When Madeline Was Young - Jane Hamilton, award-winning
Jane Hamilton 2007-09-04 author of The Book of Ruth and

A Map of the World brings us a rich and loving novel about a non-traditional family in the aftermath of a terrible accident. When Aaron Maciver's beautiful young wife, Madeline, suffers a head injury in a bicycle crash, she is left with the mental capabilities of a six-year-old. In the years that follow, Aaron and his second wife care for Madeline with deep tenderness and devotion as they raise two children of their own. Inspired in part by Elizabeth Spencer's *Light in the Piazza*, Hamilton offers an honest and exquisite portrait of how a family tragedy forever shapes the boundaries of love.

Sustainable Automobile Transport - L. Ryan 2008-01-01
Transport, and in particular road transport, represents a significant global threat to long-term sustainable development, and is one of the fastest-growing consumers of final energy and sources of

greenhouse gas emissions. In this book, long-term energy economy environment scenarios are used to identify the key technological developments required to address the challenges passenger car transport poses to climate change mitigation and energy security. It also considers possible targets for policy support and examines some of the elements that contribute to the significant levels of uncertainty particularly social and political conditions. The book then builds on this long-term scenario analysis with a broad review of recent empirical examples of relevant policy implementation to identify near-term options for the passenger transportation sector, which may promote a shift towards a more sustainable transport system over the longer term. Sustainable Automobile Transport will be of particular interest to those in the policy process who are striving to address the automobile-derived challenges associated with

climate change a growing rather than declining problem. It will have a worldwide audience as every developed and rapidly growing society struggles to address the dynamic growth in greenhouse gas emissions from automobiles.

Earth User's Guide to Permaculture - Rosemary Morrow 2015-05-05

This completely revised and updated edition of Rosemary Morrow's highly successful *Earth User's Guide to Permaculture* is a straight-forward manual of practical permaculture. This book will be most beneficial if you apply it to the space where you live and work. The same principles apply for becoming more sustainable and living lightly whether you live in a small city apartment with a balcony, in a house with a garden in the suburbs, or on acreage in the country. Included in this new edition are chapters on seed-saving, permaculture at work, integrated pest management, information about domestic as well as rural water usage, a

non-destructive approach towards dealing with weeds and wildlife, and designing to withstand a disaster. *Earth User's Guide to Permaculture* is suitable for beginners as well as experienced permaculture practitioners looking for new ideas in moving towards greater self-reliance and sustainable living.

Christian Character - National Society 2001

Anglican schools in the independent sector are proud of their traditions and their Christian foundation. All such schools will now be subject to a common inspection regime. This work aims to provide support and guidance for schools wishing to: prepare for inspection, review how their Christian foundation is reflected in their practice and develop their Christian

character. It should also help those involved in the inspection process to deepen their understanding of the essential characteristics of an independent school within the Anglican tradition.

Gender Ideologies and Military Labor Markets in the U.S. - Saskia Stachowitsch 2013-03

Gender Ideologies and Military Labor Markets in the U.S. offers a comprehensive analysis of the relationship between changes in military gender ideologies and structural changes in U.S. military and society. By investigating how social and military change have influenced gender ideologies, the author develops an approach that (re-)connects military gender ideologies to the social conditions of their production and distribution and explains their transformation as effects of changing social and political relations and conflicts. Examining the role of different groups of social actors, media debates on women's military participation

and gender ideologies inherent in depictions of military women, the author seeks to contextualise these ideologies are within structural change in the U.S. military and society, relating them to the gender-specific division of labour on civilian and military labor markets. This work provides a deeper understanding of the nexus between military re-structuring processes, women's military integration, and changes of gender ideologies in regard to war and the military, and will be of great interest to students and scholars of gender, security studies and American politics.

clients and servers, explains how TCP, UDP, and IP work, and shows how to debug networking applications via packet sniffing and deconstruction. * Well suited for Windows developer looking to expand to Linux, or for the proficient Linux developer looking to incorporate client-server programming into their application.

