In Search of the Light

Brigade - Lawrence W. Crider 2004

**Boots on the Ground** - John J. McGrath 2006

This paper clearly shows the immediate relevancy of historical study to current events. One of the most common criticisms of the U.S. plan to invade Iraq in 2003 is that too few troops were used. The argument often fails to satisfy anyone for there is no standard against which to judge. A figure of 20 troops per 1000 of the local population is often mentioned as the standard, but as McGrath shows, that figure was arrived at with some questionable assumptions. By analyzing seven military operations from the last 100 years, he arrives at an average number of military forces per 1000 of the population that have been employed in what would generally be considered successful military campaigns. He also points out a variety of important factors affecting those numbers-from geography

to local forces employed to supplement soldiers on the battlefield, to the use of contractors--among others.

*How I Became a Quant* -

Richard R. Lindsey

2011-01-11

Praise for *How I Became a Quant* "Led by two top-notch quants, Richard R. Lindsey and Barry Schachter, *How I Became a Quant* details the quirky world of quantitative analysis through stories told by some of today's most successful quants. For anyone who might have thought otherwise, there are engaging personalities behind all that number crunching!" --Ira Kawaller, Kawaller & Co. and the Kawaller Fund "A fun and fascinating read. This book tells the story of how academics, physicists, mathematicians, and other scientists became professional investors managing billions." -- David A. Krell, President and CEO, International Securities

Exchange "How I Became a Quant should be must reading for all students with a quantitative aptitude. It provides fascinating examples of the dynamic career opportunities potentially open to anyone with the skills and passion for quantitative analysis." --Roy D. Henriksson, Chief Investment Officer, Advanced Portfolio Management "Quants"--those who design and implement mathematical models for the pricing of derivatives, assessment of risk, or prediction of market movements--are the backbone of today's investment industry. As the greater volatility of current financial markets has driven investors to seek shelter from increasing uncertainty, the quant revolution has given people the opportunity to avoid unwanted financial risk by literally trading it away, or more specifically, paying someone else to take on the unwanted risk.

Became a Quant reveals the faces behind the quant revolution, offering you the chance to learn firsthand what it's like to be a quant today. In this fascinating collection of Wall Street war stories, more than two dozen quants detail their roots, roles, and contributions, explaining what they do and how they do it, as well as outlining the sometimes unexpected paths they have followed from the halls of academia to the front lines of an investment revolution.

## **Landscapes and Landforms of the Horn of Africa -**

Paolo Billi 2022-09-30

This book focuses on regions for which until now the geomorphology was very poorly studied and relatively unknown. Nevertheless, the landforms and landscapes of the Horn of Africa are highly attractive, diverse and in a few cases unique, since they span very different environments, from highland plateaus and mountains to lowlands (even below sea level) and coastlines with a high degree of diversity and from monsoon to arid climate conditions. The main topics addressed in the book include the links between the geological evolution and the current large scale geomorphology of the Horn of Africa; the large differences between the highlands and lowlands climate, river hydrology and their variation through time within a climate change perspective. This part of the world was home of the very first hominids. The

in which they lived and evolved throughout the Pleistocene is described in comparison with the arid and inhospitable, though immensely scenic, environment of today. Perennial and ephemeral rivers with very different morphology, processes, and hydrology drain the area, and, in combination with the past and recent uplift, substantially contributed to provide the region with peculiar landscapes and landforms. Long lasting weathering and erosion processes result in a typical inselberg landscape such as the Bur region, or the currently exposed flatland of old peneplain surfaces. Their changes through time, induced by both natural and anthropogenic factors, are addressed by a couple of case studies. Though the region has few inhabitants, they had to struggle to find their livelihood in a land that offers poor resources. This resulted in landscape change and

land degradation. Examples of human impact on the landscape are presented at different scales. This book provides readers interested in geography and geomorphology with essential scientific and educational information on the Landscapes and Landforms of Eritrea, Djibouti and Somalia through simple, though scientifically, rigorous texts illustrated with several color maps and photos. One main prerogative of this book is therefore to give an insight into a region of the world where, for geographical and historical constraints, geomorphological investigation was very limited, thus enriching its intrinsic informative value.

