Transplantation E-Book - John L. R. Forsythe 2013-06-24
Transplantation meets the needs of surgeons in higher training and practising consultants for a contemporary and evidence-based account of this sub-specialty that is relevant to their general surgical practice. It is a practical reference source incorporating the most current information on recent developments, management issues and operative procedures. The text is thoroughly referenced and supported by evidence-based recommendations wherever possible, distinguishing between strong evidence to support a conclusion, and evidence suggesting that a recommendation can be reached on the balance of probabilities. This is a title in the Companion to Specialist Surgical Practice series whose eight volumes are an established and highly regarded source of information for the specialist general surgeon. The Companion to Specialist Surgical Practice series provides a current and concise summary of the key topics within each major surgical sub-specialty. Each volume highlights evidence-based practice both in the text and within the extensive list of references at the

end of every chapter. An expanded authorship team across the series includes additional European and World experts with an increased emphasis on global practice. The contents of the series have been extensively revised in line with recently published evidence. Modern techniques in transplantation and new forms of immunosuppression are emphasised throughout this volume. The substantial interest in new organ perfusion and in the preservation techniques in organ donation and transplantation are reflected in a new chapter written by an international expert. All the chapters reflect transplant care as a multi-disciplinary team of clinicians working in a collaborative fashion.

The Stanford Mathematics Problem Book - George Polya 2013-04-09

Based on Stanford University's well-known competitive exam, this excellent mathematics workbook offers students at both high school and college levels a complete set of problems, hints, and solutions. 1974

edition.

Maritime Law - Yvonne Baatz 2014-10-24

Now in its third edition, this authoritative guide covers all of the core aspects of maritime law in one distinct volume. Maritime Law is written by a team of leading academics and practitioners, each expert in their own field. Together, they provide clear, concise and fully up-to-date coverage of topics ranging from bills of lading to arrest of ships, all written in an accessible and engaging style. As English law is heavily relied on throughout the maritime world, this book is grounded in English law whilst continuing to analyse the key international conventions currently in force. Brand new coverage includes: Regulation (EU) No 1215/2012 of the European Parliament and of the Council of 12 December 2012 on jurisdiction and the recognition and enforcement of judgments in civil and commercial matters (recast) The coming into force of the 2006 Maritime Labour Convention and the Merchant Shipping Regulations 2014 The approval of the 2012 edition of the Norwegian Sale Form Regulation 100/2013 heavily amending Regulation 1406/2002 establishing the European Maritime Safety Agency Greater detail on piracy in the Public International Law chapter and discussion of the M/V Louisa, ARA Libertad and Arctic Sunrise cases in the International Tribunal for the Law of the Sea Expanded sections in the marine insurance chapter Analysis of recent cases including Golden Ocean Group Ltd v Salgaocar Mining Industries PVT Ltd; Starlight Shipping Co v Allianz Marine & Aviation Versicherungs AG and Griffon Shipping Ltd. v Firodi Shipping Ltd. This book is a comprehensive reference source for students, academics, and legal practitioners worldwide, especially those new to maritime law or a particular field therein.

Mobile Services Industries, Technologies, and Applications in the Global Economy - Lee, In 2012-08-31

As business paradigms shift from desktop-centric environments to data-centric mobile environments, mobile services create numerous new business opportunities. At the same time, these advances may also challenge many of the basic premises of existing business models. Mobile Services Industries, Technologies, and Applications in the Global Economy fosters a scientific understanding of mobile services, provides a timely publication of current research efforts, and forecasts future trends in the mobile services industry and its important role in the world economy. Written for academics, researchers, government policymakers, and corporate managers, this comprehensive volume will outline the great potential for new business models and applications in mobile commerce.

Wireless Multi-Access Environments and Quality of Service Provisioning: Solutions and Application - Muntean, Gabriel-Miro 2012-01-31

"This book serves as a vital resource for practitioners to learn about the latest research and methodology within the field of wireless technology, covering important aspects of emerging technologies in the heterogeneous next generation network environment with a focus on wireless communications and their quality"-- Provided by publisher.

