The Life of the Automobile - Steven Parissien 2014-05-13

The Life of the Automobile is the first comprehensive world history of the car. The automobile has arguably shaped the modern era more profoundly than any other human invention, and author Steven Parissien examines the impact, development, and significance of the automobile over its turbulent and colorful 130-year history. Readers learn the grand and turbulent history of the motor car, from its earliest appearance in the 1880s—as little more than a powered quadricycle—and the innovations of the early pioneer carmakers. The author examines the advances of the interwar era, the Golden Age of the 1950s, and the iconic years of the 1960s to the decades of doubt and uncertainty following the oil crisis of 1973, the global mergers of the 1990s, the bailouts of the early twenty-first century, and the

emergence of the electric car. This is not just a story of horsepower and performance but a tale of extraordinary people: of intuitive carmakers such as Karl Benz, Sir Henry Royce, Giovanni Agnelli (Fiat), André Citroën, and Louis Renault; of exceptionally gifted designers such as the eccentric, Ohio-born Chris Bangle (BMW); and of visionary industrialists such as Henry Ford, Ferdinand Porsche (the Volkswagen Beetle), and Gene Bordinat (the Ford Mustang), among numerous other game changers. Above all, this comprehensive history demonstrates how the epic story of the car mirrors the history of the modern era, from the brave hopes and soaring ambitions of the early twentieth century to the cynicism and ecological concerns of a century later. Bringing to life the flamboyant entrepreneurs, shrewd businessmen, and gifted engineers that worked behind the scenes to bring us horsepower and performance, *The Life of the Automobile* is a globe-spanning account of the auto industry that is sure to rev the engines of entrepreneurs and gearheads alike.

The Manipulator - Daniel Carnahan 2014-02-11

Lawyer stories have long fascinated the American reading public. Throwing the Mafia into the mix makes the plot even more attractive. The author, a Vietnam veteran with twenty-five years of experience as a Los Angeles police officer and with a Juris Doctorate degree in law, has crafted a massive, almost 700 page novel that blends police procedure with legal thriller as the protagonists battle both the mob and the head of a powerful, socially prominent family. Mac Thornsby knows what it is like to be bullied. Growing up on the streets after being orphaned at a young age, he barely survived a beating from one of the local thugs when first learning how to

live on his own and managed to do that only with the help of a stranger. Several years later as the husband of a rich socialite he once saved from drowning, he is again bullied into taking part in an assassination but is saved by a Mafia lieutenant who helps fake the deaths. Circumstantial evidence still fingers him for the crimes, however, and it is up to Deputy District Attorney Jim MacDonald to dig for the truth. His investigation as well as a past love relationship will propel him into a desperate fight for his life, the lives of several others involved in the case, and justice. Filled with intense violence, knife-edge suspense, and possibly one of the longest car chases in literary history, Carnahans book has many of the elements of a bestseller. The author could very well have a hit on his hands.

Running Scared - Linda Ladd 2014-04-01

Wrongly accused of kidnapping her own baby, a woman on the run finds the one man who can help in this romantic suspense novel. Kate Reed is surely the happiest woman alive when her husband Michael arranges the adoption of baby Joey after the many years they tried unsuccessfully to conceive a child. From the first moment Kate embraces little Joey, she feels as though everything is finally complete. And when Michael suggests they escape the noisy city to find solace and comfort in the Missouri countryside, she feels like everything is falling into place for her and Michael. But when Michael's behavior suddenly becomes bizarre and unexplainable, Kate wonders whether he has got a bad case of the fatherhood jitters. It seems reasonable enough until sinister men arrive on her doorstep to claim her little one. Kate's only escape seems to be the woods, where she fearfully remains with baby Joey. When she encounters an unkempt man named

Booker, and the two learn she is wanted for kidnapping and murder, this old friend of her grandfather does everything he can to protect Kate and Joey. Of course she has no idea just who this man is, but suddenly she trusts him more than anyone else . . .

Home Town - Tracy Kidder 2012-09-05

In this splendid book, one of America's masters of nonfiction takes us home--into Hometown, U.S.A., the town of Northampton, Massachusetts, and into the extraordinary, and the ordinary, lives that people live there. As Tracy Kidder reveals how, beneath its amiable surface, a small town is a place of startling complexity, he also explores what it takes to make a modern small city a success story. Weaving together compelling stories of individual lives, delving into a rich and varied past, moving among all the levels of Northampton's social hierarchy, Kidder reveals the sheer abundance of life contained within a town's narrow boundaries. Does the kind of small town that many Americans came from, and long for, still exist? Kidder says yes, although not quite in the form we may imagine. A book about civilization in microcosm, Home Town makes us marvel afresh at the wonder of individuality, creativity, and civic order--how a disparate group of individuals can find common cause and a code of values that transforms a place into a home. And this book makes you feel you live there.

