"Describes the science concepts involved in several types of car racing"--

Sports Marketing - Larry DeGaris 2015-02-11

Any sports marketing student or prospective sports marketer has to understand in detail genuine industry trends and be able to recognise solutions to real-world scenarios. *Sports Marketing: A Practical Approach* is the first textbook to offer a comprehensive, engaging and practice-focused bridge between academic theory and real-life, industry-based research and practice. Defining the primary role of the sports marketer as revenue generation, the book is structured around the three main channels through which this can be achieved — ticket sales, media and sponsorship — and explores key topics such as: Sports markets and business markets (b2b) Fan development Brand management Media audiences, rights and revenue Live sports events Sponsorship Merchandise and retail Integrating real industry-generated research into every chapter, the book also includes profiles of leading industry executives and guidance for developing and preparing for a career in sports marketing. It goes further than any other sports marketing

textbook in surveying the international sports market, including international cases and detailed profiles of international consumer and business markets throughout. A companion website offers multiple choice questions for students, editable short answer and essay questions, and lecture slides for instructors. No other textbook offers such a relevant, practice-focused overview of contemporary sports marketing. It is the ideal companion to any sports marketing course.

Confronting Racism - Robert T Carter 2019-11-05

This book proposes a comprehensive approach to confronting racism through a foundational framework as well as practical strategies to correct and reverse the course of the past and catalyze the stalled efforts of the present. It will do so by focusing on those specific aspects of law and legal theory that intersect with psychological research and practice. In Part I, the historical and current underpinnings of racial injustice and the obstacles to combating racism are introduced. Part II examines the documented psychological and emotional effects of racism, including race-based traumatic stress. In Part III, the authors analyze the application of forensic mental health assessment in addressing

race-related experiences and present a legal and policy framework for reforming institutional and organizational policies. Finally, in part IV the authors advocate for a close, collaborative approach among legal and mental health professionals and their clients to seek redress for racial discrimination. *Confronting Racism* provides a framework for legal, mental health, and other related social science professionals and leaders to acknowledge and act on the harmful aspects of our societal systems.

The Racecar Book - Bobby Mercer 2013-10-01

Though students aren't yet old enough to drive, that doesn't mean they can't satisfy their need for speed. Author and physics teacher Bobby Mercer will show readers 25 easy-to-build racecars that can be driven both indoors and out. Better still, each of these vehicles is constructed for little or no cost using recycled and repurposed materials. The *Racecar Book* will teach readers how to use mousetraps, rubber bands, chemical reactions, gravity, and air pressure to power these fast-moving cars. They will learn how to turn a potato chip can, a rubber band, and weights into a Chip-Can Dancer, or retrofit a toy car with a toy plane propeller to make an air-powered Prop Car. An effervescent tablet in a small canister makes an impressive rocket engine for a Mini Pop Car, and old CDs, a small cardboard food box, and drinking straws become a Mac-n-Cheese Roller. Every hands-on project contains a materials list and detailed step-by-step instructions. Mercer also includes explanations of the science behind each racecar, including concepts such as friction, Newton's laws of motion, kinetic and potential energy, and more. Teachers will appreciate the opportunity to augment their STEM curricula while having fun at the same time. These projects are also perfect for science fairs or design competitions. Bobby Mercer has been a high school physics teacher for over two decades. He is the author of *The Flying Machine Book* and *Smash It! Crash It! Launch It!* and lives with his family outside of Asheville, North Carolina.

The Negro Motorist Green Book - Victor H. Green

The idea of "The Green Book" is to give the Motorist and Tourist a Guide not only of the Hotels and Tourist Homes in all of the large cities, but other classifications that will be found useful wherever he may be. Also facts and information that the Negro Motorist can use and depend upon. There are thousands of places that the public doesn't know about and aren't listed. Perhaps you know of some? If so send in their names and addresses and the kind of business, so that we might pass it along to the rest of your fellow Motorists. You will find it handy on your travels, whether at home or in some other state, and is up to date. Each year we are compiling new lists as some of these places move, or go out of business and new business places are started giving added employment to members of our race.