Metropolis Burning - Karen Kovacic 2005

Two Billion Cars - Daniel Sperling 2009-01-13

Today there are over a billion vehicles in the world, and within twenty years, the number will double, largely a consequence of China's and India's explosive growth. Given that greenhouse gases are already creating havoc with our climate and that violent conflict in unstable oil-rich nations is on the rise, will matters only get worse? Or are there hopeful signs that effective, realistic solutions can be found? Blending a concise history of cars and their impact on the world, leading

transportation experts Daniel Sperling and Deborah Gordon explain how we arrived at this state, and what we can do about it. Sperling and Gordon assign blame squarely where it belongs--on the auto-industry, short-sighted government policies, and consumers. They explore such solutions as getting beyond the gas-guzzler monoculture, re-inventing cars, searching for low-carbon fuels, and more. Promising advances in both transportation technology and fuel efficiency together with shifts in traveler behavior, they suggest, offer us a way out of our predicament. The authors conclude that the two places that have the most troublesome emissions problems--California and China--are the most likely to become world leaders on these issues. Arnold Schwarzenegger's enlightened embrace of eco-friendly fuel policies, which he discusses in the foreword, and China's forthright recognition that it needs far-reaching environmental and energy policies, suggest that if they

can tackle the issue effectively and honestly, then there really is reason for hope. Updated with a new afterword that sheds light on the profound changes in the global economy in the last year, *Two Billion Cars* makes the case for why and how we need to transform transportation now more than ever. "Authoritatively prescriptive." --Tom Vanderbilt, *Wilson Quarterly* "Provocative and pleasurable, far-seeing and refreshing, fact-based and yet a page-turner, global in scope but rooted in real places. The authors make a convincing case that smart consumers driving smart electric-drive cars can find the critical path to a safer planet." --Robert Socolow, Princeton University "In this insightful and persuasive book, Sperling and Gordon highlight one of the biggest environmental challenges of this century: two billion cars. They rightly contend that we cannot avert the worst of global warming without making our cars cleaner and petroleum-free. Luckily the authors also offer a

roadmap for navigating this problem that is both visionary and achievable." --Frances Beinecke, President, Natural Resources Defense Council
Forest Gardening - Robert Hart 1996

Examines the author's philosophy of "forest gardening", involving a holistic approach encompassing health issues, spirituality, and environmental concerns
The Highlanders - Felix M'Donogh 2017-07-20
Nineteenth Century Collections Online: European Literature, 1790-1840: The Corvey Collection includes the full-text of more than 9,500 English, French and German titles. The collection is sourced from the remarkable library of Victor Amadeus, whose Castle Corvey collection was one of the most spectacular discoveries of the late 1970s. The Corvey Collection comprises one of the most important collections of Romantic era writing in existence anywhere -- including fiction, short prose, dramatic works, poetry, and more -- with a focus on especially difficult-

to-find works by lesser-known, historically neglected writers. The Corvey library was built during the last half of the 19th century by Victor and his wife Elise, both bibliophiles with varied interests. The collection thus contains everything from novels and short stories to belles lettres and more populist works, and includes many exceedingly rare works not available in any other collection from the period. These invaluable, sometimes previously unknown works are of particular interest to scholars and researchers. European Literature, 1790-1840: The Corvey Collection includes: * Novels and Gothic Novels * Short Stories * Belles-Lettres * Short Prose Forms * Dramatic Works * Poetry * Anthologies * And more Selected with the guidance of an international team of expert advisors, these primary sources are invaluable for a wide range of academic disciplines and areas of study, providing never before possible research opportunities for one of the most studied historical

periods. Additional Metadata

The Hype About Hydrogen -

Joseph J. Romm 2013-04-10

"Vital, very readable guidance for investors,

environmentalists, and

interested bystanders looking

toward a future without fossil

fuels." -BOOKLIST "It's hard to

argue with the relentless

logic...." -E/THE

ENVIRONMENTAL MAGAZINE

"Readers looking to separate

facts from hype about cars

running on hydrogen and

large-scale fuel cell systems

will find a useful primer here."-

PUBLISHERS WEEKLY Lately

it has become a matter of

conventional wisdom that

hydrogen will solve many of

our energy and environmental

problems. Nearly everyone --

environmentalists, mainstream

media commentators, industry

analysts, General Motors, and

even President Bush -- seems

to expect emission-free

hydrogen fuel cells to ride to

the rescue in a matter of years,

or at most a decade or two. Not

so fast, says Joseph Romm. In

The Hype about Hydrogen, he

explains why hydrogen isn't the

quick technological fix it's

cracked up to be, and why

cheering for fuel cells to sweep

the market is not a viable

strategy for combating climate

change. Buildings and factories

powered by fuel cells may

indeed become common after

2010, Joseph Romm argues,

but when it comes to

transportation, the biggest

source of greenhouse-gas

emissions, hydrogen is unlikely

to have a significant impact

before 2050. The Hype about

Hydrogen offers a hype-free

explanation of hydrogen and

fuel cell technologies, takes a

hard look at the practical

difficulties of transitioning to a

hydrogen economy, and reveals

why, given increasingly strong

evidence of the gravity of

climate change, neither

government policy nor business

investment should be based on

the belief that hydrogen cars

will have meaningful

commercial success in the near

or medium term. Romm, who

helped run the federal

government's program on

hydrogen and fuel cells during

the Clinton administration,

provides a provocative primer on the politics, business, and technology of hydrogen and climate protection.