Detroit Speed's How to Build a Pro Touring Car - Tommy Lee Byrd 2014-10-15

Trends in automotive modification come and go, some outlandish, some practical. Currently, the trend called "Pro Touring," while expensive, definitely leans toward the practical. Originally a term coined for GM cars, the term Pro Touring has come to mean a style of all cars, and many eras. Pro Touring is essentially the art of adding modern technology to aged designs, creating cars that stop, start, handle, drive, and behave just as modern performance cars do. You can do this in many ways and choose from many suppliers. Detroit Speed is at the forefront of the Pro Touring movement. Both a parts manufacturer and car builder, the company is in a unique position not only to design and manufacture parts, but to build cars and test the parts for their effectiveness on the street and track. Kyle and Stacy Tucker have put their considerable skill in engineering and market savvy to create a unique company to lead the Pro Touring movement. Not only do you learn about the history of the company and how they design their performance parts, install sections cover front sub-frame assemblies, rear suspension assemblies, wheel tubs, fuel system upgrades, brake upgrades, driveline upgrades including an LS swap, cooling system upgrades, and more. The featured cars are customer builds as well as DSE test cars, which include a host of different Chevrolet products, a 1966 Mustang and a 1969 Charger. Detroit Speed's How to Build a Pro Touring Car is a vital edition to every performance enthusiast's library.

The Ends of Kinship - Sienna R. Craig 2020-10-02
For centuries, people from Mustang, Nepal, have relied

on agriculture, pastoralism, and trade as a way of life. Seasonal migrations to South Asian cities for trade as well as temporary wage labor abroad have shaped their experiences for decades. Yet, more recently, permanent migrations to New York City, where many have settled, are reshaping lives and social worlds. Mustang has experienced one of the highest rates of depopulation in contemporary Nepal—a profoundly visible depopulation that contrasts with the relative invisibility of Himalayan migrants in New York. Drawing on more than two decades of fieldwork with people in and from Mustang, this book combines narrative ethnography and short fiction to engage with foundational questions in cultural anthropology: How do different generations abide with and understand each other? How are traditions defended and transformed in the context of new mobilities? Anthropologist Sienna Craig draws on *khora*, the Tibetan Buddhist notion of cyclic existence as well as the daily act of circumambulating the sacred, to think about cycles of movement and patterns of world-making, shedding light on how kinship remains both firm and flexible in the face of migration. From a high Himalayan kingdom to the streets of Brooklyn and Queens, *The Ends of Kinship* explores dynamics of migration and social change, asking how individuals, families, and communities care for each other and carve out spaces of belonging. It also speaks broadly to issues of immigration and diaspora; belonging and identity; and the nexus of environmental, economic, and cultural transformation.

The Truelist - Nick Montfort 2017-09-15

The Truelist is a book-length poem generated by a one-page, stand-alone computer program. Based around compound words, some more conventional, some quite unusual, the poem invites the reader to imagine moving

through a strange landscape that seems to arise from the English language itself. The unusual compounds are open to being understood differently by each reader, given that person's cultural and individual background. The core text that Nick Montfort wrote is the generating computer program. It defines the sets of words that combine, the way some lines are extended with additional language, the stanza form, and the order of these words and the lines in which they appear. The program is included on the last page. Anyone who wishes is free to study it, modify it to see what happens, and make use of it in their own work.

Thinking and Learning through Children's Literature - Miriam G. Martinez 2017-04-18

Much of teachers' attention these days is focused on having students read closely to ferret out the author's intended meaning and the devices used to convey that meaning. But we cannot forget to guide students to have moving engagements with literature, because they need to make strong personal connections to books of merit if they are to become the next generation of readers: literate people with awareness of and concern for the diversity of human beings around them and in different times and places. Fortunately, guiding both students' personal engagement with literature and their close reading to appreciate the author's message and craft are not incompatible goals. This book enthusiastically and intelligently addresses both imperatives, first surveying what is gained when students are immersed in literature; then celebrating and explicating the main features of literature students need to understand to broaden their tastes and deepen their engagement, at the same time they meet external standards; then presenting a host of active methods for exploring all major genres of children's books; and finally presenting suggestions for interdisciplinary teaching units grounded in literature. Created by noted leaders in the fields of children's literature and literacy, the book is enlivened by recurring features such as suggested reading lists, issues for discussion, links to technology, and annotations of exemplary books.

Shelby Mustang Fifty Years - Colin Comer 2014-09-23

"Celebrate America's premier performance car! From the original Shelby Mustang GT350 to today's 700-plus horsepower GT500, Carroll Shelby and Ford Motor Co. have defined high-performance with their Shelby Mustangs.

Shelby built his Mustangs from 1965 until 1970, at a time when it seemed that the muscle car was a dying breed. Then an odd thing happened-people began to realize the classic nature of the car almost as soon as Shelby stopped building them and prices began to climb. By the end of the decade, the Shelby Mustang had become one of the first muscle cars to attain classic status, along with the price hike that went along with that recognition. Prices continued to rise into the next century; a 1967 Shelby Mustang GT500 fetched \$451,000 at auction in 2006, at which time production of new Shelby Mustangs began for the first time in 36 years. Since then prices have cooled a bit, but not nearly as much as they have for other muscle cars; Shelby Mustangs still occupy the top slot at most auctions and Shelby continues to build the popular modern versions of the Mustang today. [This book] tells the story of these amazing cars, from the initial collaboration with Ford to today's record-setting high-tech muscle cars."-- Publisher description.

A man with real

muscles. A man who does real work. I want you for my ad campaign. When you come to your senses, give me a call." "Don't hold your breath," he said. "I can't be bought.
