Getting the message through: A Branch History of the U.S. Army Signal Corps -

Rebecca Robbins Raines 1996

Getting the Message Through, the companion volume to Rebecca Robbins Raines' Signal Corps, traces the evolution of the corps from the appointment of the first signal officer on the eve of the Civil War, through its stages of growth and

change, to its service in Operation DESERT SHIELD/DESERT STORM. Raines highlights not only the increasingly specialized nature of warfare and the rise of sophisticated communications technology, but also such diverse missions as weather reporting and military aviation. Information dominance in the form of superior communications is considered to

be sine qua non to modern warfare. As Raines ably shows, the Signal Corps--once considered by some Army officers to be of little or no military value--and the communications it provides have become integral to all aspects of military operations on modern digitized battlefields. The volume is an invaluable reference source for anyone interested in the institutional history of the branch.

Sylvia Wynter - Katherine McKittrick 2014-12-08 The Jamaican writer and cultural theorist Sylvia Wynter is best known for her diverse writings that pull together insights from theories in history, literature, science, and black studies, to

explore race, the legacy of colonialism, and representations of humanness. Sylvia Wynter: On Being Human as Praxis is a critical genealogy of Wynter's work, highlighting her insights on how race, location, and time together inform what it means to be human. The contributors explore Wynter's stunning reconceptualization of the human in relation to concepts of blackness, modernity, urban space, the Caribbean, science studies, migratory politics, and the interconnectedness of creative and theoretical resistances. The collection includes an extensive conversation between Sylvia Wynter and Katherine McKittrick that delineates Wynter's engagement with writers such as Frantz Fanon, W. E. B. DuBois, and Aimé Césaire, among others; the interview also reveals the ever-extending range and power of Wynter's intellectual project, and elucidates her attempts to rehistoricize humanness as praxis.

Dressing for Altitude - Dennis R. Jenkins
2012-08-27

"Since its earliest days, flight has been about pushing the limits of technology and, in many cases, pushing the limits of human endurance. The human body can be the limiting factor in the design of aircraft and spacecraft. Humans cannot survive unaided at high altitudes. There have been a number of books written on the subject of spacesuits, but the literature on the high-altitude pressure suits is lacking. This volume provides a high-level summary of the technological development and operational use of partial- and full-pressure suits, from the earliest models to the current high altitude, full-pressure suits used for modern aviation, as well as those that were used for launch and entry on the Space Shuttle. The goal of this work is to provide a resource on the technology for suits designed to keep humans alive at the edge of space."--NTRS Web site.

High and Mighty - Keith Bradsher 2004-01-19

SUVs have taken over America's roads. Ad campaigns promote them as safer and "greener" than ordinary cars and easy to handle in bad weather. But very little about the SUV's image is accurate. They poorly protect occupants and inflict horrific damage in crashes, they guzzle gasoline, and they are hard to control. Keith Bradsher has been at the forefront in reporting the calamitous safety and environmental record of SUVs, including the notorious Ford-Firestone rollover controversy. In *High and Mighty*, he traces the checkered history of SUVs, showing how they came to be classified not as passenger cars but as light trucks, which are subject to less strict regulations on safety, gas mileage, and air pollution. He makes a powerful case that these vehicles are even worse than we suspect--for their occupants, for other motorists, for pedestrians and for the planet itself. In the tradition of *Unsafe at Any Speed* and *Fast Food Nation*, Bradsher's book is a damning exposé of an industry that puts us all at risk, whether we

recognize it or not.

[The Ice Master](#) - Jennifer Niven 2001-10-01

The *Karluq* set out in 1913 in search of an undiscovered continent, with the largest scientific staff ever sent into the Arctic. Soon after, winter had begun, they were blown off course by polar storms, the ship became imprisoned in ice, and the expedition was abandoned by its leader. Hundreds of miles from civilization, the castaways had no choice but to find solid ground as they struggled against starvation, snow blindness, disease, exposure--and each other. After almost twelve months battling the elements, twelve survivors were rescued, thanks to the heroic efforts of their captain, Bartlett, the *Ice Master*, who traveled by foot across the ice and through Siberia to find help. Drawing on the diaries of those who were rescued and those who perished, Jennifer Niven re-creates with astonishing accuracy the ill-fated journey and the crews desperate attempts to find a way home.

