USMC User's Guide to Counseling - 1986

Honda Engine Swaps - Aaron Bonk 2007-02-01

When it comes to their personal transportation, today's youth have shunned the large, heavy performance cars of their parents' generation and instead embraced what has become known as the "sport compact"--smaller, lightweight, modern sports cars of predominantly Japanese manufacture. These cars respond well to performance modifications due to their light weight and technology-laden, high-revving engines. And by far, the most sought-after and modified cars are the Hondas and Acuras of the mid-'80s to the present. An extremely popular method of improving vehicle performance is a process known as engine swapping. Engine swapping consists of removing a more powerful engine from a better-equipped or more modern vehicle and installing it into your own. It is one of the most efficient and affordable methods of improving your vehicle's performance. This book covers in detail all the most popular performance swaps for Honda Civic, Accord, and Prelude as well as the Acura Integra. It includes vital information on electrics, fit, and drivetrain compatibility, design considerations, step-by-step instruction, and costs. This book is must-have for the Honda enthusiast.

Guerrilla Television - Michael Shamberg 1971

This book presents ways to break the stranglehold of broadcast television on the American mind by using low-cost portable video-tape cameras, video cassettes, and cable television to design alternative television networks that favor portability and decentralization. The author's contention is that politics are obsolete and that information tools and tactics are a more powerful means of social change. To achieve true democracy, the author suggests that we develop a sense of media ecology in what he calls "media America," or the information environment. This is the first manual or how-to book for new media tools.