Proofs from THE BOOK - Martin Aigner 2013-06-29

According to the great mathematician Paul Erdős, God maintains perfect mathematical proofs in The Book. This book presents the authors candidates for such "perfect proofs," those which contain brilliant ideas, clever connections, and wonderful observations, bringing new insight and surprising perspectives to problems from

number theory, geometry, analysis, combinatorics, and graph theory. As a result, this book will be fun reading for anyone with an interest in mathematics.

The Saffron Kitchen - Yasmin Crowther 2007-08-28

In a powerful debut novel that moves between the crowded streets of London and the desolate mountains of Iran, Yasmin Crowther paints a stirring portrait of a family shaken by events from decades ago and worlds away. On a rainy day in London the dark secrets and troubled past of Maryam Mazar surface violently, with tragic consequences for her daughter, Sara, and her newly orphaned nephew. Maryam leaves her English husband and family and returns to the remote Iranian village where her story began. In a quest to piece their life back together, Sara follows her mother and finally learns the terrible price Maryam once had to pay for her freedom, and of the love she left behind. Set against the breathtaking beauty of two very different places, this stunning family drama transcends culture and is, at its core, a rich and haunting narrative about mothers and daughters.

Computational Mathematics and Applications - Dia Zeidan 2020-11-23

This book is a collection of invited and reviewed chapters on state-of-the-art developments in interdisciplinary mathematics. The book discusses recent developments in the fields of theoretical and applied mathematics, covering areas of interest to mathematicians, scientists, engineers, industrialists, researchers, faculty, and students. Readers will be exposed to topics chosen from a wide range of areas including differential equations, integral reforms, operational calculus, numerical analysis, fluid mechanics, and computer science. The aim of the book is

to provide brief and reliably expressed research topics that will enable those new or not aware of mathematical sciences in this part of the world. While the book has not been precisely planned to address any branch of mathematics, it presents contributions of the relevant topics to do so. The topics chosen for the book are those that we have found of significant interest to many researchers in the world. These also are topics that are applicable in many fields of computational and applied mathematics. This book constitutes the first attempt in Jordanian literature to scientifically consider the extensive need of research development at the national and international levels with which mathematics deals. The book grew not only from the international collaboration between the authors but rather from the long need for a research-based book from different parts of the world for researchers and professionals working in computational and applied mathematics. This is the modified version of the back-cover content on the print book

New Trends in Fractional Differential Equations with Real-World Applications in Physics - Jagdev Singh 2020-12-30

This eBook is a collection of articles from a Frontiers Research Topic. Frontiers Research Topics are very popular trademarks of the Frontiers Journals Series: they are collections of at least ten articles, all centered on a particular subject. With their unique mix of varied contributions from Original Research to Review Articles, Frontiers Research Topics unify the most influential researchers, the latest key findings and historical advances in a hot research area! Solutions of Nonlinear Differential Equations - Lin Li
2016-04-15

Variational methods are very powerful techniques in nonlinear analysis and are extensively used in many disciplines of pure and applied mathematics (including ordinary and partial differential equations, mathematical physics, gauge theory, and geometrical analysis). In our first chapter, we gather the basic notions and fundamental theorems that will be applied throughout the chapters. While many of these items are easily available in the literature, we gather them here both for the convenience of the reader and for the purpose of making this volume somewhat self-contained. Subsequent chapters deal with how variational methods can be used in fourth-order problems, Kirchhoff problems, nonlinear field problems, gradient systems, and variable exponent problems. A very extensive bibliography is also included. Contents: Preface Some Notations and Conventions Preliminaries and Variational Principles Quasilinear Fourth-Order Problems Kirchhoff Problems Nonlinear Field Problems Gradient Systems Variable Exponent Problems Readership: Graduate students and researchers interested in variational methods.

