17 domains for inclusion in EHRs. This report pinpoints 12 measures related to 11 of the initial domains and considers the implications of incorporating them into all EHRs. This book includes three chapters from the Phase 1 report in addition to the new Phase 2 material. Standardized use of EHRs that include social and behavioral domains could provide better patient care, improve population health, and enable more informative research. The recommendations of *Capturing Social and Behavioral Domains and Measures in Electronic Health Records: Phase 2* will provide valuable information on which to base problem identification, clinical diagnoses, patient treatment, outcomes assessment, and population health measurement.

**Teaching Psychology Online** - Kelly S. Neff  
2013-01-03

Intended as a resource for psychology educators ranging from teaching assistants to experienced faculty, this book shows readers how to

effectively create and manage an online psychology course. Guidelines for preparing courses, facilitating communication, and assigning grades are provided along with activities and assessments geared specifically towards psychology. Pedagogical theories and research are fused with the authors' teaching experiences to help maximize the reader's abilities as an online psychology instructor. The book focuses on psychology education at the undergraduate level but it also includes material appropriate for graduate students and professionals. Readers will find helpful examples from all the major content areas including introductory, social, developmental, biological, abnormal, and positive psychology, and human sexuality. Every chapter is organized around 3 sections. The Purpose part introduces the key concepts, theory, and research. The Implementation section reviews the 'nuts and bolts' of online teaching, and the Troubleshooting section addresses key problems and potential

solutions. 'Text boxes' highlight important tips. The website <http://www.TeachingPsychologyOnline.com> provides additional tips, links to related articles and other resources, and examples of online psychology assignments from across the discipline. The book addresses: launching your online course; enhancing student/instructor communication; modes of multimedia and how to integrate them into your course including lecture videos, podcasting, blogging, wikis, and social networking sites; creating activities for online courses; assessment and grading; and online education trend including doctoral level education. Ideal for instructors teaching ANY psychology course, from introductory to upper-level undergraduate to graduate courses, this text can be used for developing on line courses in applied areas such as counseling, health, and industrial psychology as well as for courses in social, cognitive, and developmental psychology. Instructors of any technical skill level can use this

book, including those familiar with Blackboard to those who are just getting started. Whether you are a seasoned pro or new to teaching psychology online, the tips in this book can help improve your instruction, reduce your prep time, and enhance your students' success.

**Psychological Assessment in South Africa** - Sumaya Laher 2013-01-01

This book provides an overview of the research related to psychological assessment across South Africa. The thirty-six chapters provide a combination of psychometric theory and practical assessment applications in order to combine the currently disparate research that has been conducted locally in this field. Existing South African texts on psychological assessment are predominantly academic textbooks that explain psychometric theory and provide brief descriptions of a few testing instruments. *Psychological Assessment in South Africa* provides in-depth coverage of a range of areas within the broad field of psychological

assessment, including research conducted with various psychological instruments. The chapters critically interrogate the current Eurocentric and Western cultural hegemonic practices that dominate the field of psychological assessment. The book therefore has the potential to function both as an academic text for graduate students, as well as a specialist resource for professionals, including psychologists, psychometrists, remedial teachers and human resource practitioners.

**Model Rules of Professional Conduct** - American Bar Association. House of Delegates 2007

The Model Rules of Professional Conduct provides an up-to-date resource for information on legal ethics. Federal, state and local courts in all jurisdictions look to the Rules for guidance in solving lawyer malpractice cases, disciplinary actions, disqualification issues, sanctions questions and much more. In this volume, black-letter Rules of Professional Conduct are followed by numbered Comments that explain each Rule's

purpose and provide suggestions for its practical application. The Rules will help you identify proper conduct in a variety of given situations, review those instances where discretionary action is possible, and define the nature of the relationship between you and your clients, colleagues and the courts.

*On Course, Study Skills Plus Edition* - Skip Downing 2013-01-01

ON COURSE: STRATEGIES FOR CREATING SUCCESS IN COLLEGE AND IN LIFE, STUDY SKILLS PLUS EDITION was created for educators who would like to promote student growth and self-awareness, while providing more extensive instruction in study skills. Downing's powerful guided journal entries have been retained from the original ON COURSE text to encourage students to explore essential life skills such as personal responsibility, self-motivation, interdependence, and self-esteem. The Study Skills Plus Edition engages students in a learner-centered construction of study skills knowledge,

and gives students practice in applying empowerment strategies. The 2nd edition highlights the very process of learning how to solve academic challenges with improved study skills. Students engage in critical and creative problem solving that will enable them to achieve greater success in all parts of their lives. The 2nd edition also features expanded coverage of diversity, emphasizing the many ways in which people are different and how these differences often influence the choices they make. Other new topics include a discussion of academic integrity, how to thrive in the college culture, and a research-based section on the importance of developing a growth mindset. Plus, a new Annotated Instructors Edition guides instructors to relevant exercises and materials in the ON COURSE FACILITATOR'S MANUAL. *Creating Engaging Discussions* - Jennifer H. Herman 2018