The CQ Press Guide to Urban Politics and Policy in the United States - Christine Kelleher Palus 2016-02-11

The CQ Press Guide to Urban Politics and Policy in the United States will bring the CQ Press reference guide approach to topics in urban politics and policy in the United States. If the old adage that "all politics is local" is even partially true, then cities are important centers for political activity and for the delivery of public goods and services. U.S. cities are diverse in terms of their political and economic development, demographic makeup, governance structures, and public policies. Yet there are some durable patterns across American cities, too. Despite differences in governance and/or geographic size, most cities face similar challenges in the management of public finances, the administration of public safety, and education. And all U.S. cities have a similar legal status within the federal system. This reference guide will help students understand how American cities (from old to new) have developed over time (Part I), how the various city governance structures allocate power across city officials and agencies (Part II), how civic and social forces interact with the organs of city government and organize to win control over these organs

and/or their policy outputs (Part III), and what patterns of public goods and services cities produce for their residents (Part IV). The thematic and narrative structure allows students to dip into a topic in urban politics for deeper historical and comparative context than would be possible in either an A-to-Z encyclopedia entry or in an urban studies course text. **FEATURES:** Approximately 40 chapters organized in major thematic parts in one volume available in both print and electronic formats. Front matter includes an Introduction by the Editors along with biographical backgrounds about the Editors and the Contributing Authors. Back matter includes a compilation of relevant topical data or tabular presentation of major historical developments (population growth; size of city budgets; etc.) or historical figures (e.g., mayors), a bibliographic essay, and a detailed index. Sidebars are provided throughout, and chapters conclude with References & Further Readings and Cross References to related chapters (as links in the e-version). This Guide is a valuable reference on the topics in urban politics and policy in the United States. The thematic and narrative structure allows researchers to dip into a topic in urban politics for a deeper historical and comparative context than would be possible in either an A-to-Z encyclopedia entry or in an urban studies course text.

Race to Incarcerate - Marc Mauer 2013-04-02

"Do not underestimate the power of the book you are holding in your hands." —Michelle Alexander More than 2 million people are now imprisoned in the United States, producing the highest rate of incarceration in the world. How did this happen? As the director of The Sentencing Project, Marc Mauer has long been one of the country's foremost experts on sentencing policy, race, and the criminal justice system. His book *Race to Incarcerate* has become the essential text for understanding the exponential growth of the U.S. prison system; Michelle Alexander, author of the bestselling *The New Jim Crow*, calls it "utterly indispensable." Now, Sabrina Jones, a member of the World

War 3 Illustrated collective and an acclaimed author of politically engaged comics, has collaborated with Mauer to adapt and update the original book into a vivid and compelling comics narrative. Jones's dramatic artwork adds passion and compassion to the complex story of the penal system's shift from rehabilitation to punishment and the ensuing four decades of prison expansion, its interplay with the devastating "War on Drugs," and its corrosive effect on generations of Americans. With a preface by Mauer and a foreword by Alexander, *Race to Incarcerate: A Graphic Retelling* presents a compelling argument about mass incarceration's tragic impact on communities of color—if current trends continue, one of every three black males and one of every six Latino males born today can expect to do time in prison. The race to incarcerate is not only a failed social policy, but also one that prevents a just, diverse society from flourishing.

CQ Press Guide to Radical Politics in the United States - Susan Burgess
2016-03-11

This unique guide will provide an overview of radical U.S. political movements on both the left and the right sides of the ideological spectrum, with a focus on analyzing the origins and trajectory of the various movements and the impact that movement ideas and activities have had on mainstream American politics. The work is organized thematically, with each chapter focusing on a prominent arena of radical activism in the United States. The chapters will trace the chronological development of these extreme leftist and rightist movements throughout U.S. history. Each chapter will include a discussion of central individuals, organizations, and events as well as their impact on popular opinion, political discourse and public policy. For movements that have arisen multiple times throughout U.S. history (nativism, religious, radical labor, separatists), the chapter will trace the history over time but the analysis will emphasize its most recent manifestations. Sidebar features will be included in each chapter to provide

additional contextual information to facilitate increased understanding of the topic.