Twenty More Problem Solving Skills for Mathcounts Competitions - Jane Chen 2010-10-13

Your book is "fabulous". I spent two hours last night working problems from it. I'm planning to use some in what I do with teachers, with citation of course. I love it. I love the clever problems you came up with and the clever solutions of the MATHCOUNTS problems you used. Dr. Harold Reiter, former Chairman of Mathcounts Question Written Committee, Math Professor, UNC at

Charlotte Being responsible for the publications we put out at MATHCOUNTS, I understand the incredible amount of work this required. Congratulations on such a great accomplishment. ---Kristen Chandler Mathcounts, Deputy Director & Program Director I just finished going through with it. As for the book, I'm pretty impressed. It really seems you put a lot of time and effort into it, and I liked it. - Calvin Deng 2010 USA IMO Team Member, Silver Medalist I bought this book together with "Twenty More Problem Solving Skills" for my 6th grade daughter, who loves math, and is preparing for AMC and MathCounts competition. She is very excited with these two books, and learns a lot from these two books in her math competition preparation. We recommend this book as a must have math competition collection. - -A parent
IBM IMS Solutions for Automating Database Management - Paolo Bruni 2014-12-09

Over the last few years, IBM® IMSTM and IMS tools have been modernizing the interfaces to IMS and the IMS tools to bring them more in line with the current interface designs. As the mainframe software products are becoming more integrated with the Windows and mobile environments, a common approach to interfaces is becoming more relevant. The traditional 3270 interface with ISPF as the main interface is no longer the only way to do some of these processes. There is also a need to provide more of a common looking interface so the tools do not have a product-specific interface. This allows more cross product integration. Eclipse and web-based interfaces being used in a development environment, tooling using those environments provides productivity improvements in that the interfaces are common and familiar. IMS and IMS tools developers are making use of those environments to provide tooling that

will perform some of the standard DBA functions. This book will take some selected processes and show how this new tooling can be used. This will provide some productivity improvements and also provide a more familiar environment for new generations DBAs. Some of the functions normally done by DBA or console operators can now be done in this eclipse-based environment by the application developers. This means that the need to request these services from others can be eliminated. This IBM Redbooks® publication examines specific IMS DBA processes and highlights the new IMS and IMS tools features, which show an alternative way to accomplish those processes. Each chapter highlights a different area of the DBA processes like: PSB creation Starting/stopping a database in an IMS system Recovering a database Cloning a set of databases

The Bill of Lading - Frank Stevens 2017-12-14

The carriage of goods by sea starts off with a contract of carriage, an essentially simple and straightforward contract between two parties, the shipper and the carrier. Very often, however, a bill of lading is issued and a third party appears on the scene: the holder of the bill of lading. The holder was not involved in the making of the contract of carriage, but does have rights, and possibly obligations, against the carrier at destination. The question then is how the third-party holder of the bill acquires those rights and obligations. Analysing the different theories that have been proposed to explain the position of the third party holder, this book makes a distinction between

contractual theories and non-contractual theories to explain the holder's position. Contractual theories build on the initial contract of carriage and apply contract law mechanisms while non-contractual theories construe the position of the third-party holder independently. Following the analysis and appraisal of the different theories, this book makes the case that the position of the third-party holder of the bill of lading is not obvious or self-evident; and submits that a statutory approach to the position of the holder of the bill of lading has advantages and would be preferable.

The Math Book - Clifford A. Pickover 2009

This book covers 250 milestones in mathematical history, beginning millions of years ago with ancient "ant odometers" and moving through time to our modern-day quest for new dimensions.

Resource Management for Multimedia Services in High Data Rate Wireless Networks - Ruonan Zhang 2016-11-09

This brief offers a valuable resource on principles of quality-of-service (QoS) provisioning and the related link-layer resource management techniques for high data-rate wireless networks. The primary emphasis is on protocol modeling and analysis. It introduces media access control (MAC) protocols, standards of wireless local area networks (WLANs), wireless personal area networks (WPANs), and wireless body area networks (WBANs), discussing their key technologies, applications, and deployment scenarios. The main analytical approaches and models for performance analysis of the fundamental resource scheduling mechanisms, including the contention-based, reservation-based, and hybrid MAC, are presented. To help readers understand and evaluate system performance, the brief

contains a range of simulation results. In addition, a thorough bibliography provides an additional tool. This brief is an essential resource for engineers, researchers, students, and users of wireless networks.