This comprehensive reference book follows the form of the author's popular volumes on American cars. The Everything Store - Brad Stone 2013-10-15

The authoritative account of the rise of Amazon and its intensely driven founder, Jeff Bezos, praised by the Seattle Times as "the definitive account of how a tech icon came to life." Amazon.com started off delivering books through the mail. But its visionary founder, Jeff Bezos, wasn't content with being a bookseller. He wanted Amazon to become the everything store, offering limitless selection and seductive convenience at disruptively low prices. To do so, he developed a corporate culture of relentless ambition and secrecy that's never been cracked. Until now. Brad Stone enjoyed unprecedented access to current and former Amazon employees and Bezos family members, giving readers the first in-depth, fly-on-the-wall account of life at Amazon. Compared to tech's other elite innovators -- Jobs, Gates, Zuckerberg -- Bezos is a private man. But he stands out for his restless pursuit of new markets, leading Amazon into risky new ventures like the Kindle and cloud computing, and transforming retail in the same

way Henry Ford revolutionized manufacturing. The Everything Store is the revealing, definitive biography of the company that placed one of the first and largest bets on the Internet and forever changed the way we shop and read.

Love Lifts the Heart - Nancy Crapser Hunt 2009-12-15

This book, I have written, has helped to release all the tension I had with the obstacles I met along with the raising of this family. With the farm life and the large family, including a son with birth defects and Down's syndrome, life was strenuous. Years of struggling to keep the family well and happy. With the help of good doctors and surgeons, in Bobby's case, we have seen that it can be done. I was always trusting God in each incidence. It is my hope that this book will

prove to be an inspiration to any and all who have the privilege of reading it.

Le bugie del marketing - Martin Lindstrom
2012-06-01T01:00:00+02:00

Avete mai ceduto alle pressanti richieste di vostro figlio, che vuole giocattoli costosi o proprio quella marca di cereali per la colazione? Avete comprato un libro solo perché compariva nella classifica dei bestseller? Vi siete mai soffermati ad ammirare il nuovo idolo delle ragazzine? Avete mai dormito abbracciati all'iPhone sotto le coperte? Avete cliccato Mi piace su una pagina di Facebook, sottoscritto una carta fedeltà o infilato in borsa una bottiglietta di disinfettante per le mani? Se la risposta è sì... allora i brand vi hanno lavato il cervello. Il visionario del marketing Martin Lindstrom lo sa bene, perché da più di

vent'anni combatte in prima linea nelle guerre del branding. E ora ha deciso di puntare i riflettori sui suoi colleghi per rivelare tutti i trucchi e le trappole psicologiche con cui il marketing e i pubblicitari nascondono la verità, ci manipolano la mente e ci persuadono nel fare acquisti. Attingendo alle sue esperienze in alcune delle aziende più grandi e ricche del mondo, e sulla base di ricerche innovative che ha condotto appositamente per questo libro, Lindstrom svela alcuni segreti del marketing: - nuove scoperte che evidenziano come la pubblicità si rivolga intenzionalmente a bambini sempre più piccoli o come certe aziende alterano le formule dei loro prodotti per far sì che generino dipendenza fisica - i risultati di uno studio, condotto con la risonanza magnetica, che ha svelato a cosa pensiamo davvero quando vediamo un certo messaggio pubblicitario - come il marketing e i commercianti sfruttano il panico, alimentando nell'opinione pubblica la paura di epidemie globali, disastri naturali e contaminazione degli

alimenti - le ricerche delle neuroscienze che dimostrano quanto siamo dipendenti dai nostri iPhone e Blackberry (e la scioccante verità che affrancarci dall'assuefazione ai telefoni cellulari può essere più difficile che liberarci dalla droga o dall'alcol) - come le aziende raccolgono di nascosto le tracce che lasciamo nel mondo digitale, per setacciare i dettagli più intimi della nostra vita privata e poi usano quelle informazioni per mostrarci offerte tarate al millimetro sui nostri profili psicologici. Prendendo le mosse dalle conclusioni del classico bestseller I persuasori occulti di Vance Packard, scritto oltre cinquant'anni fa, questa inchiesta incendiaria ci presenta i persuasori occulti del ventunesimo secolo e ci spiega perché sono più insidiosi e diffusi che mai. Lettura irrinunciabile per il consumatore informato di oggi, Le bugie del marketing ci insegna a difenderci dai giganti globali che cospirano per strapparci i nostri sudati guadagni.

Sometimes you have to travel to the farthest edge of the world in order to find your true place in it... A panoramic historical epic and an unforgettable love story from the author of *The Tenderness of Wolves*, for fans of Kristin Hannah, Sarah Perry, and Barbara Kingsolver A whaler's daughter, Flora Mackie first crossed the Arctic Circle at the age of twelve. Years later, in 1892, determination and chance lead her back to northern Greenland as a scientist at the head of a British expedition, defying the expectations of those who believe a woman has no place in that harsh world. Geologist Jakob de Beyn was raised

in Manhattan. Yearning for wider horizons, he joins a rival expedition. Jakob and Flora's paths cross. It is a fateful meeting, where passion and ambition collide and an irresistible attraction is born. The violent extremes of the north obsess them both: perpetual night and endless day; frozen seas and coastal meadows, and the strange, maddening pull it exerts on the people trying to make their mark on its vast expanses - a pursuit of glory whose outcome will reverberate for years to come.
