Art and Christhood - Guy Willoughby 1993

In this stimulating new study, Guy Willoughby suggests that Oscar Wilde's imaginative engagement with the figure of Jesus Christ, shorn of His attachment to ecclesiastical dogma, is a key to the coherence and import of the fin de siecle writer's aesthetics. Through a rigorous but elegant discourse on each of Wilde's major (and minor) works, Willoughby argues that the

author's abiding ethical and aesthetic themes coalesce around the figure referred to in De Profundis as "the precursor of the Romantic movement in life." The works discussed in detail include the fairy tales, the Poems in Prose, The Picture of Dorian Gray, the poetic dramas, essays, and Wilde's juvenile and mature verse. In contrast to those critics who have dismissed Oscar Wilde's thematic confusion or contrivance, and

his "aesthetic" disdain for "the world of actual existence" (as he called it), Guy Willoughby asserts that Wilde's most urgent, overriding interest was in the relationship of art to life - and that, ultimately, his concern was to merge the two constructs, to fuse the aesthetic impulse into a radical new mode of experience. In developing this radical impulse, which must strike a sympathetic chord in our contemporary, "postmodern" reevaluation of traditional boundaries, Willoughby finds that Wilde concretized his mature, reformulated aestheticism by rereading the mission and career of Christ. In one sense, Wilde's treatment of the numinous founder of Christianity recapitulates the search of nineteenth-century scholarship for the "historical Jesus," and Willoughby traces affinities in Wilde's work with the secular Christologies of Ernest Renan and Matthew Arnold. But in a strikingly contemporary sense Wilde looks forward to Paul Tillich or Dietrich Bonhoeffer, for his

Christ is an insistent iconoclast and systembreaker, his vision an impetus for a perpetual recasting of ethical or ideological distinctions. It is thus that the artist is Christ's most notable imitator, for in the Wildean schema art is a necessarily dangerous and disruptive force. Willoughby gives a full account of the extraordinary range of Wilde's generic and stylistic departures, and demonstrates that the complexity and surprise of these structural choices accords with the author's aesthetic project. In particular, Willoughby details Wilde's shrewd mining of strains in Western myth and symbolism, and the rich tension between Hellenic and Hebraic postures that is a vital dialogic force in his essays, plays and tales. Drawing on elements from myth and genre criticism, as well as literary theory, Guy Willoughby establishes Oscar Wilde as a seminal writer standing Janus-like between the Victorian and Modernist sensibilities, and a writer whose essays into

aesthetic theory and practice are perhaps best appreciated today. This book marks an important juncture in our understanding of both Oscar Wilde and the radical aestheticism he initiated in British cultural debates.

Films that Work - Vinzenz Hediger 2009

Industriële films worden gezien als een apart filmgenre van de twintigste eeuw. Ze werden geproduceerd en gesponsord door de overheid en grote bedrijven en moesten vooral aan de wensen van de sponsors voldoen, en niet zo zeer aan die van de filmmakers. In de hoogtijdagen werkten er duizenden mensen aan deze industriële films. Zo zijn er vakbladen en filmfestivals ontstaan door samenwerking met grote bedrijven als Shell en AT & T. Daarnaast hebben belangrijke regisseurs, zoals Buster Keaton, John Grierson en Alain Resnais, aan deze films meegewerkt. Toch lijkt de industriële film geen spoor te hebben achtergelaten in het filmische culturele discours. Films that Work is het eerste

boek waarin de industriële film en zijn opmerkelijke geschiedenis worden onderzocht.

Untiedt 2012 "The Texas Folklore Society has been alive and kicking for over one hundred years now, and I don't really think there's any mystery as to what keeps the organization going strong. The secret to our longevity is simply the constant replenishment of our body of contributors. We are especially fortunate in recent years to have had papers given at our annual meetings by new members—young members, many of whom are college or even high school students. "These presentations are oftentimes given during sessions right alongside some

of our oldest members. We've also had long-time members who've been around for years but had never yet given papers; thankfully, they finally took the opportunity to present their research, fulfilling the mission of the TFS: to collect, preserve, and present the lore of Texas and the Southwest. "You'll find in this book some of the best articles from those presentations. The first fruits of our youngest or newest members include Acayla Haile on the folklore of plants. Familiar and well-respected names like J. Rhett Rushing and Kenneth W. Davis discuss folklore about monsters and the classic 'widow's revenge' tale. These works—and the people who produced them—represent the secret behind the history of the Texas Folklore Society, as well as its future."—Kenneth L. Untiedt

Working Detroit - Steve Babson 1986

Babson recounts Detroit's odyssey from a bulwark of the "open shop" to the nation's foremost "union town."

