A Research on China's Economic Growth Potential - Chong-en Bai 2017-06-26 After impressive growth of about 10% per annum for three decades, China's visible signs of economic slowdown since 2008 have been subject to much contention. What causes the deceleration? What should we expect in an era of China's 6% growth? This book answers

these questions in three parts. Although it is widely accepted that China can hardly continue its high-speed growth model, estimations for its future growth potential differ greatly. The first part of this book predicts China's growth to 2050, which considers both cross-country historical experiences and China's own demographic structure and employment participation features. In the second part, the book offers a comprehensive estimation of China's national and provincial total factor productivity (TFP) over the period of 1978 to 2014 based on comparable data. It then analyzes the causes of China's economic slowdown from a productivity point of view. Finally, this book correspondingly outlines policy recommendations, including supply-side structural reform and macroeconomic policy frameworks, to effectively address the issue of decline in both labor and labor productivity growth. This book will attract scholars and students of economics and

China's economic studies.

Towards Macroprudential Stress Testing - Mr.Ivo Krznar
2017-06-30

Macro-feedback effects have been identified as a key missing element for more effective macro-prudential stress testing. To fill this gap, this paper develops a framework that facilitates the analysis of both the direct effects of macroeconomic shocks on the solvency of individual banks and feedback effects that allow for the amplification and propagation of shocks that can result from bank deleveraging and credit crunches. The framework ensures consistency in the key relationships between macroeconomic and financial variables, and banks' balance sheets. This is accomplished by embedding a standard stress-testing framework based on individual banks' data in a semi-structural macroeconomic model. The framework has numerous applications that can strengthen stress testing and macro financial analysis.

Moreover, it provides an avenue for many extensions that address the challenges of incorporating other second-round effects important for comprehensive systemic risk analysis, such as interactions between solvency, liquidity and contagion risks. To this end, the paper presents some preliminary simulations of feedback effects arising from the link between the liquidity and solvency risk.

ASEAN Economic Community - Mia Mikic 2016-02-26

The launch of the ASEAN Economic Community raises key issues: the deepening of

regional trade and the associated problem of exchange rate management. This volume questions the capacity of a shallow institution to deal with complex impacts on employment and inequality. Contributors analyze ASEAN's potential and weakness in readable terms.

International Practices to Promote Budget Literacy -

Harika Masud 2017-06-28

Budget literacy is defined as 'the ability to read, decipher, and understand public budgets to enable and enhance meaningful citizen participation in the budget process'. It is comprised of two main parts - (i) a technical understanding of public budgets, including familiarity with government spending, tax rates and public debt and; (ii) the ability to engage in the budget process, comprising of practical knowledge on day-to-day issues, as well as an elementary understanding of the economic, social and political implications of budget policies, the stakeholders involved and when and how to

provide inputs during the annual budget cycle. Given that no international standards or guidelines have been established for budget literacy education to date, this book seeks to address this gap by taking stock of illustrative initiatives promoting budget literacy for youth in selected countries. The underlying presumption is that when supply-side actors in the budget process -- governments -- simplify and disseminate budget information for demand-side actors -- citizens -- this information will then be used by citizens to provide feedback on the budget. However, since citizens are often insufficiently informed about public budgets to constructively participate in budget processes one way to empower them and to remedy the problem of "budget illiteracy" is to provide budget-literacy education in schools to youth, helping them evolve into civic-minded adults with the essential knowledge needed for analyzing their government's fiscal policy objectives and measures, and the confidence

and sense of social responsibility to participate in the oversight of public resources. This book elaborates on approaches, learning outcomes, pedagogical strategies and assessment approaches for budget literacy education, and presents lessons that are relevant for the development, improvement, or scaling up of budget literacy initiatives.

Advances in Economics and Econometrics: Volume 2 - Bo Honoré 2017-11-02

This is the second of two volumes containing papers and commentaries presented at the Eleventh World Congress of the Econometric Society, held in Montreal, Canada in August 2015. These papers provide state-of-the-art guides to the most important recent research in economics. The book includes surveys and interpretations of key developments in economics and econometrics, and discussion of future directions for a wide variety of topics, covering both theory and application. These volumes

provide a unique, accessible survey of progress on the discipline, written by leading specialists in their fields. The second volume addresses topics such as big data, macroeconomics, financial markets, and partially identified models.

The Palgrave Companion to LSE Economics - Robert A.