The Oxford Handbook of Sound and Image in Western Art - Yael Kaduri

2016

Résumé en 4ème de couverture: "This book examines different kinds of analogies, mutual influences, integrations, and collaborations of the audio and the visual in different art forms. The contributions, written by key theoreticians and practitioners, represent state-of-the-art case studies in contemporary art, integrating music, sound, and image with key figure of modern thinking constitute a foundation for the discussion. It thus emphasizes avant-garde and experimental tendencies, while analyzing them in historical, theoretical, and critical frameworks. The book is organized around three core subjects, each of which constitutes one section of the book. The first concentrates on the interaction between seeing and hearing. Examples of classic and digital animation, video art, choreography, and music performance, which are motivated by the issue of eye versus ear perception are examined in this section. The second section explores experimental forms emanating from the expansion of the concepts of music and space to include environmental sounds, vibrating frequencies, language, human habitats, the human body, and more. The reader will find here an analysis of different manifestations of this aesthetic shift in sound art, fine art, contemporary dance, multimedia theatre, and cinema. The last section shows how the new light shed by modernism on the performative aspect of music has led it-together with sound, voice, and text-to become active in new ways in postmodern and contemporary art creation. In addition to examples of real-time performing arts such as music theatre, experimental theatre, and dance, it includes case studies that demonstrate performativity in visual poetry, short film, and cinema. Sitting at the cutting edge of the field of music and visual arts, this book offers a unique, and at times controversial, view of this rapidly evolving area of study. Artists, curators, students, and scholars will find here a panoramic view of discourse in the field, presented by an international roster of scholars and practitioners."

Why Are All the Black Kids Sitting Together in the Cafeteria? - Beverly Daniel Tatum 2017-09-05

The classic, bestselling book on the psychology of racism -- now fully revised and updated Walk into any racially mixed high school and you will see Black, White, and Latino youth clustered in their own groups. Is this self-segregation a problem to address or a coping strategy? Beverly Daniel Tatum, a renowned authority on the psychology of racism, argues that straight talk about our racial identities is essential if we are serious about enabling communication across racial and ethnic divides. These topics have only become more urgent as the national conversation about race is increasingly acrimonious. This fully revised edition is essential reading for anyone seeking to understand the dynamics of race in America.

The Indianapolis 500 - J. Craig Reinhardt 2019-04-01

Exploring Digital Ecosystems - Alessandra Lazazzara 2019-07-30

The recent surge of interest in digital ecosystems is not only transforming the business landscape, but also poses several human and organizational challenges. Due to the pervasive effects of the transformation on firms and societies alike, both scholars and practitioners are interested in understanding the key mechanisms behind digital ecosystems, their emergence and evolution. In order to disentangle such factors, this book presents a collection of research papers focusing on the relationship between technologies (e.g. digital platforms, AI, infrastructure) and behaviours (e.g. digital learning, knowledge sharing, decision-making). Moreover, it provides critical insights into how digital ecosystems can shape value creation and benefit various stakeholders. The plurality of perspectives offered makes the book particularly relevant for users, companies, scientists and governments. The content is based on a selection of the best papers – original double-blind peer-reviewed contributions – presented at the annual conference of the Italian chapter of the AIS, which took place in Pavia, Italy in October 2018.