Through words and pictures, *Working Detroit* documents the events in the city's ongoing struggle to build an industrial

society that is both prosperous and humane. Babson begins his account in 1848 when Detroit has just entered the industrial era. He weaves the broader historical realities, such as Red Scare, World War, and economic depression into his account, tracing the ebb and flow of the working class activity and organization in Detroit -- from the rise of the Knights of Labor and the American Federation of Labor in the 19th century, through the Congress of Industrial Organizations and the sitdown strike of the 1930s, to the civil rights and women's movements of the 1960s and 1970s. The book concludes with an examination of the present day crisis facing the labor movement.

COPO Camaro, Chevelle &

Nova - Matt Avery 2018-09-14

The COPO Camaros, Chevilles, and Novas of the 1960s and early 1970s were the ultimate high-performance GM muscle cars. While few knew about this back channel program at the time, it is now recognized as the origin of GM's top

muscle cars. Dedicated Chevy racers and car owners were determined to compete head-to-head with Mopar and Ford at the racetrack and on the street. But in order to do so, they needed to circumvent the corporate ban on racing and resolve the restriction of 400-ci engines in intermediate vehicles. Don Yenke and some other creative individuals recognized the loophole in the COPO (Central Office Production Order) system at General Motors. The COPO program was designated for fleet vehicles such as taxicabs, but at the peak of the muscle car wars it was used to build the ultimate high-performance Chevy muscle cars. Some horrific on-track accidents compelled General Motors to drop out of racing, yet GM did not want to allow Chrysler and Ford to steal the glory on Sundays while they stood on the sidelines. As a result, GM inconspicuously ran the Chevy racing and high-performance program through back channels, and COPO was integral part of the program.

Don Yenke became the COPO muscle car program chief architect and champion. He ordered the Corvair through the COPO program and created the Corvair Stinger to mount a SCCA road race campaign. From these humble beginnings, the road map for creating the ultimate Camaros, Chevelles, and Novas was established. Factory Camaro V-8s came equipped with the 350 small-block or 396 big-block, which had to compete with the Mustang Cobra Jets and Mopar Wedge and Hemi cars. In response, building the big-block Camaro through the COPO program was devised. At the factory, Camaros were fitted with the 396 engines and shipped to dealers where the 427s were installed in the cars. From 1967 to 1969, the factory and dealers installed eight different 427 engines, including the all aluminum ZL1 427. Later on, others used the road map to build COPO Novas and Chevelles to similar spec, with similar results. The COPO performance car program did not end with these muscle cars.

Yenko even ordered several hundred Vegas through the COPO program, so they could be fitted with turbochargers and raced in SCCA competition. Chevy muscle car aficionado and author Matt Avery retraces the history of the COPO program and the creation of these premier muscle cars. He has scoured archives and tracked down owners and personnel involved in the program to deliver a comprehensive story and complete guide to the COPO cars. The COPO muscle car and racing program produced a storied and remarkable journey, and author Matt Avery captures all these facets in this entertaining and revealing history. p.p1 {margin: 0.0px 0.0px 0.0px 0.0px; font: 12.0px Arial}