Cord 2019-01-18

The London School of Economics (LSE) has been and continues to be one of the most important global centres for economics. With six chapters on themes in LSE economics and 29 chapters on the lives and work of LSE economists, this volume shows how economics became established at the School, how it produced some of the world's best-known economists, including Lionel Robbins and Bill Phillips, plus Nobel Prize winners, such as Friedrich Hayek, John Hicks and Christopher Pissarides, and how it remains a global force for the very best in teaching and research in economics. With original contributions from a stellar cast, this volume

provides economists – especially those interested in macroeconomics and the history of economic thought – with the first in-depth analysis of LSE economics.

India Policy Forum 2013-14 - Shekhar Shah 2014-08-27

The India Policy Forum (IPF) is organized by the National Council of Applied Economic Research (NCAER) in New Delhi in partnership with the

Brookings Institution, Washington, D.C. It aims to examine India's economic reforms and its economic transition using policy-relevant empirical research. The IPF comprises an annual international conference in July in New Delhi and the IPF Volume that brings together the conference papers. These papers undergo detailed revisions after the conference based on discussants' comments at the IPF and the guidance provided by the editors. The IPF is guided by distinguished international advisory and research panels. The first paper in this 2013 IPF Volume evaluates the impact of laws governing the operation of India's labour market within the organized industrial sector. The next paper analyzes India's role in the rapid development of international production networks. The third paper examines the conduct of Indian monetary policy since the onset of the global financial crisis, focusing on the persistent high rates of inflation in India. The fourth paper provides an

overview of fiscal and monetary policies in the years after the financial crisis. The volume concludes with an assessment of the value of social audits, widely advocated as a tool for improving public accountability, in the MGNREGA program in Andhra Pradesh. The annual IPF Volume is globally the most cited collection of articles on India and should be useful to researchers and policy-makers in economics and political economy.

Routledge Handbook of the Economics of European Integration - Harald Badinger
2015-10-05

Routledge Handbook of the Economics of European Integration provides readers with a brief but comprehensive overview of topics related to the process of European integration in the post-World War II period. Its short chapters reflect the most up-to-date and concise research, written by a collective of experts on their own subjects. The aim of this book is twofold. Firstly, the text illustrates the broad and diverse range of issues

associated with European integration, and lastly, the key approaches and findings are summarised. Since institutional integration in Europe is an ongoing process, with possibly frequent and sometimes rapid changes, the chapters are intended to focus on the key features of the economic analyses of these topics. A wide and diverse set of economic issues is of direct relevance for European integration. These topics cover various fields, ranging from the history of the European Economic and Monetary Union, EU Trade Policy and the stability of international trade, single market issues over fiscal, monetary and other policies, the crisis that faces the Euro area, and institutions such as EU Council of Ministers. Not surprisingly, many of these issues have also been analysed from a European perspective. This handbook is designed to provide students, researchers, the public and policy makers with ready and accessible knowledge of issues related to European integration and will

provide the definitive overview of research in the area.

Development Challenges of India After Twenty Five Years of Economic Reforms -

Nripendra Kishore Mishra

2020-10-14

This book revisits some of the persisting challenges of development of India, which remain unresolved even after twenty-five years of economic reforms and almost fifteen years of high growth rate. These include defining purpose of development, inequality, labour, work, unemployment, agrarian distress and migration. The book questions the overemphasis on growth to the extent of neglecting basic issues of development. With a number of contributions re-imagining development and its political economy, the book discusses above mentioned

issues in light of new data and more recent conceptions of the issues. The contributors of this volume are eminent researchers in their respective field. Presenting primary as well as secondary data, the book considers the latest advances and research and also addresses new challenges like the global reorganization of production and the consequences for labour and the world of work, along with skills question. World of work has received detailed investigation in this book. This is a timely addition in existing literature especially in context of pandemic and lockdown. Informality and un/employment question is addressed in this context. Relationship among poverty, inequality and growth is examined in light of newer understanding. Agrarian distress is looked in a broader context. A number of papers are examining migration

question by expanding coverage of migration and including labour mobility as apart of migration debate. The present crisis of migrant labour and absence of social security for these workers is also discussed. This book is primarily intended for those interested in recent advances on some of the basic aspects of development, like poverty, inequality, informality, world of work, migration and labour mobility. It is also useful for researchers, policy makers, journalists and civil society organizations working on these issues.
