Chlorophyll a Fluorescence - G.C. Papageorgiou 2007-11-12

Chlorophyll a Fluorescence: A Signature of Photosynthesis highlights chlorophyll (Chl) a fluorescence as a convenient, non-invasive, highly sensitive, rapid and quantitative probe of oxygenic photosynthesis. Thirty-one chapters, authored by 58 international experts, provide a solid foundation of the basic theory, as well as of the application of the rich information contained in the Chl a fluorescence signal as it relates to photosynthesis and plant productivity. Although the primary photochemical reactions of photosynthesis are highly efficient, a small fraction of absorbed photons escapes as Chl fluorescence, and this fraction varies with metabolic state, providing a basis for monitoring quantitatively various processes of photosynthesis. The book explains the mechanisms with which plants defend themselves against environmental stresses (excessive light, extreme temperatures, drought, hyper-osmolarity, heavy metals and UV). It also includes discussion on fluorescence imaging of leaves and cells and the remote sensing of Chl fluorescence from terrestrial, airborne, and satellite bases. The book is intended for use by graduate students, beginning researchers and advanced

undergraduates in the areas of integrative plant biology, cellular and molecular biology, plant biology, biochemistry, biophysics, plant physiology, global ecology and agriculture.

Tales of the San Francisco Cacophony Society - John Law 2019-06-13

A template for pranksters, artists, adventurers and anyone interested in rampant creativity, for years to come. Tales Of The San Francisco Cacophony Society tells the history of the most influential underground cabal that you have never heard of. Rising from the ashes of the mysterious and legendary Suicide Club, The Cacophony Society, at its zenith, hosted chapters in over a dozen major cities, and influenced much of what was once called the underground. Flash Mobs, Urban Exploration, and Culture Jamming are a

few of the pop culture trends that Cacophony helped kick off. Chuck Palahniuk's *Fight Club*, *Burning Man* and Internet social networking powerhouse *Laughing Squid* were informed and inspired by Cacophony. The *Burning Man* Festival actually began as a Cacophony event as did the annual, and now world-wide *SantaCon*. Cacophony events could range from something as simple as climbing the *Golden Gate Bridge* or having a discussion over drinks about a movie seen together, to something as elaborate as *The Atomic Café* -- an event involving a hundred bedraggled "nuclear holocaust Survivors" mounting elaborate costumed rituals throughout the bowels of a massive abandoned tooth paste factory. Yes.... Cacophony was that strange. Cacophony's heyday was concurrent with the rise of the internet.

The story of this group is of historical significance for this reason. Information about upcoming pranks, street theater and other events hosted by Cacophony was spread by paper flyers posted on telephone poles and left in coffee shops, by the Societies mailer "Rough Draft" and by word of mouth. Then, with the genesis of personal computing and social networking, the jokers, artists and troublemakers of Cacophony were among some of the first non-geeks to explore the power of this new and world changing way of communicating. *Burning Man*, *Urban Exploration*, flash mobs and the like were avenues of creativity with their roots in Cacophony, that spread like wildfire through the mechanism of these new communication technologies.

Cora Ravenwing - Gina Wilson 2013-06-20

'The school where I first met Cora Ravenwing was called Okington School, and I was just beginning to have real ideas and opinions of my own when I first went there...' With *Cora Ravenwing* (1980) Gina Wilson began her acclaimed career as a novelist for young adults. As she describes in a new preface to this reissue, the idea for the novel 'took a grip' on her such that she wrote without 'planning', inspired by the theme of a child's growing sense of intuition. 'A sensitive, mystery-tinged portrayal of social tensions... *Cora Ravenwing*, village scapegoat, is the first child whom narrator Becky Stokes meets when her family moves outside London in the mid-1950s; and her reflections deftly pick up the undercurrents of gossip, hostility, and social

pretension that power the story of their year's troubled friendship.' Kirkus Review

The Tribulations of Ross Young, Supernat PA - Aj Sherwood 2021-05-27

"Company policy forbids me from exchanging my blood, my soul, or my firstborn child with customers..." When Ross starts working third-shift at a gas station, he doesn't think anything extraordinary will happen. He expects a lot of quiet shifts. Well, you know what they say about assumptions. One explosion later and he's the personal assistant to a vampire-who he admits is not only sexy, but the sane one-in charge of his supernatural clan's paperwork, and managing any trouble the members get into. Spoiler alert: the clan can get into quite a bit of trouble. Ross is definitely not paid enough for this. Auto Repair For Dummies - Deanna Sclar 2019-01-07