Marine Cargo Insurance - John Dunt 2015-11-19

The new edition of this British Insurance Law Association (BILA)-award winning text is the definitive reference source for marine cargo insurance law. Written by an author who was closely involved with the revisions to the Institute Cargo Clauses 2009, the work expertly examines marine cargo insurance by reference to important English and foreign legal cases as well as the Marine Insurance Act 1906. Logically arranged to reflect the structure of the Institute Cargo Clauses, the most widely used standard form of cover, this text offers easy to find solutions for today's busy practitioner. New to this edition: Completely revised to include the Insurance Act 2015 (duty of fair presentation; warranties, fraudulent claims) Brand new chapter on the revised Institute Ancillary and Trade Clauses, including those to be introduced on 1 November 2015 Increased coverage of jurisdiction and choice of law, particularly taking into account the Rome I Regulation Enhanced coverage of the issue of Constructive Total Loss Consideration of the Law Reform Commission's proposals for the reform of insurance law, and further amendments to the Marine Insurance Act 1906. Covers latest developments in the Enterprise Bill for damages for late payment of claims Fully updated with all of the influential cases since 2009, including: The Cendor MOPU, one of the most important marine insurance cases of the last 50 years. Clothing Management v Beazley Solutions Notable hull cases such as Versloot Dredging v HDI Gerling on fraudulent devices Influential foreign

cases taken from this book's sister text, International Cargo Insurance This unique text is a one-stop resource for marine insurance lawyers handling cargo claims, and will also be of interest to students and researchers of maritime law.

Third Party Protection in Shipping - Carlo Corcione 2019-08-06

This book examines third party protection in shipping. Today, shipping is not just a part of the supply chain; it is indistinguishable from it. Once at the periphery, third party protection is now a central element of carriage. This matter is addressed by means of analysis of the current legal framework in relation to third parties and an evaluation of how, within this framework, the law applicable to a third party may be uncovered. Third party protection is analysed under the following: the Hague/Hague-Visby Rules; the Hamburg Rules; the Rotterdam Rules; English law and United States law; and civil law. With its breadth of coverage and high-quality analysis, this book is vital reading for both professional and academic readers with an interest in shipping and international trade.

Carter v Boehm and Pre-Contractual Duties in Insurance Law - Yong Qiang Han 2018-06-28

Revisiting Carter v Boehm, the collected papers in this book are intended as a catalyst for rethinking the pre-contractual duties in insurance law and the related principle of utmost good faith at a critical time for insurance law. In so doing, it endeavours to provide insurance law students, academics, practitioners and judges with new perspectives for a keen understanding of this fundamental aspect of insurance law, which has become increasingly dynamic under both common law and civil law legal traditions. It will explore to what

extent and why the doctrines of pre-contractual duties in insurance law under the two major legal traditions are converging, as well as the implications of such convergence. It will be of great interest to students, academics and practitioners in the field of insurance law.

Euclidean Geometry in Mathematical Olympiads - Evan Chen
2021-08-23

This is a challenging problem-solving book in Euclidean geometry, assuming nothing of the reader other than a good deal of courage. Topics covered included cyclic quadrilaterals, power of a point, homothety, triangle centers; along the way the reader will meet such classical gems as the nine-point circle, the Simson line, the symmedian and the mixtilinear incircle, as well as the theorems of Euler, Ceva, Menelaus, and

Pascal. Another part is dedicated to the use of complex numbers and barycentric coordinates, granting the reader both a traditional and computational viewpoint of the material. The final part consists of some more advanced topics, such as inversion in the plane, the cross ratio and projective transformations, and the theory of the complete quadrilateral. The exposition is friendly and relaxed, and accompanied by over 300 beautifully drawn figures. The emphasis of this book is placed squarely on the problems. Each chapter contains carefully chosen worked examples, which explain not only the solutions to the problems but also describe in close detail how one would invent the solution to begin with. The text contains a selection of 300 practice problems of varying difficulty from contests around the world, with extensive hints and selected solutions. This book is especially suitable for students preparing for national or international mathematical olympiads or for teachers looking for a text for an honor class.