The Oxford Handbook of Parenting and Moral Development - Deborah J. Laible 2019-09-30

The Oxford Handbook of Parenting and Moral Development provides a collection of state-of-the-art theories and research on the role that parents play in moral development. Contributors who are leaders in their fields take a comprehensive, yet nuanced approach to considering the complex links between parenting and moral development. The volume begins by providing an overview of traditional and contemporary perspectives on parenting and moral development, including perspectives related to parenting styles, domain theory, attachment theory, and evolutionary theory. In addition, there are several chapters that explore the genetic and biological influences related to parenting and moral development. The second section of the volume explores cultural and religious approaches to parenting and moral development and contributes examples of contemporary research with

diverse populations such as Muslim cultures and US Latino/as. The last major section of the volume examines recent developments and approaches to parenting, including chapters on topics such as helicopter parenting, proactive parenting, parent-child conversations and disclosure, parental discipline, and other parenting practices designed to inhibit children's antisocial and aggressive behaviors. The volume draws together the most important work in the field; it is essential reading for anyone interested in parenting and moral development.

The Politics of Belonging - Natalie Masuoka 2013-08-12

The United States is once again experiencing a major influx of immigrants. Questions about who should be admitted and what benefits should be afforded to new members of the polity are among the most divisive and controversial contemporary political issues. Using an impressive array of evidence from national surveys, *The Politics of Belonging* illuminates patterns of public opinion on immigration and explains why Americans hold the attitudes they do. Rather than simply characterizing Americans as either nativist or nonnativist, this book argues that controversies over immigration policy are best understood as questions over political membership and belonging to the nation. The relationship between citizenship, race, and immigration drive the politics of belonging in the United States and represents a dynamism central to understanding patterns of contemporary public opinion on immigration policy. Beginning with a historical analysis, this book documents why this is the case by tracing the development of immigration and naturalization law, institutional practices, and the formation of the American racial hierarchy. Then, through a comparative analysis of public opinion among white, black, Latino, and Asian Americans, it identifies and tests the critical moderating role of racial categorization and group identity on variation in public opinion on immigration.

The Routledge Handbook of Media Use and Well-Being - Leonard Reinecke 2016-06-23

The Routledge Handbook of Media Use and Well-Being serves as the first international review of the current state of this fast-developing area of research. The volume provides a multifaceted perspective on the beneficial as well as the detrimental effects of media exposure on psychological health and well-being. As a "first-mover," it will define the field of media use and well-being and provide an essential resource for research and teaching in this area. The volume is structured along four central considerations: Processes presents concepts that provide a theoretical bridge between media use and well-being, such as psychological need satisfaction, recovery from stress and strain, self-presentation and self-enhancement, or parasocial interactions with media

characters, providing a comprehensive understanding of the underlying processes that drive psychological health and well-being through media. Moderators examines both risk factors that promote negative effects on well-being and protective factors that foster positive media effects. Contexts bridges the gap between theory and "real life" by illustrating how media use can influence well-being and satisfaction in very different life domains, covering the full spectrum of everyday life by addressing the public, private, and work spheres. Audiences takes a look at the influence of life phases and life situations on the interplay of media use and well-being, questioning whether various user groups differ with regard to the effects of media exposure. Bringing together the expertise of outstanding international scholars from multiple disciplines, including communication, media psychology, social psychology, clinical psychology, and media education, this handbook sheds new light on the role of media in influencing and affecting emotions.

The Oxford Handbook of Musical Repatriation - Frank Gunderson 2019-09-09

The Oxford Handbook of Musical Repatriation is a significant edited volume that critically explores issues surrounding musical repatriation, chiefly of recordings from audiovisual archives. The Handbook provides a dynamic and richly layered collection of stories and critical questions for anyone engaged or interested in repatriation or archival work. Repatriation often is overtly guided by an ethical mandate to "return" something to where it belongs, by such means as working to provide reconnection and Indigenous control and access to cultural materials. Essential as these mandates can be, this remarkable volume reveals dimensions to repatriation beyond those which can be understood as simple acts of "giving back" or returning an archive to its "homeland." Musical repatriation can entail subjective negotiations involving living subjects, intangible elements of cultural heritage, and complex histories, situated in intersecting webs of power relations and manifold other contexts. The forty-eight expert authors of this book's thirty-eight chapters engage