Auto Repair For Dummies, 2nd Edition (9781119543619) was previously published as Auto Repair For Dummies, 2nd Edition (9780764599026). While this version features a new Dummies cover and design, the content is the same as the prior release and should not be considered a new or updated product. The top-selling auto repair guide--400,000 copies sold--now extensively reorganized and updated Forty-eight percent of U.S. households perform at least some automobile maintenance on their own, with women now accounting for one third of this \$34 billion automotive do-it-yourself market. For new or would-be do-it-yourself mechanics, this illustrated how-to guide has long been a must and now it's even better. A complete

reorganization now puts relevant repair and maintenance information directly after each automotive system overview, making it much easier to find hands-on fix-it instructions. Author Deanna Sclar has updated systems and repair information throughout, eliminating discussions of carburetors and adding coverage of hybrid and alternative fuel vehicles. She's also revised schedules for tune-ups and oil changes, included driving tips that can save on maintenance and repair costs, and added new advice on troubleshooting problems and determining when to call in a professional mechanic. For anyone who wants to save money on car repairs and maintenance, this book is the place to start. Deanna Sclar (Long Beach, CA), an acclaimed auto repair expert and consumer advocate, has contributed to the Los Angeles Times and has been interviewed on the Today show, NBC Nightly News, and other television programs.

Engineering the Space Age - Robert V. Brulle 2012-08

Rarely is a reader exposed to such an extraordinary, multifaceted presentation of aerospace technology as Bob Brulle narrates in this book. After returning from duty as a combat fighter pilot in World War II, this Belgian immigrant developed a multitalented and innovative aerospace career path that addressed many of the aerospace professions. Along the way he forged a career in the aviation and space field that resulted in his participating in several of the most momentous aerospace achievements of the past century. He also expanded his education through hard work to a level at which he was qualified to teach graduate-level aerospace engineering courses. It is interesting to follow how the analysis and design techniques of aerospace vehicles progressed over the years, which incidentally reveals the large role that the computer played in making that possible. The story on the early Cape Canaveral operations was amusing and showed that enterprising innovations played a large role in a successful undertaking. Some of the projects described were a surprise, as I had never heard of them, like reading how a pencil-shaped missile was built

that could fly and maneuver over an intercontinental distance at a high hypersonic velocity. He also described how American engineers and scientists fought the Cold War battle for technological supremacy on their desks and in their laboratories. The initiatives by which this enterprising engineer develops his technical approach to a project are very informative and offer the reader an insight into the workings of successful operations. He achieves an interesting behind-the-scenes look at how aerospace history is made by weaving in the historical significance of these projects as they are developed. As a former aeronautical engineer at the rapidly growing Mc- Donnell Aircraft Corporation, Bob gives us an interesting exposure to the importance of top management's relationship with the workforce in a successful company. "Mr. Mac" made it a point to make all his employees team members by frequent communication and friendly association.

Patterns of Change in Earth Evolution - H.D. Holland 2012-12-06

3 of the experience of the last few generations. The group of happily unexperienced events includes large bolide impacts with the Earth. The evidence for the occurrence of such impacts at intervals of some tens of millions of years is quite convincing, and Lyell stands admonished by Hamlet: "There are more things in heaven and earth, Horatio, than are dreamt of in your philosophy. " The role of bolide impacts on the history of life during other portions of the Phanerozoic Eon is less clear (see Raup and Fischer, both this volume), and catastrophic changes unrelated to extraterrestrial processes may have been important (see Holser, this volume). Changes in the later

Precambrian biota are still difficult to interpret, in part because the preservation of soft-bodied animals from this period of Earth history is so unusual (see Seilacher, this volume). During the past billion years or so, bolide impacts have exerted a significant effect on the Earth's surface and its inhabitants, but not on its interior. The 3800 Ma rocks at Isua in West Greenland are the oldest terrestrial rocks that are currently available for inspection (see Dymek, this volume). They contain abundant evidence for the operation of chemical and physical processes that are similar to those of the present day. This situation could not have prevailed during the entire 700 Ma preceding the formation of the Isua rocks.