Bills of Lading Incorporating Charterparties - Melis Özdel
2015-01-22

Vessels very frequently serve under a long chain of charterparties and sub-charterparties. When this is the case, the legal issues are more convoluted than they might at first seem. Incorporation clauses are commonplace in bills of lading used in the tramp trade due to the desire to make this web of contracts back-to-back. The extent to which the terms of the charterparty referred to can be carried across to the bill of lading has, over the centuries, been hotly disputed in many jurisdictions. Entirely dedicated to the topic of the incorporation of charterparty terms into bills of

lading, this book discusses and analyses the legal and practical issues surrounding this topic under English and US law. Through discussions on the incorporation of a wide range of different charterparty terms, the book combines the peculiar and sophisticated rules of incorporation with the legal and practical issues concerning shipping, international trade, arbitration and conflict of laws and jurisdiction.

Invitations to Tender for Facility Management Services - Cinzia Talamo 2018-12-17

This book deals with Invitations to Tender (ITTs) for the provision of Facility Management (FM) services. It presents a framework to support companies in preparing clear, comprehensive and effective ITTs, focusing on such key aspects as: organizational structures, tools and procedures for managing information, allocation of information responsibilities, procedures for services monitoring and control, quality policies, and risk management. It discusses and analyzes a range of basic terms and concepts, procedures, and international standards concerning the Tendering Process, as well as

the contents of ITTs, which should represent the translation of information needs into requirements related to: the client's goals, main categories of information to deal with, expected organization of information, modalities of reporting and control, and level of knowledge to be reached. A further major focus is on potential key innovation scenarios concerning current FM practice, such as Sustainable Procurement, Building Information Modeling (BIM), Big Data and Internet of Things (IoT) technologies, highlighting both the possible benefits and the possible risks and implications that could negatively affect the quality of FM service provision if not properly treated within the ITT. The book will be of interest to real estate owners, demand organizations and facility managers, enhancing their ability to prepare, interpret and/or critically analyze ITTs.

Textbook of Organ Transplantation Set - Allan D. Kirk 2014-07-21

Brought to you by the world's leading transplantclinicians, Textbook of Organ Transplantation provides acomplete and comprehensive overview of modern transplantation inall its complexity, from basic science to gold-standard surgicaltechniques to post-operative care, and from likely outcomes toconsiderations for transplant program administration, bioethics andhealth policy. Beautifully produced in full color throughout, and with over 600high-quality illustrations, it successfully: Provides a solid overview of what transplantclinicians/surgeons do, and with topics presented in an order thata clinician will encounter them. Presents a holistic look at transplantation, foregrounding theinterrelationships between transplant team members and non-surgicalclinicians in the

subspecialties relevant to pre- and post-operative patient care, such as gastroenterology, nephrology, and cardiology. Offers a focused look at pediatric transplantation, and identifies the ways in which it significantly differs from transplantation in adults. Includes coverage of essential non-clinical topics such as transplant program management and administration; research design and data collection; transplant policy and bioethical issues. Textbook of Organ Transplantation is the market-leading and definitive transplantation reference work, and essential reading for all transplant surgeons, transplant clinicians, program administrators, basic and clinical investigators and any other members of the transplantation team responsible for the clinical management or scientific study of transplant patients.

Contract Law - Ewan McKendrick 2020-05-18

A complete guide to contract law in a single volume. Comprising a unique balance of 60% text to 40% cases and materials, Contract Law: Text, Cases, and Materials combines the best features of a textbook with those of a traditional casebook. The author's clear explanations and analysis of the law provide invaluable support to students, while the extracts from cases and materials promote the development of essential case-reading skills and allow for a more detailed appreciation of the practical workings of the law. Online resources The book is accompanied by online resources which include:- Extra material with in-depth coverage of topics such as illegality and incapacity- Updates on recent developments in the law- Self-test multiple choice questions and answers- Annotated web links to key sources of information on contract law

Numerical Solutions of Realistic Nonlinear Phenomena -

J. A. Tenreiro Machado 2020-02-19

This collection covers new aspects of numerical methods in applied mathematics, engineering, and health sciences. It provides recent theoretical developments and new techniques based on optimization theory, partial differential equations (PDEs), mathematical modeling and fractional calculus that can be used to model and understand complex behavior in natural phenomena. Specific topics covered in detail include new numerical methods for nonlinear partial differential equations, global optimization, unconstrained optimization, detection of HIV- Protease, modelling with new fractional operators, analysis of biological models, and stochastic modelling.

