**Land Rover Design - 70 Years of Success** - Nick Hull  
2018-11-20

A landmark new history from design journalist Nick Hull, Land Rover Design - 70 years of Success offers a detailed insight to the company's design story, from the early days of Land Rover in Solihull to the latest generation of the Range Rover Velar in 2018. The Land Rover was born from a desperate need by the Rover Company to develop a stop-gap model to provide cashflow in the post-war years. The original aim of a simple 4x4 agricultural tool soon developed into a multi-purpose vehicle that became the mainstay of the British Army and produced numerous offshoots for the emergency services, police, forestry and aid agencies worldwide. This book details the personalities involved in the various projects since the late 1940s up to today: the designers, modellers and studio engineers. It charts the development of Land Rover and Range Rover projects in the UK, particularly those designed in the Gaydon studio that opened in 1996, and is still a key part of JLR's design resource. From the early days of chalk drawings and wooden models to today's digital renderings and milled clays for the latest Range Rover Evoque, Land Rover's designers and technicians have never been short of creativity. This book tells their story, in their own words, and is a fitting tribute to the spirit and ethos of Land Rover design and engineering.

Range Rover Sport 2005-2013 - James Taylor 2019-11-28

When the Range Rover Sport was launched in 2005, it was aimed at a new group of customers who in many cases would never have considered a Land Rover product before. These customers wanted and could afford a luxurious vehicle that was expensive to run; but they also wanted a very personalized vehicle that did not have the rather grand and conservative connotations of the full-size Range Rover. Brasher and more glamorous than its older sibling, the Sport was soon adopted by celebrities and others who expected to be noticed. Range Rover Sport - The Complete Story is the first book devoted specifically to the first-generation Range Rover Sport. It tells the story behind the development and launch of the vehicle; it explains the market reaction, including contemporary press reviews; provides details of each model with technical specification tables and colour and trip options; lists production figures and VIN identification and dating; details prices and sales figures for the UK, USA and Canada and finally, includes a useful chapter on buying and owning.

*Landy at the Factory* - 2016-08-08

**The Land Rover Story** - Giles Chapman 2013-03-26

A unique look at the development of the Land Rover, this is the story of the simple four-wheel drive vehicle born out of post-war austerity that became a global byword for toughness and rugged style. Launched in 1948, the Land Rover owed its low-key existence to shoestring British ingenuity and—literally—odds and ends left over from World War II. Rover thought it could keep its factory ticking over as the company's post-war fortunes slowly revived. They also thought that farmers might appreciate it as a handy cross between a pick-up and a tractor. But it was soon obvious that the company had created, in the Land Rover, a world-beating product. Giles Chapman tells the story of how Land Rovers have tamed the planet's toughest terrain with their unstoppable off-road capability. It also charts how the Land Rover legend allowed the marque to gradually expand its range with the Range Rover, Discovery, Freelander, and the latest Range Rover Evoque. They're all cars as familiar in cities and suburbs as they are at home in the countryside. Land Rover has been controversial, its fortunes tied to Britain's economic ups and downs. Today it's on a roll, leading a renaissance in British design and manufacturing, yet the continued presence of the Defender helps keep the Land Rover Story absolutely genuine.

**Jue 477** - Martin Port 2020-09

Revealed to the world in 1948, the Land-Rover not only revived the Rover Company's fortunes in an austerity-riddled post-war period, but galvanized its future, thanks to the model's almost immediate success. With the manufacture of an initial 48 'pre-production' examples coming to a close, the first official production models were assembled - starting with chassis 860001. As original factory records prove, this pivotal vehicle was destined for His Royal Highness King George VI, but the decision was made to postpone the presentation and instead, 'number one' was retained by the factory until 1950, when it was registered JUE 477 before leaving Rover Company ownership. After decades left out in the cold and exposed to the elements, 860001 had certainly seen better days, but thanks to the determination of Sir Jim Ratcliffe, founder and Chairman of INEOS, the future of JUE 477 was secured in 2017. Over the next two years, a dedicated team of experts, led by chief restorer, Julian Shoolheifer set about restoring the vehicle while retaining as much of its original DNA as was physically, and safely, possible and making sure that this remarkable vehicle's history and past life was still worn with pride.

**They Found Our Engineer** - Michael Bishop 2011

The British Land Rover 4x4 has grown from 1948 to become one of the world's leading automotive brands. Exactly how it all came together back in the late 1940's and early 50's has been the topic of interest and debate for many years. This was until two Australian enthusiasts, Michael Bishop and Alex Massey quite literally stumbled across senior member of the original Land Rover development team, Arthur Goddard living in Brisbane, Australia in 2009. The discovery led to many of the myths and tales surrounding the early vehicles to be heard as it happened from Arthur's point of view. Then to a trip by Arthur to visit his old work place in Solihull and to the vehicle that he helped bring to life back in 1948. The book contains both a technical and human side to this incredible story as well as a great reunion between Arthur and his old colleague Spen King who went onto design the Range Rover in the 1960's. This

is truly a unique story from the time of post War World two Britain to modern day Australia and how the iconic 4x4 grew up so quickly in the 1950's to become the world leader that it is today.

Phil Edmonston, Canada's automotive "Dr. Phil" for more than 40 years, pulls no punches. In this all-new guide he says: Chrysler's days are numbered with the dubious help of Fiat. Electric cars and ethanol power are PR gimmicks. Diesel and natural gas are the future. Be wary of "zombie" vehicles: Jaguar, Land Rover, Saab, and Volvo. Mercedes-Benz - rich cars, poor quality. There's only one Saturn you should buy. Toyota - enough apologies: "when you mess up, 'fess up."