Sustainable Energy--without the Hot Air - David J. C.

MacKay 2009

Provides an overview of the sustainable energy crisis that is threatening the world's natural resources, explaining how energy consumption is estimated and how those numbers have been skewed by various factors and discussing alternate forms of energy that can and should be used.

The Thrifty Forager - Alys

Fowler 2015-08-13

Alys Fowler takes a fresh look at foraging, encouraging you to look closer to home, from the weeds in your garden to the trees in your street, rather than the fields and hedgerows of the countryside. Alys showcases her favourite edibles with a plant directory packed with useful information - photographic identification, plant description and tips on how to grow and how to eat it (including recipes such as fruit leathers and chutney) - that

will give you the confidence to identify plants yourself. The book also features innovative ideas for eating your local landscape, from community gardens in Todmorden, UK to Edimental (edible ornamentals) gardens in Norway - this is a fast-growing, global phenomenon that is fun, environmentally friendly and thrifty!

The Everything Car Care Book - Mike Florence 2002

From fixing a flat tire to changing the oil, a guide to home car care provides easy-to-follow instructions for monitoring brakes, checking fluids, adjusting headlights, troubleshooting major problems, and other tasks.

The Short History of a Prince -

Jane Hamilton 2010-09-01

Walter McCloud is a boy with dreams unlike most.

Introduced as a child to the genius of Balanchine and the lyricism of Tchaikovsky, Walter has always aspired to be a dancer. As he grows older, it becomes clear that despite his desire, he lacks the talent, and he faces the painful knowledge

that his more gifted friends have already surpassed him. Soon, however, that pain is overshadowed when his older brother, Daniel, finds a strange lump on his neck and Walter realizes that a happy family can change overnight. The year that follows transforms the McClouds, as they try to hold together in the face of the fearful consequences of Daniel's illness, and Walter makes discoveries about himself and his friendships that will change him forever. Decades later, after Walter has left home and returned, he must come to terms with the memories of that year, and grapple once and for all with the challenge of carving out a place for himself in this all-too-familiar world. A moving story of the torments of sexuality and the redemptive power of family and friendship, *The Short History of a Prince* confirms Jane Hamilton's place as a preeminent novelist of our time.

Beyond the Velvet Curtain -

Karen Kovacik 1999

Peopled with such diverse

characters as Richard Nixon, Nikita Khrushchev, Kafka's father, Dorothea Lange, William Carlos Williams, Lawrence Welk, Robespierre, and a feisty Catholic saint, this collection of poems takes us on an amusement-park ride through the world of history and art.

Neurology for Mrcp - Jonathan D. Rohrer 2011-03-11

This book is the essential revision guide for neurology in the Membership of the Royal College of Physicians (MRCP). Neurology has been rated as the most difficult subject in MRCP examinations and there has been no concise and easy-to-use revision guide to help candidates through the exams until now. *Neurology for MRCP* is written by two experienced neurologists who have taught both the written (Part 1 and Part 2) and clinical (PACES) sections of the exam. This pioneering new book will also be useful for medical students sitting for their final examinations and for doctors who are preparing for the PLAB examination.

Novel Ideas - Barbara Shoup 2009

Novel Ideas provides a substantial introduction to the elements of fiction followed by in-depth interviews with successful novelists who speak with candor and insight into the complex process by which a novel is made. This edition

includes new and updated interviews as well as writing exercises to enhance its use in the writing classroom. Dorothy Allison recalls "deliciously self-indulgent" days of writing in her bathrobe, wrapped in misery and exultation; Peter Cameron explains how he made the move from short fiction to the novel with the aid of a music composer's notebook to track the movement of his characters. Writers as different as Ha Jin, Jill McCorkle, Richard Ford, and Michael Chabon describe their unique approaches to their work while consistently affirming the necessity of committing to the hard effort of it while also remaining open to surprise. Aspiring novelists will find hands-on strategies for beginning, working through, and revising a novel; accomplished novelists will discover new ways to solve the problems they face in process; and serious readers of contemporary fiction will enjoy a glimpse into the way novels are made.