(9781119543619) was previously published as Auto Repair For Dummies, 2nd Edition (9780764599026). While this version features a new Dummies cover and design, the content is the same as the prior release and should not be considered a new or updated product. The top-selling auto repair guide--400,000 copies sold--now extensively reorganized and updated. Forty-eight percent of U.S. households perform at least some automobile maintenance on their own, with women now accounting for one third of this \$34 billion automotive do-it-yourself market. For new or would-be do-it-yourself mechanics, this illustrated how-to guide has long been a must and now it's even better. A complete reorganization now puts relevant repair and maintenance information directly after each automotive system overview, making it much easier to find hands-on fix-it instructions. Author Deanna Sclar has updated

systems and repair information throughout, eliminating discussions of carburetors and adding coverage of hybrid and alternative fuel vehicles. She's also revised schedules for tune-ups and oil changes, included driving tips that can save on maintenance and repair costs, and added new advice on troubleshooting problems and determining when to call in a professional mechanic. For anyone who wants to save money on car repairs and maintenance, this book is the place to start. Deanna Sclar (Long Beach, CA), an acclaimed auto repair expert and consumer advocate, has contributed to the Los Angeles Times and has been interviewed on the Today show, NBC Nightly News, and other television programs.

**Pensions and Population Ageing** - John Creedy

the next century. This significant book examines aspects of population ageing and pensions, with an emphasis on the design and use of simple economic models to focus on particular aspects of a very broad problem. The analysis of pensions presents many complex problems. A major aim of this book is to demonstrate how reasonably simple economic models can be designed and used to shed some light on the issues involved in population growth and pension provision. The basic analytics of population growth and pension structure are first explored. Projections for Australia are examined and used to model ageing and social expenditure and to estimate the 'burden' of aged care on future workers. The author goes on to investigate pensions and pension finance, and examines several types of economic model before turning to the analysis of alternative pension

arrangements using a lifetime simulation model. The results of the study suggest that both lower contribution rates and a universal pension encourage a later retirement age. This book will prove invaluable to students and scholars of public sector economics, welfare economics, social economics and public finance.

**A Grammar of Epic Sanskrit** - Thomas Oberlies 2003

Die beiden großen Epen des (alten) Indiens, das Mahabharata und das Ramayana, sind in einer Sprache verfasst, die sich in vielen Einzelheiten von der Hochsprache des sog. klassischen Sanskrit unterscheidet. Die Grammar of Epic Sanskrit soll nun diese Lücke schließen.

This impressive scientific resource presents up-to-date information on ten thousand years of volcanic activity on Earth. In the decade and a half since the previous edition was published new studies have refined assessments of the ages of many volcanoes, and several thousand new eruptions have been documented. This edition updates the book's key components: a directory of volcanoes active during the Holocene; a chronology of eruptions over the past ten thousand years; a gazetteer of volcano names, synonyms, and subsidiary features; an extensive list of references; and an introduction placing these data in context. This edition also includes new photographs, data on the most common rock types forming each volcano, information on population densities near volcanoes, and other features, making it the most

comprehensive source available on Earth's dynamic volcanism.

### **Where Gods and Mortals Meet** - McCabe Elsie 2004

The Urhobo peoples occupy the western fringe of the Niger River delta in southern Nigeria, an area rich with oil reserves. Since the 1970s, the petroleum industry has brought worldwide wealth and attention to Nigeria, but tragically has also detracted from broad-based economic progress as flow stations, flare-offs, drilling platforms and pipelines have proliferated. As rural economies suffered an inevitable decline, the custom of maintaining traditional Urhobo art has experienced a parallel atrophy. The resultant decline in Urhobo culture has prompted a response among many Urhobo who want to celebrate and preserve their traditions for future generations. The Museum for African Art in New York makes a major contribution to this

effort through the presentation of "Where Gods and Mortals meet," the first exhibition to showcase Urhobo arts. The exhibition introduces never-before-seen Urhobo art and footage of cultural performances, from yesterday and today. This accompanying catalogue includes approximately 80 works of art: traditional art from the historical period 1850 to 1975, including monumental wood figures, metal and clay sculpture, and masks and costumes with accompanying poetry and song; a small selection of contemporary work by Bruce Onobrakpeya, an Urhobo by birth and one of Africa's foremost artists; plus photos and video footage of extraordinary multimedia masquerades.

It is a fascinating tale of survival against the

highest odds, and it highlights Native Americans and their interactions with the newcomers in a manner seldom seen in writings of the period. In this English-language edition, reproduced from their award-winning three-volume set, Adorno and Pautz supplement the engrossing account with a general introduction that orients the reader to Cabeza de Vaca's world. They also provide explanatory notes, which resolve many of the narrative's most perplexing questions. This highly readable translation fires the imagination and illuminates the enduring appeal of Cabeza de Vaca's experience for a modern audience.

**Scribes and Scribalism** - Mark Leuchter 2020-11-12

This volume is a concentrated examination of the varied roles of scribes and scribal practices in ancient Israel and Judah, shedding light on the social world of the Hebrew Bible. Divided into discussion of three key aspects, the book begins by assessing praxis and materiality, looking at the tools and materials used by scribes, where they came from and how they worked in specific contexts. The contributors then move to observe the power and status of scribal cultures, and how scribes functioned within their broader social world. Finally, the volume offers perspectives that examine ideological