with multifaceted aspects of musical repatriation, situating it as a concept encompassing widely ranging modes of cultural work that can be both profoundly interdisciplinary and embedded at the core of ethnographic and historical scholarship. These authors explore a rich variety of these processes' many streams, making the volume a compelling space for critical analysis of musical repatriation and its wider significance. The Handbook presents these chapters in a way that offers numerous emergent perspectives, depending on one's chosen trajectory through the volume. From retracing the paths of archived collections to exploring memory, performance, research goals, institutional power, curation, preservation, pedagogy and method, media and transmission, digital rights and access, policy and privilege, intellectual property, ideology, and the evolving institutional norms that have marked the preservation and ownership of musical archives-The Oxford Handbook of Musical Repatriation addresses these key topics and more in a deep, richly detailed, and diverse exploration.

America, As Seen on TV - Clara E. Rodríguez 2018-03-20

Finalist, 2020 Latino Book Awards, Best Academic Themed Book The surprising effects of American TV on global viewers As a dominant cultural export, American television is often the first exposure to American ideals and the English language for many people throughout the world. Yet, American television is flawed, and, it represents race, class, and gender in ways that many find unfair and unrealistic. What happens, then, when people who grew up on American television decide to come to the United States? What do they expect to find, and what do they actually find? In *America, As Seen on TV*, Clara E. Rodríguez surveys international college students and foreign nationals working or living in the US to examine the impact of American television on their views of the US and on their expectations of life in the United States. She finds that many were surprised to learn that America is racially and economically diverse, and that it is not the easy-breezy, happy endings culture portrayed in the media, but a work culture. The author also

surveys US-millennials about their consumption of US TV and finds that both groups share the sense that American TV does not accurately reflect racial/ethnic relations in the US as they have experienced them. However, the groups differ on how much they think US TV has influenced their views on sex, smoking and drinking. *America, As Seen on TV* explores the surprising effects of TV on global viewers and the realities they and US millennials actually experience in the US.

An Encyclopaedia of World Bridges - David McFetrich 2022-04-30

Bridges are one of the most important artefacts constructed by man, the structures having had an incalculable effect on the development of trade and civilisation throughout the world. Their construction has led to continuing advances in civil engineering technology, leading to bigger spans and the use of new materials. Their failures, too, whether from an inadequate understanding of engineering principles or as a result of natural catastrophes or warfare, have often caused immense hardship as a result of lost lives or broken communications. In this book, a sister publication to his earlier *An Encyclopaedia of British Bridges* (Pen & Sword 2019), David McFetrich gives brief descriptions of some 1200 bridges from more than 170 countries around the world. They represent a wide range of different types of structure (such as beam, cantilever, stayed and suspension bridges). Although some of the pictures are of extremely well-known structures, many are not so widely recognisable and a separate section of the book includes more than seventy lists of bridges with distinctly unusual characteristics in their design, usage and history.

Race, Taste, Class and Cars - Alam, Yunis 2020-07-01

Love them or hate them, most of us have an opinion about cars. If not the cars themselves, then it's driver competence and behaviour that can offend us. And then there's modification: alloy wheels, custom audio systems and bespoke paint jobs. For some, changing the look, feel and sound of a car says

something about themselves, but for others, such enhancements signify a lack of taste, or even criminality. In subtle and complex ways, cars transmit and modify our identities behind the wheel. As a symbol of independence and freedom, the car projects status, class, taste and, significantly, embeds racialisation. Using fascinating research from drivers, including first-person accounts, Alam unpicks the ways in which our identity is enhanced and driven.

The Model Rules of Professional Conduct provides an up-to-date resource for

information on legal ethics. Federal, state and local courts in all jurisdictions look to the Rules for guidance in solving lawyer malpractice cases, disciplinary actions, disqualification issues, sanctions questions and much more. In this volume, black-letter Rules of Professional Conduct are followed by numbered Comments that explain each Rule's purpose and provide suggestions for its practical application. The Rules will help you identify proper conduct in a variety of given situations, review those instances where discretionary action is possible, and define the nature of the relationship between you and your clients, colleagues and the courts.
