*Orientalism* - Edward W. Said 2014-10-01

More than three decades after its first publication, Edward Said's groundbreaking critique of the West's historical, cultural, and political perceptions of the East has become a modern classic. In this wide-ranging, intellectually vigorous study, Said traces the origins of "orientalism" to the centuries-long period during which Europe dominated the Middle and Near East and, from its position of power, defined "the orient" simply as "other than" the occident. This entrenched view continues to dominate western ideas and, because it does not allow the East to represent itself, prevents true understanding. Essential, and still eye-opening, *Orientalism* remains one of the most important books written

about our divided world.

*Utopias in Latin America* - Juan Pro 2019-02

Latin America has historically been a fertile ground where utopian projects, movements, and experiments could take root and thrive. Each of the thirteen authors in this collective volume address a particular case or specific aspect of Latin American utopianism from colonial times to the present day. The America that the Spanish and Portuguese discovered became, from the sixteenth century onwards, a space in which it was possible to imagine the widest variety of forms of human coexistence. *Utopias in Latin America* reconsiders the sense and understanding of utopias in various historical frames: the discovery of indigenous cultures and their natural environments; the foundation of new towns and cities in a vast colonial territory; the experimental communities of nineteenth-century utopian socialists and European exiled intellectuals; and the innovative formulae that attempts to get beyond twentieth-century capitalism.

*Mi Adorado Juan* - Miguel Mihura 1983-05-01

In the Time of the Butterflies - Julia Alvarez 2010-01-12

It is November 25, 1960, and three beautiful sisters have been found near their wrecked Jeep at the bottom of a 150-foot cliff on the north coast of the Dominican Republic. The official state newspaper reports their deaths as accidental. It does not mention that a fourth sister lives. Nor does it explain that the sisters were among the leading opponents of Gen. Rafael Leonidas Trujillo's dictatorship. It doesn't have to. Everybody knows of Las Mariposas—"The Butterflies." In this extraordinary novel, the voices of all four sisters—Minerva, Patria, María Teresa, and the survivor, Dedé—speak across the decades to tell their own stories, from hair ribbons and secret crushes to gunrunning and prison torture, and to describe the everyday horrors of life under Trujillo's rule. Through the art and magic of Julia Alvarez's imagination, the martyred Butterflies live again in this novel of courage and love, and the human cost of political oppression.

*Building Effective Governments* - Marianela Armijo 2015-07-09

Improving public services, using State resources efficiently, and managing State agencies effectively have been ongoing concerns of Latin American and Caribbean (LAC) governments since the beginning of this century. Government officials are now paying closer attention to the results obtained by their administrations. Citizens are now demanding not only universality but also quality in the services that the State provides (e.g., education, healthcare, and legal services). To meet this growing demand for public sector effectiveness, governments have formulated new laws, created or modified institutions, and implemented innovative management methodologies and instruments. Based on data gathered in 24 countries, this book analyzes the current situation, the progress made, and the challenges still facing the governments of the region in their efforts to achieve more effective public administrations.

*The Disappearing Spoon* - Sam Kean 2010-07-12

From New York Times bestselling author Sam Kean comes incredible stories of science, history, finance, mythology, the arts, medicine, and more, as told by the Periodic Table. Why did Gandhi hate iodine (I, 53)? How did radium (Ra, 88) nearly ruin Marie Curie's reputation? And why is gallium (Ga, 31) the go-to element for laboratory pranksters? The Periodic Table is a crowning scientific achievement, but it's also a treasure trove of adventure, betrayal, and obsession. These fascinating tales follow every element on the table as they play out their parts in human history, and in the lives of the (frequently) mad scientists who discovered them. THE DISAPPEARING SPOON masterfully fuses science with the classic lore of invention, investigation, and discovery--from the Big Bang through the end of time. \*Though solid at room temperature, gallium is a moldable metal that melts at 84 degrees Fahrenheit. A classic science prank is to mold gallium spoons, serve them with tea, and watch guests recoil as their utensils disappear.

*World Editors* - Gustavo Guerrero 2020-12-16

The existence of World Literature depends on specific processes, institutions, and actors involved in the global circulation of literary works. The contributions of this volume aim to pay attention to these multiple material dimensions of Latin American 20th and 21st century literatures. From perspectives informed by materialism, sociology, book studies, and digital humanities, the articles of this volume analyze the role of publishing houses, politics of translation, mediators and gatekeepers, allowing insights into the processes that enable books to cross borders and to be transformed into globally circulating commodities. The book focusses both on material (re)sources of literary archives, key actors in literary and cultural markets, prizes and book fairs, as well as on recent dimension of the digital age. Statements of some of the leading representatives of the global publishing world complement these analyses of the operations of selection and aggregation of value to literary texts.

*Phenomenology and the Human Positioning in the Cosmos* - Anna-Teresa Tymieniecka 2012-10-24

The classic conception of human transcendental consciousness assumes its self-supporting existential status within the horizon of life-world, nature and earth. Yet this assumed absoluteness does not entail the nature of its powers, neither their constitutive force. This latter call for an existential source reaching beyond the generative life-world network. Transcendental consciousness, having lost its absolute status (its point of reference) it is the role of the logos to lay down the harmonious positioning in the cosmic sphere of the all, establishing an original foundation of phenomenology in the primogenital onto-poiesis of life.

**Leopard in the Sun** - Laura Restrepo 2002

*Leopard in the Sun* is an operatic Latin tragedy, complete with chorus of local gossips and popular legend. As a result, the wise family patriarch separates the two families forever - the Barragans will hold sway over the city; the Monsalves the port. Each year, on the day known as the zeta, and only on that day, they will have the opportunity to avenge the previous year's deaths - and each year, the women are not yet out of their black mourning when a new round of deaths occurs. Latin translation by Silvestro Tegli (1560), as well as the first translations

in Dutch (1615), German (1692), Swedish (1757) and Arabic (1824). The

first translation produced in Spain - dated somewhere between the end of

the sixteenth and the early seventeenth century - remained in manuscript

*The Heritage Machine* - Pablo Alonso Gonzalez 2018-12-20

This book upturns the conventional understanding of heritage, challenging widespread notions about how we relate to and why we preserve the

past. Heritage research is often based on the assumption that heritage is something 'given' to us, that it is good and valuable in its own right.

However, by looking at the historical and cultural roots of heritage and its development through the Enlightenment, modernity and capitalism, Pablo Alonso Gonzalez shows that it is in fact a system pervaded by fetishistic social relationships, embedded in capitalism, and not as benign as it appears. Focusing on a case study in the region of Maragatería, Spain, Alonso Gonzalez explores the ethnic and racial discrimination towards the local population in the context of Spanish nationalism, and how this formed the region's heritage today. By challenging mainstream scholarship in the field, *The Heritage Machine* rethinks the relations between heritage, ideology and capitalism.
