Private Equity - H. Kent Baker 2015-06-25

During the past few decades, private equity (PE) has attracted considerable attention from investors, practitioners, and academicians. In fact, a substantial literature on PE has emerged. PE offers benefits for institutional and private wealth management clients including diversification and enhancement of risk-adjusted returns. However, several factors such as liquidity concerns, regulatory restrictions, and the lack of transparency limit the attractiveness of some PE options to investors. The latest volume in the Financial Markets and Investments Series, *Private Equity: Opportunities and Risks* offers a synthesis of the theoretical and empirical literature on PE in both emerging and developed markets. Editors H. Kent Baker, Greg Filbeck, Halil Kiyamaz and their co-authors examine PE and provide important insights about topics such as major types of PE (venture capital, leveraged buyouts, mezzanine capital, and distressed debt investments), how PE works, performance and measurement, uses and structure, and trends in the market. Readers can gain an in-depth understanding about PE from academics and practitioners from around the world. *Private Equity: Opportunities and Risks* provides a fresh look at the intriguing yet complex subject of PE. A group of experts takes readers through the core topics and issues of PE, and also examines the latest trends and cutting-edge developments in the field. The coverage extends from discussing basic concepts and their application to increasingly complex and real-world situations. This new and intriguing examination of PE is essential reading for anyone

hoping to gain a better understanding of PE, from seasoned professionals to those aspiring to enter the demanding world of finance.

Outward Foreign Direct Investment in ASEAN - Cassey Lee
2017-02-14

The level of outward foreign direct investment (OFDI) flows from ASEAN countries has increased rapidly in past two decades. This book examines OFDI trends and patterns in the ASEAN region including the impact of the ASEAN Economic Community. It also

provides analyses of country policies affecting OFDI and the drivers of OFDI in Indonesia, Malaysia, Singapore and Vietnam. Myanmar is studied as an investment frontier for other ASEAN countries. span, SPAN { background-color:inherit; text-decoration:inherit; white-space:pre-wrap } "The dynamic economies of Southeast Asia have historically been very large recipients of foreign direct investment (FDI). As global capital markets have opened up, and these economies have developed their technological and commercial capabilities, in more recent years Southeast Asia has emerged as a significant source of outward FDI both within the region and beyond. This important volume, by a group of leading regional scholars, offers a timely, comprehensive, accessible and authoritative analysis of this phenomenon." -- Hal Hill, H.W. Arndt Professor of Southeast Asian Economies, Arndt-Corden Department of Economics, Crawford School of Public Policy, Australian National University "A timely, rich and comprehensive study filling a major gap in the literature on the increasingly important phenomenon of foreign investment flowing out from regions including developing and middle-income countries." -- Luke Nottage, Professor of Comparative and Transnational Business Law; Associate Director, Centre for Asian and Pacific Law at the University of Sydney *Globalization, International Spillovers and Sectoral Changes* - Charlie Karlsson 2018

As a consequence of globalization, news, ideas and knowledge are moving quickly across national borders and generating international spillovers. So too, however, are economic and financial crises. Combining a variety of methods, concepts and interdisciplinary approaches, this book provides an in-depth examination of these structural changes and their impact. Assessing the implications of globalization for businesses and sectors, chapters focus on the interdependencies between different economic and political layers, and explore topics such as human capital, creativity, innovation, networks and collaboration.

Business Models and Firm Internationalisation - Christian Nielsen 2021-12-22

Internationalisation has been a binding request for firms dealing with the challenges of the present-day realities. Extant international business publications have recently begun to point out the relationship between the notions of 'business model' and 'internationalisation', yet the field needs considerably more attention. The core aim of this book is to provide a comprehensive analysis of the ways in which business models and internationalisation impact one another in the process of initiating and expanding international business activities. The analysis makes it feasible to detect the core issues of the interdependences between business models and internationalisation to facilitate management decision-making and implementation of pertinent firm internationalisation incorporating the application of appropriate business models. In this book, the business model is applied to explore the specifics and aspects of firm internationalisation processes. Innovating the business model is analysed as a persuasive means for augmenting the propensities of firms to internationalise. The book enriches the comprehension of the significance of business model innovation as an enabler of firm internationalisation, in view that scares in what manners business model innovation facilitate firm internationalisation. The book chapters address a broad range of issues encompassing: the general roles of business model in firm internationalisation, the relationships between digital business models and platforms on one side and firm internationalisation on another, how business models determine the internationalisation

of services firms, the interplay between business models and firm internationalisation in specific contexts. It will, therefore, be of interest to researchers, academics and advanced students in the fields of international business and management.

The Routledge Companion to Financial Services Marketing - Tina Harrison 2014-12-05

Interest in Financial Services Marketing has grown hugely over the last few decades, particularly since the financial crisis, which scarred the industry and its relationship with customers. It reflects the importance of the financial services industry to the economies of every nation and the realisation that the consumption and marketing of financial services differs from that of tangible goods and indeed many other intangible services. This book is therefore a timely and much needed comprehensive compendium that reflects the development and maturation of the research domain, and pulls together, in a single volume, the current state of thinking and debate. The events associated with the financial crisis have highlighted that there is a need for banks and other financial institutions to understand how to rebuild trust and confidence, improve relationships and derive value from the marketing process. Edited by an international team of experts, this book will provide the latest thinking on how to manage such challenges and will be vital reading for students and lecturers in financial services marketing, policy makers and practitioners.

General Contractor Business Model for Smart Cities - Elie Karam 2022-03-03

This book covers three principal subject areas: smart cities, general contractors and business models. The smart city concept is currently on the rise and cities around the world appear to be in a race to become smart, fast. Converting big cities into smart cities is a move that almost all cities around the globe have made, or will undoubtedly make in the near future, to be able to cope with the various repercussions of urbanization. Smartness is a vague term that could relate to anything and everything, such as infrastructure, people or governance. In this book, we focus our attention on smart buildings - large ones, in particular - and attempt to identify the key problems that France-based construction companies face today, in order to suggest plausible solutions. Our research findings show that no single business model can fit all smart cities worldwide. Using the general contractor business model for smart cities, this book proposes an original solution to managing smart city projects, bringing together architecture, construction and strategy.