CUCKOO'S EGG - Clifford Stoll 2012-05-23

Before the Internet became widely known as a global tool for terrorists, one perceptive U.S. citizen recognized its ominous potential. Armed with clear evidence of computer espionage, he began a highly personal quest to expose a hidden network of spies that threatened national security. But would the authorities back him up? Cliff Stoll's dramatic firsthand account is "a computer-age detective story, instantly fascinating [and] astonishingly gripping" (Smithsonian). Cliff Stoll was an astronomer turned systems manager at Lawrence Berkeley Lab when a 75-cent accounting error alerted him to the presence of an unauthorized user on his system. The hacker's code name was "Hunter"—a mysterious invader who managed to break into U.S. computer systems and steal sensitive military and security information. Stoll began a one-man hunt of his own: spying on the spy. It was a dangerous game of deception, broken codes, satellites, and missile bases—a one-man sting

operation that finally gained the attention of the CIA . . . and ultimately trapped an international spy ring fueled by cash, cocaine, and the KGB.

Spectacle and the city - Jeroen de Kloet 2015-12-15

China is urbanizing at an unprecedented speed. Filmmakers, artists, musicians, and writers all try to come to terms with the changes of their city. How is the Chinese city-as-spectacle, visualised and thus imagined and reimagined, if not contested, in art and popular culture? What are the possible escape routes from a completely commodified cityscape? How to realign artistic expressions of the spectacle with everyday practices? The imaginations of the Chinese city in art and popular culture that this book explores are not taken as merely mirroring or reflecting reality, on the contrary, they are part and parcel of

the construction, destruction and deconstruction of that reality. As such, these imaginations are enmeshed in the social, material and political realities that produce Chinese cityscapes. *Spectacle and the City: Chinese Urbanities in Art and Popular Culture* brings together essays by an interdisciplinary team of experts on Chinese cities, including world-renowned scholars like Ackbar Abbas and Chua Beng Huat, as well as leading cultural critics like Ou Ning. Aiming to steer away from an exclusive focus on Mainland China, the adjective Chinese has a cultural meaning and includes places like Singapore and Hong Kong.

Balefires - David Drake 2007-04-01

Balefires is the long-awaited collection of David Drake's weird and fantastic fiction. Before Drake was a best-selling author of military science fiction, he was a prolific writer of horror and fantasy short fiction. *Balefires* collects some of his earliest professional sales (including his first sale to Arkham House.) In addition, *Balefires* brings together many stories set in the worlds of his fantasy novels (*Ranks of Bronze*, *Lord of the Isles*, etc.) and contains original fiction. More than just a collection of stories, *Balefires* features extensive story notes that chronicle the development of the writing career of one of the science fiction's most popular writers, and provides detailed snapshots of the larger than life editors, publishers and writers that Drake has worked with throughout his career. Skyhorse Publishing, under our Night Shade and Talos imprints, is proud to publish a broad range of titles for readers interested in science fiction (space opera, time travel, hard SF, alien invasion, near-future

dystopia), fantasy (grimdark, sword and sorcery, contemporary urban fantasy, steampunk, alternative history), and horror (zombies, vampires, and the occult and supernatural), and much more. While not every title we publish becomes a New York Times bestseller, a national bestseller, or a Hugo or Nebula award-winner, we are committed to publishing quality books from a diverse group of authors.

Planets and Life - Woodruff T. Sullivan, III 2007-09-13

Astrobiology involves the study of the origin and history of life on Earth, planets and moons where life may have arisen, and the search for extraterrestrial life. It combines the sciences of biology, chemistry, palaeontology, geology, planetary physics and astronomy. This textbook brings together world experts in each of these disciplines to provide the most comprehensive coverage of the field currently available. Topics cover the

origin and evolution of life on Earth, the geological, physical and chemical conditions in which life might arise and the detection of extraterrestrial life on other planets and moons. The book also covers the history of our ideas on

extraterrestrial life and the origin of life, as well as the ethical, philosophical and educational issues raised by astrobiology. Written to be accessible to students from diverse backgrounds, this text will be welcomed by advanced undergraduates and graduates who are taking astrobiology courses.