Just Needs a Recharge - Rob Siegel 2018-04-24

Air conditioning in vintage cars often falls into disrepair, as owners figure that it never really worked all that well when it was new, and assume that rejuvenation would be prohibitively expensive. In his new book, Just Needs a Recharge: The Hack Mechanic Guide to Vintage Air Conditioning, Rob Siegel details exactly what's needed to resurrect long-dead air conditioning in a vintage car, or install a/c in a car that never had it. In a level of detail not found in any other automotive a/c book, Rob reveals what you need to know about flare and o-ring fittings, upgrading to a rotary-style compressor and a parallel-flow condenser, making or specifying custom hoses, and selecting refrigerant so that the a/c blows cold enough to be usable. Although the book draws from Rob's BMW experience (with specifics for the BMW 2002 and 3.0CS), and

concentrates on vintage a/c systems (those that have flare fittings and originally contained R12), most of the information applies to any air conditioning system, foreign or domestic, vintage or modern. Written in Rob's entertaining Hack Mechanic narrative voice, and including 240 photographs and illustrations, the book covers theory, the choice of refrigerant (R12, R134a, other EPA-approved, non-EPA-approved), legality, tools for a/c work, fittings and sizes, the compressor, the evaporator assembly and expansion valve or orifice tube, the condenser and fan, the receiver/drier or accumulator, electrical connections and compressor cycling, connecting and using manifold gauges, the basic steps for a/c rejuvenation, from-scratch a/c retrofit, making and installing hoses, flushing the system, pressure-testing and leak detection, evacuating and charging the system troubleshooting, and other things that heat up the cabin.

Czesław Miłosz in Postwar America - Ewa Kołodziejczyk
2021-08-02

Czesław Miłosz is at times called an American poet. This means one thing in Poland, and something else in the United States. To Polish readers, this description is mainly related to the moment of his departure from Europe to take up employment at the University of California in Berkeley, and his settlement for many years in California, where his new poems and essays were written. Miłosz is to them an American poet, in a biographical sense, from the time he started living at Grizzly Peak until his return to Krakow, and in a symbolic sense, for as long as he

cooperated with the publishing market, participated in literary life, and was an ambassador of Polish literature across the ocean. He is an American poet to the extent that his work was influenced by the thought and work of those cultural circles. However, one has to return to the landmark year of 1960, when Miłosz had only set off for Berkeley, and ask about the awareness with which he discovered America, where he spent those consequential five years fifteen years before, and where he apparently took refuge from the consequences of the Sovietization of his native part of Europe. He returned to America as someone familiar with its realities and its lifestyle, with the reasoning and actions of its people, aware of many local customs and problems, well versed in various circulations of culture and information, fluent in English, with a rich and current knowledge of the literature of the linguistic circles that permeated it. Little is known about the postwar period, when Miłosz built this

extensive awareness. For various reasons, it has not been the subject of investigations and research. Not only because the question of the poet's American traits, posed ever more eagerly today, hides the assumption that it refers to his California period treated as a phase of life and creativity which is closed both temporally and intellectually. Such a formulation of this question also results partly from the Polish understanding of the label of an American poet. However, this question gains its full meaning only when its scope includes, firstly, the realization that 1960 was not the initial year in Miłosz's learning about America - it only marked a renewal of this process in a more complex way. Secondly, the question should include our awareness of the baggage of Miłosz's experiences accumulated in the 1940s, with which he reentered the New World. In other words, understanding the process of taking root in California after 1960 is possible when we, as Miłosz himself did, take into

account his American postwar period, thought-out, problematized and reassessed in Europe after 1950. This book aims to show how Czesław Miłosz assimilated America from 1945 to 1950, how he expanded his cultural horizon there, incorporating various components within it. The subject of my interest has been, on the one hand, the sphere of his activities in many areas at the time, and on the other, the ways of making use of the intellectual opportunities that his stay in America created for him. The book consists of four parts, each dedicated to a different aspect of Miłosz's five years in America and based on archival research. The first part is a biographical reconstruction of his diplomatic and literary activities, the second discusses his lectures, articles and opinion journalism, the third recreates the process of his study of English-language literature, and the fourth examines the ways in which he assessed the postwar experience in his poetry,

essays, and correspondence. While the last part concerns the period when Miłosz, residing in France, looks back on the American years, which to a large extent influenced the new way of interpreting them, the three previous ones concern the common five-year period and constitute a mutual reference system.