The Art and Craft of Problem Solving - Paul Zeitz
2016-12-01

Appealing to everyone from college-level majors to independent learners, The Art and Craft of Problem Solving, 3rd Edition introduces a problem-solving approach to mathematics, as opposed to the traditional exercises approach. The goal of The Art and Craft of Problem Solving is to develop strong problem solving skills, which it achieves by encouraging students to do math rather than just study it. Paul Zeitz draws upon his experience as a coach for the international mathematics Olympiad to give students an enhanced sense of mathematics and the ability to investigate and solve problems.

Calculus for Business, Economics, and the Social and Life Sciences - Laurence D. Hoffmann 2007-06-01

Calculus for Business, Economics, and the Social and Life Sciences introduces calculus in real-world contexts and provides a sound, intuitive understanding of the basic concepts students need as they pursue careers in

business, the life sciences, and the social sciences. The new Ninth Edition builds on the straightforward writing style, practical applications from a variety of disciplines, clear step-by-step problem solving techniques, and comprehensive exercise sets that have been hallmarks of Hoffmann/Bradley's success through the years.

Freight Forwarding and Multi Modal Transport Contracts - David Glass 2013-07-18

Freight Forwarding and Multimodal Transport Contracts, 2nd Edition, is a comprehensive guide to the law in relation to contract forms and terms created by operators, trade associations or international bodies such as the UN and used as a basis for trading conditions by freight forwarders, logistics suppliers, combined or multimodal transport operators and container operators. This second edition examines the latest editions of contract forms and terms, both where their object is the supply or procurement of multimodal carriage, as well as where they are directed to the use of combined transport equipment (ie containers, swap bodies). Of particular prominence will be a detailed examination of the latest versions of conditions used by the principal UK forwarding, logistics, intermodal and container operators such as the British International Freight Association (BIFA) conditions 2005A and the current Freightliner Conditions as well as updates on many of the conditions in use and legal developments relevant to them, eg Road Haulage Association Conditions 2009, Maersk Conditions of Carriage, TT Club Conditions. *Competition Math for Middle School* - Jason Batteron 2011-01-01

Contract Law - Tracey Hough 2018-06-27

Contract Law is an engaging and accessible new textbook aimed at students on core LLB and GDL courses. Combining comprehensive coverage of the curriculum with carefully developed pedagogical tools, the authors help students learn, gain an enhanced understanding of how the law works, and develop their ability to apply this newfound knowledge and understanding in assessment situations. To be successful in assessments, students must be able to analyse and solve legal problems, while accurately and appropriately applying legal authority. The Spotlights series models these core skills alongside a full and thorough exposition of the substantive law.

Online Arbitration - Faye Fangfei Wang 2017-08-14
Innovative initiatives for online arbitration are needed to aid in resolving cross-border commercial and consumer disputes in the EU, UK, US and China. This book provides a comparative study of online dispute resolution (ODR) systems and a model of best practices, taking into consideration the features and characteristics of various practical experiences/examples of ODR services and technological development for ODR systems and platforms. The book begins with a theoretical approach, looking into the challenges in the use of online arbitration in commercial transactions and analysing the potential adoption of technology-assisted arbitration (e.g. Basic ODR systems and Intelligent/Advanced ODR systems) in resolving certain types of international commercial and consumer disputes. It then investigates the legal obstacles to adopting ODR by examining the compatibility of technology with current legislation and regulatory development. Finally, it suggests appropriate legal and technological measures to promote the recognition of ODR, in particular online arbitration, for cross-border commercial and consumer disputes. By

exploring both the theoretical framework and the practical considerations of online arbitration, this

book will be a vital reference for lawyers, policy-makers, government officials, industry professionals and academics who are involved with online arbitration.