If you have ever been apprehensive about initiating classroom discussion, fearing silences, the domination of a couple of speakers, superficial contributions, or off-topic remarks, this book provides strategies for creating a positive learning experience. Jennifer H. Herman and Linda B. Nilson demonstrate how to create the conditions to facilitate deep and meaningful learning as well as to assess the effectiveness of discussions. They identify, analyze, and solve common problems in both classroom and online discussions and in both small and large classes. They take a direct, practice-oriented approach that--in acknowledging common challenges--provides principles, guidance on design, examples of activities and techniques, and eight detailed case studies. These cases demonstrate successful approaches that faculty across disciplines and from a variety of institutions have

adopted in their face-to-face, blended, or online courses at the undergraduate or graduate level. The case authors begin by describing the original pedagogical challenge they faced and explain how they addressed it and assessed the results of their innovation. They also offer practical recommendations to readers who may want to try their strategies. Intended for faculty, this book will be equally valuable for educational developers who can use this resource in their programs and private consultations. At the graduate level, this book can serve as a text or workshop resource in college teaching courses and teaching assistant development programs. The final chapter provides a set of resources and activities - including discussion questions on the case studies, writing prompts, and jigsaw formats - that are equally appropriate for individual study or for use in workshop environments. You'll never again have to suffer such a profound silence that, as described by a contributor to the book, she could hear the crickets chirping outside.

**TIMSS 2011 International Results in Mathematics** - Ina V. S. Mullis 2012-12

*Sexuality Now: Embracing Diversity* - Janell L. Carroll 2015-01-01

Sex and sexuality are undoubtedly on your mind. So don't you want a human sexuality text that's hip, that reflects your life situation, and that answers the questions you're eager to learn about but hesitant to ask? Filled with the information that students like you want and need to learn, the fifth edition of this with it text hits the mark as it addresses concerns that students have about themselves and their sexuality with scientific fact, sensitivity, unmatched candor, and humor. Beyond simply providing a foundation in the biology and psychology of sexuality, **SEXUALITY NOW: EMBRACING DIVERSITY** connects with you and other students by exploring contemporary issues, changing sexual practices and behaviors, and their impact. Complemented by informative illustrations and

photographs, the book covers the range of sexual orientations, preferences, and behaviors and takes into account the diverse social, religious, ethnic, racial, and cultural contexts of today's students. The result is that you'll find lots of material to relate to as well as eye-opening discussions about sexuality today on college campuses, within the United States, and around the world. **Marriages, Families, and Relationships: Making Choices in a Diverse Society** - Mary Ann Lamanna 2016-12-05

This best-selling text on marriages, families, and relationships combines a rigorous scholarly and applied approach with a theme especially relevant to today's dynamic global environment: making choices in a diverse society. The authors use an engaging narrative to create a highly readable text that offers insightful perspectives

on the diversity of our modern society, including different ethnic traditions and family forms. The balanced presentation discusses a variety of theoretical perspectives (e.g., family ecology, structure-functional, interaction-constructionist, family systems, biosocial), emphasizing both social structure and the importance of individual agency, choice, and decision-making. Students are encouraged to question assumptions and reconcile conflicting ideas and values as they make informed choices in their own lives.

**Educating the Student Body** - Committee on Physical Activity and Physical Education in the School Environment 2013-11-13

Physical inactivity is a key determinant of health across the lifespan. A lack of activity increases the risk of heart disease, colon and breast cancer, diabetes mellitus, hypertension, osteoporosis, anxiety and depression and others

diseases. Emerging literature has suggested that in terms of mortality, the global population health burden of physical inactivity approaches that of cigarette smoking. The prevalence and substantial disease risk associated with physical inactivity has been described as a pandemic. The prevalence, health impact, and evidence of changeability all have resulted in calls for action to increase physical activity across the lifespan. In response to the need to find ways to make physical activity a health priority for youth, the Institute of Medicine's Committee on Physical Activity and Physical Education in the School Environment was formed. Its purpose was to review the current status of physical activity and physical education in the school environment, including before, during, and after school, and examine the influences of physical activity and physical education on the short and long term physical, cognitive and brain, and psychosocial health and development of children and adolescents. Educating the Student Body makes

recommendations about approaches for strengthening and improving programs and policies for physical activity and physical education in the school environment. This report lays out a set of guiding principles to guide its work on these tasks. These included: recognizing the benefits of instilling life-long physical activity habits in children; the value of using systems thinking in improving physical activity and physical education in the school environment; the recognition of current disparities in opportunities and the need to achieve equity in physical activity and physical education; the importance of considering all types of school environments; the need to take into consideration the diversity of students as recommendations are developed. This report will be of interest to local and national policymakers, school officials, teachers, and the education community, researchers, professional organizations, and parents interested in physical activity, physical education, and health for

school-aged children and adolescents.
