Formula 5000 Motor Racing - Derek Lawson
2010-02-01

This book is a trip down memory lane, recalling the days when Formula 5000 cars roared around the race tracks in Britain and Europe, creating a lot of noise and, occasionally, dust. The wail of a 5-litre engine was often more spine-tingling than ANY other racing car! Nowadays, many of the same cars show modern day spectators just what Formula 5000 was, back in the day. Few, if any, of the drivers are prima-donnas and many want to know what their car did before it came into their possession. This book answers those questions and many more.

The book also features an easy to follow index for quick reference on different types of drawing.

Die Einführung von Händlerstandards für erfolgreiche Modell-Neueinführungen als eine Corporate Identity-Maßnahme am Beispiel der Mazda Austria GmbH - Christian Frank 2009-04-01

Inhaltsangabe: Einleitung: Der vertriebliche Auftritt am POS spielt in der Automobilbranche die Rolle eines zentralen Parameters der Markenführung. Es galt, die Komplexität von Modell-Neueinführungen und deren strukturierte Abläufe sowie Aktivitäten und die damit verbundenen importeurseitigen Vorgaben und Richtlinien zu überprüfen. Welches Instrumentarium könnte bei einer Vereinheitlichung des Händler-Auftritts bei Modell-Neueinführungen helfen, und welche Vorteile würde dieses für die Marke Mazda und

die einzelnen Händler mit sich bringen? Diese Fragestellung war das Kernthema der Diplomarbeit, auf die gezielt eingegangen wurde. Es galt, eine Konzeption zu erstellen, die vertrieblichen Auftritte am POS und deren Komplexität näher zu beleuchten, analysieren und in einem weiteren Schritt standardisieren. Uneinheitliche Kommunikationsmaßnahmen führen in der Regel zu uneinheitlichen Marktauftritten und zu einer Irritation bei den Konsumenten und einer Schädigung der Marke. Händlerstandards sind eine Notwendigkeit, wohl auch, um eine Durchsetzung von herstellerdominierten Markenwerten zu ermöglichen. Es wurde gezeigt, dass ein Corporate Identity-Konzept sich nicht ideal für die Standardisierung von Neueinführungen eignet. Entsprechend der Zielsetzung der Arbeit wurde ein Konzept für die Mazda Austria GmbH entwickelt, das eine schrittweise Vereinheitlichung von Modell-Neueinführungen bei den 150 österreichischen Betrieben

gewährleisten soll. Die Idee eines Corporate Launch Manuals wurde geboren und deren Inhalte erstellt. Es wurde ein Modell-Neueinführungsleitfaden entwickelt, dessen Struktur sich in drei Hauptbereiche untergliedert. Im ersten Teil wurden das Erscheinungsbild, die Kommunikation und das Verhalten des Händlerbetriebes beschrieben. Der Hauptteil beschäftigt sich mit den Phasen der Planung, der Vorbereitung, der Einführung bis zur Nachbearbeitung einer Modell-Neueinführung. Es galt, einen möglichen Weg zu einer erfolgreichen Einführung aufzuzeigen. Es wurden sowohl die Struktur als auch die genauen Inhalte beschrieben. Der dritte Teil zeigt die unterstützenden Maßnahmen, die seitens Mazda Austria zur Verfügung gestellt werden sollten, und beinhaltet eine transparente Zeitplanung, sowie diverse Checklisten und andere unterstützende Arbeitsmaterialien. Mit der Erstellung des gesamten Leitfadens und der Empfehlungen für die Implementierung und die

Weiterführung wurde der Mazda Austria GmbH ein möglicher Weg zur Verbesserung einer [...] *Mini Cooper/Mini Cooper S* - Graham Robson

Russian Motor Vehicles - Maurice A. Kelly
2009-07

There has been nothing published outside of Russia concerning the activities of its motor industry, by 1937 the Soviets had become the largest producers of motor vehicles in Europe, albeit with the help of Henry Ford. The author decided to concentrate on the work of the pioneers in Czarist Russia, for their efforts were more diverse than those of their counterparts in

the Soviet era. However, one Soviet motor car which was an indigenous product has been included to illustrate how the industry might have evolved if Henry Ford had not been approached. This is a comprehensive overview of all facets of vehicle production from the early days to the final demise of the Soviet Union. All the manufacturers of motor vehicles, certain accessories, military machines, and even aero engines are recorded in this unique book.

The book of the Lamborghini Murciélago -
Thillainathan Pathmanathan 2021-10-21

The wedge-shaped V12 Lamborghini flagships were always spectacular - in shape, sound and performance. The Murciélago was an evolution of the Countach and the Diablo, and was as iconic in its time as its illustrious predecessors were in theirs. This book examines the Murciélago in detail, while casting a look back through Lamborghini's troubled history, to understand how the Murciélago came into being. Ferruccio Lamborghini, Patrick Minram, Megatech,

Chrysler, and finally VW-Audi, all played their part in the birth of this modern classic. The book touches on the people and organisations involved in the production of this iconic car, before examining each of the model variants, and discusses the joys and tribulations of ownership.

André Lefebvre, and the Cars He Created at Voisin and Citroën - Gijsbert-Paul Berk 2011-11-01

Together with his colleagues at Citroën, Andre Lefebvre created the Traction Avant (1934), the TUB (1939) - Citroën's first front wheel drive utility van that was succeeded by the H and HY vans (1947) - the Deux Chevaux (1948), and, last but not least, the DS (1955). From 1923 to 1931 Lefebvre also designed several highly original and outstanding competition cars and record-

breaking automobiles for Voisin. He even drove some these cars in races and record attempts. It is obvious that during his 16 years with Gabriel Voisin he was very much influenced by the ideas of this illustrious aviation pioneer and car manufacturer. The experience gained during that period gave him the self-confidence to persuade his successive bosses at Citroën that his unorthodox approach to automobile design was what the company needed; first he convinced André Citroën, later Pierre Michelin, then Pierre-Jules Boulanger, and finally Robert Puiseux and Pierre Bercot. His oeuvre for Citroën alone earns him a place of honour among the great automobile designers of the past century. The fact that most present-day cars still carry the DNA of his design philosophy makes him stand out above other automotive pioneers and innovators. That is why it is amazing that so little is known about this fascinating and brilliant engineer. This book was written in order to remedy that, and to pay

tribute to André Lefebvre: the passionate pioneer who left car enthusiasts around the world such an important heritage.

British Lorries of the 1960s - Malcolm Bobbitt 2009-10

British commercial manufacturers played a

prime role in boosting Britain's economy during the 1960s, especially as many vehicles were exported worldwide. British lorries were, therefore, considered as being the workhorses of the world, performing a wide range of duties from heavy haulage to general goods delivery. This highly visual study of British lorries of the 1960s captures in 120 illustrations this often understated but very necessary work, which was undertaken day and night, 365 days a year. The images, many contemporary colour and black and white, include some delightful publicity items in addition to covering the heritage and preservation scenes. The comprehensive text reveals much about the marques that were everyday names, along with information about Britain's road haulage and commercial vehicle industries. Malcolm Bobbitt is the author of some thirty automotive books and is a member of the Guild of Motoring Writers and the Society of Automotive Historians. This book will rekindle many memories and serve as a reminder of the

important role British commercial vehicles played during the 1960s.