Quattro - Jeremy Walton
2020-09-15

The word 'Quattro', chosen by Audi for its pioneering high-performance four-wheel-drive cars, immediately captures glamour and excitement in the minds of all motorsport enthusiasts. This book, written by a leading journalist and Quattro devotee, explores 24 years of factory-prepared and factory-supported Quattros in motorsport, from 1980 to 2004. It is a tale that extends from rough rally stages to race tracks, from pine-fringed ice trails in the depths of European winters to the shimmering heat haze and melting asphalt of Texas street racing. Along the way, it explains how Quattros collected four world rally

championships, five American driver/manufacturer crowns and a single-year haul of seven international touring car titles, plus numerous other honours. With the five-cylinder turbocharged Quattro in its original form, rallying in the early years yielded numerous wins, most of all in 1982, when seven victories in 11 world championship rallies brought the first title. With the short-wheelbase Sport added to Audi's armoury, 1984 became an all-action, all-conquering rallying season with two more world titles won, for drivers (Stig Blomqvist) and manufacturers. Three stunning Pike's Peak wins were achieved in America in successive years, for Michele Mouton (1985), Bobby Unser (1986) and Walter Röhrl (1987). Starting with double championships for the 200 quattro in TransAm (1988) and the 90 Quattro in IMSA (1989), racing success unfolded in America. Exuberant Hans Stuck was the star driver, but consistent team-mate Hurley Haywood captured that 1988 title. Touring car campaigns

during the 1990s brought huge success, starting with fearsome V8 Quattro 'racing limos' in Germany. Global achievements followed with A4 Quattros in many national Super Touring series throughout Europe and in Australia, including Frank Biela's 1996 title-winning campaign in Britain. Audi continued to win on track in the new millennium as race versions of the S4 and RS6 captured five SCCA GT Championship titles in America.

"A shrewdly designed, generously expansive, timely contribution to our understanding of how 'black' expression continues to define and defy the contours of global (post)modernity. The essays argue persuasively for a transnational ethos binding disparate African and diasporic

enactments, and together provide a robust conversation about the nature, history, future, and even possibility of 'blackness' as a distinctive mode of cultural practice." -- Kimberly Benston, author of *Performing Blackness* "Black Cultural Traffic is nothing less than our generation's manifesto on black performance and popular culture. With a distinguished roster of contributors and topics ranging across academic disciplines and the arts (including commentary on film, music, literature, theater, television, and visual cultures), this volume is not only required reading for scholars serious about the various dimensions of black performance, it is also a timely and necessary teaching tool. It captures the excitement and intellectual innovation of a field that has come of age. Kudos!" --Dwight A. McBride, author of *Why I Hate Abercrombie & Fitch* "The explosion of interest in black popular culture studies in the past fifteen years has left a significant need for a reader

American Cars, 1973-1980 -

J. "Kelly" Flory, Jr. 2012-12-03
The 1973 oil crisis forced the American automotive industry into a period of dramatic change, marked by stiff foreign competition, tougher product regulations and suddenly altered consumer demand. With gas prices soaring and the economy in a veritable tailspin, muscle cars and the massive "need-for-speed" engines of the late '60s were out, and fuel efficient compacts were in. By 1980, American manufacturers were churning out some of the most feature laden, yet smallest and most fuel efficient cars they had ever built. This exhaustive reference work details every model from each

of the major American manufacturers from model years 1973 through 1980, including various "captive imports" (e.g. Dodge's Colt, built by Mitsubishi.) Within each model year, it reports on each manufacturer's significant news and details every model offered: its specifications, powertrain offerings, prices, standard features, major options, and production figures, among other facts. The work is heavily illustrated with approximately 1,300 photographs.

"This is how I Think" - Emily A. Chivers Yochim 2007

This Is How I Think contributes to our understanding of the politics of youth consumer culture by discussing the ways in which white masculinity is presented in youth media and elaborating young men's reactions to these portrayals. Contemporary media representations of white male youth present alternative masculinities that rely on both dominant American values and the mockery of non-whites, homosexuals, and women to maintain men's power.

Utilizing theories of the media audience, youth culture, race, and gender to discuss ethnographic data collected in a community of skateboarders, I contend that skate culture produces alternative modes of masculinity that are not anti-patriarchal, and thus do not disrupt normative power

relations. Further, I suggest, skate culture creates a space in which young men can experience the mental and emotional pleasure of escape and self-expression---an experience often denied young men in a dominant culture that expects them to be emotionally reticent and in control.
